

Spectacular Program Is Scheduled For Air Races

A highly spectacular program has been prepared for the Detroit Air Races which will be held on Friday, Saturday and Sunday of this week at the Wayne County Airport, Goddard and Middlebelt Roads. Sixteen aerobatic and racing events by world-famous stunt and speed flyers will be held each day.

Among the outstanding events on the schedule are a race for the Baby Ruth trophy on a five-mile rectangular course, balloon bursting, delayed parachute jumps, several attacks on world speed records, and stunting at 300 miles per hour. Fifty of the nation's leading pilots have announced their intention of participating in the program.

The races will be officially opened on Friday when the mayors of Michigan towns will welcome the flyers and their friends. The event is sponsored by the Detroit Board of Commerce and the Wayne County road commissioners.

Can you drive eighty miles an hour with one hand on the steering wheel?

ROOSEVELT INAUGURAL HEARD AROUND WORLD

Telephone Service Has Had Big Part in Former Ceremonies

The wide use of telephone facilities during the inauguration of Franklin D. Roosevelt calls to mind other inaugurations. The inauguration that perhaps will be longest remembered by telephone men is that of President Taft, which took place in 1909. On Inauguration Day one of the worst blizzards in years swept the entire eastern part of the country, including Washington. Not only did it ruin the inaugural parade, but it tied up transportation and communication facilities and did thousands of dollars of damage to telephone property. To the Bell System's decision that such a situation should not recur is due in large part the country's present network of storm proof telephone cables.

Population Doubled Over Night
The first inauguration of Woodrow Wilson is remembered by telephone employees as that during which they were called upon to handle the telephone traffic of a city of which the population had doubled overnight. The condition had had no parallel in the history of the telephone business. More people than ever before were present, and the weather was perfect.

The second inauguration of President Wilson in 1917 was the last inauguration where the President spoke to the multitude without the aid of voice amplifying equipment. Thousands of people in the crowd, and even some of the distinguished guests in the reserved seats, heard practically nothing of his address.

First Use of Loud Speakers
At the inauguration of Warren G. Harding in 1921, the Public Address System was used with great success. On that occasion President Harding addressed the greatest number of people that ever listened to one man's voice at one time in the history of the world up to then. The installation and successful operation of the amplifying system was hailed as "a telephone achievement ranking with the opening of the trans-continental line."

Radio broadcasting had come into existence in time for the inauguration of Calvin Coolidge in 1925, and as a result, not only did the people in Washington hear what was said during the ceremonies, but long distance telephone lines carried the words of the speakers to broadcasting stations in important cities from the Atlantic to the Pacific, and these stations sent the spoken words into the homes of listeners throughout the land. This was the first time that so wide an audience listened to any inauguration. The Coolidge inaugural also was memorable as the first during which photographs of inaugural scenes were received in distant cities within an hour after they had been snapped in Washington. This development being made possible by the newly perfected telegraph apparatus of the Bell System.

Made "Talkies" of President
When Herbert Hoover was inaugurated in 1929, one more new product of Bell System research was available, the talking picture. Four picture companies were represented, and in spite of drizzling rain, the movie men stuck to the job and were rewarded with the first "talkies" of an inaugural.

The inauguration of Franklin D. Roosevelt in 1933 had the advantage of the greater approach to perfection of the things which had been introduced at previous inaugurations. Radio equipment, for instance, was more perfect, and so were the telephone circuits which interconnected the nation's broadcasting stations. The telephone service in Washington could hardly have been improved, and the inaugural ceremonies were heard clearly by people not only in every part of the United States, but in foreign countries as well.

GOVERNMENT SENDS INSTRUCTIONS ON CODLING MOTH CURE

Campaign Was Discussion Topic at Recent Meeting Of Fruit Growers in Township

Instructions on the methods of combating the codling moth, the insect which has recently been doing so much damage to fruit crops, have been received from the entomologist at the government station by County Agent K. D. Bailey. The war on this insect was the chief topic of discussion at the meeting of the state fruit growers which was held at the Don Button farm in Farmington township, June 23. The Federal government's objection to the use of arsenate of lead in spraying was brought out at that time.

The instructions of the entomologist, which apply to the second generation of the moth are as follows:

"Spraying for the second generation of codling moth should be completed on standard winter varieties of apples in Oakland County by the 20th of July or slightly later, as determined by the temperature at nightfall.

"In case the owner intends to wash with chemicals, the spray should consist of two pounds of calcium arsenate and four pounds of hydrated lime in 100 gallons of water.

"For those not equipped to wash with chemicals, use: (1) Summer oil emulsion, two gallons in 100 gallons of water; or (2) Summer oil emulsion, one gallon plus three-fourths pint of 40 per cent nicotine sulphate in 100 gallons of water. These should be used with water alone, not combined with sulphur, other sulphur spray, or Bordeaux.

"Be careful to spray well for the second generation. Spray should be applied within four or five days after the temperature reaches 62 degrees or above at nightfall. The moths lay their eggs during the night-time when the temperature reaches 62 degrees Fahrenheit, or more. The eggs hatch a few days afterward, if the weather remains warm. This spray may be followed by two or more similar cover sprays at intervals of two weeks."

Newspaper Praises Work Of Alpha Camp

High praise is accorded the philanthropic work done by the Alpha Gamma Delta sorority at its camp for worthy Jackson children in an article appearing in a recent issue of the Saturday Evening Star of Jackson. Miss Emily Butterfield of Farmington is director of the camp.

About 240 Jackson children are sent for periods of two weeks to the camp. 40 are housed at the camp at one time. Members of Alpha Gamma Delta sorority take turns at supervision. Among the topics which are taught at the camp are domestic science, dietetics, and physical culture. Expert storytellers are provided. Besides the benefit accruing to the children in health and from the lessons learned in the classes, they are taught such details as care of clothes, beds and personal cleanliness.

A weekly Sunday school, with vested choir, is held each week. A special program was undertaken on the Fourth with exercises of worship added to those of patriotism. In the Evening Star article, Mrs. Butterfield explains how the selection of the camp leaders is made. Applications are submitted to Mrs. Butterfield with the references of two members of the chapter of the sorority to which the applicant belongs. The references are in the form of filled questionnaires.

The camp is conducted by the sorority as an experiment in child welfare work. Jackson was selected as the experimental city because that municipality applied first at the time the selection was made.

Two Detroit Families Move To Farmington

Two Detroit families have taken up residence in Farmington during the past week. H. Clark, a mechanic in the George F. Coon, Inc. Chevrolet concern, has taken over the Stodgel house on Maple Avenue. Mrs. Murphy of Detroit will live in a house on Oakland avenue. Both real estate negotiations were handled by Lloyd Gullen.

Auto Drivers Must Get '33 Plates By Tuesday

1933 license plates will be required of all drivers here on Tuesday. More than 350,000 persons in the state, 9,000 of them in Oakland County, have not secured the plates as yet, according to the Department of State, and they will have to secure them before Tuesday or lay up their cars. If all of the persons in Oakland not having the plates try to secure them on Friday, Saturday and Monday, this would mean that the Pontiac office would be swamped by 8,000 persons daily and a considerable proportion would be turned away without

having secured their plates. The half-year stickers will not be good after Monday. The secretary of state has no authority to extend the deadline any further.

SILVER TEA PARTY

Fifty persons attended a silver tea party given by the members and friends of the Progressive Bible Class of the Methodist church last Wednesday, on the lawn of Mrs. Baker's home. After a short business session, the party engaged in a story-telling contest. Mrs. McCracken receiving the prize for the funniest story. Tea was served by a committee consisting of Mrs. Baker, Mrs. Gittel, Mrs. Halsted and Mrs. Chamberlain.

35 ATTEND BIRTHDAY PARTY
35 guests including relatives and friends gathered at the home of Mrs. Frank Cox, in Walled Lake. Friends and relatives from Clarencerville, Detroit, Redford and Lake Chemun, on Sunday, July 23. A pot luck dinner was enjoyed in the afternoon. Sports were indulged after the dinner. The party was given in honor of Mrs. Frank Cox who was 62 and Miss Leland Cox, daughter of Mrs. Frank Cox who was 27. All departed, wishing them many more birthdays.

Mr. and Mrs. John Harlan of Farmington Road were week end guests of friends at Ionia.

Good Seed for Gardening Success

Have you ever tried to grow vigorous, luxuriant plants from cheap seed? Poor economy isn't it? Good seed is always the most economical. Our stock is complete and reliable. We recommend it to you.

Take a long step towards successful gardening by using good seed and applying Vigoro, the complete, scientifically balanced plant food. Order enough Vigoro for everything you grow.

Cops Give Way to Girl Operators at Chicago Police Office Switchboard

Chicago Daily Tribune
Twenty-eight more Chicago policemen are now on active street duty, because that many young women have replaced them as operators at the switchboard of the Chicago Police Department headquarters, 11th and State Streets. All telephone calls for the police are received at this location, and already the new operators have demonstrated their superior efficiency in handling calls which may have to be passed along by teletypewriter, telephone, or radio to the proper destination—squad car, detective bureau, or a commanding officer. The young women shown in this picture are, left to right, Eleanor Fitzwilliams, Gladys Flaherty, Agnes Martin, Betty Hanrahan, Marie McNally, Henrietta Freulich, Edith Semeloff, Elsie Englishman, and Gertrude Repp.
