THE DETROIT EDISON COMPANY

GENERAL OFFICES
2000 SECOND AVENUE
DETROIT, MICHIGAN

May 8, 1933

TO THE CUSTOMERS OF
THE DETROIT EDISON COMPANY

This is the sixth of a series of weekly letters addressed to our 500,000 customers in 29 cities, 58 villages and 130 townships in the southeastern corner of the State of Michigan:

To meet the electric requirements of the people we serve, requires us from time to time to build extensions to plants, substations, distribution systems, warehouses, etc. Since the return on our investment is limited by State Commission regulation we cannot pay any great part of the cost of extensions out of earnings, but must get new capital. We secure this new capital by issuing new stock or bonds. Unless the credit of the Company is excellent, we will not find a market for these securities. When the prospective requirements of our customers call for new plant, we cannot delay. We must be ready to serve. Do you wonder that we are somewhat fussy about our credit?

At present, the relation of our stock and bonds is nearly 50-50. Since the beginning of the Company's service, the total return paid on money invested in the business by the stockholders and bondholders has averaged only 6.31% per year. During the last ten years this total return paid on our capital has averaged 6.42%. Last year it was 5.86%. This year it will be still less. And that is on money capital. It is not on all the money or value, only on real money.

This Company has never paid a stock dividend, even in the boom days when dividends of 200 per cent were far from rare. In the early years of the Company's history, the stockholders received nothing for the use of their money. Dividends were first paid in 1909, at the rate of \$4.00 per share. This dividend was gradually increased until it reached \$8.00 in 1916. Because of decreased earnings during these hard times the dividend was reduced to \$5.00 for the last half of 1932. Continued poor business has caused a further cut to \$4.00 per share per year at the present time.

Much has been said and written lately about a so-called "Power Trust." This is something which is perfectly safe for politicians and the press to discuss and condemn, because no such organization exists. It is all a myth and myths cannot talk back. No one has named the officers of the trust, or even published its post office address. The Detroit Edison Company, however, is an entirely independent company. Contrary to the conception that every large public utility is controlled, this Company stands squarely on its own feet and has been locally managed from its beginning.
