"THE INVISIBLE MAN"

THE TELEPHONE IS A NECESSITY AND A BLESSING

The last fifty years has witnessed a phenomenal change in the world; it has affected all of us to such an extent as to revolutionize our very mode of existence. This is an era of machinery, of mechanical labor saving devices; an era where speed is an essential factor.

Of the many wonderful inventions that have been devised for our comfort and assistance perhaps there is none of greater service than the telephone. This instrument has given us a feeling of security. We know that in case of fire or of sudden illness the telephone is at our command to summon immediate assistance. In times of emergency lives may depend upon the speedy arrival of help, and the telephone frequently saves those few minutes that are so precious to us.

Modern business depends on the telephone; in fact, it is difficult to visualize the present day business world without including in the picture the ever important telephone. This little instrument is even reaching into the field of international finance and statecraft.

The automobile, the airplane, the express train and the ocean liner are the answer to the demand for speed in transportation, yet all of these means of travel are connected and interwoven with the telephone as the medium of communication.

Yesterday the telephone was a luxury to be enjoyed if possible—now it is a necessity and a blessing.

FORD V-8 TRUCK PRICES CUT

NOW YOU CAN BUY

An 8-Cylinder,
75 Horsepower
TRUCK
FOR AS LITTLE AS

\$500

Economy of operation and upkeep is one of the outstanding features of the Ford V-8 engine. Most "8's" have been big engines, designed for use in heavy, expensive units. But the Ford V-8—compact, simple, easily and inexpensively serviced—has shown that high power can be had at very small cost. The carefully kept records of thousands of owners establish remarkably low figures not only for gasoline and oil consumption but for service and repairs. It is the most economical Ford engine ever built.

Additional Walled Lake News

The debating program in which the local school is engaged is an activity of the Michigan High School Forensic Association and is under the general direction of the Extension Division of the University of Michigan. The preliminary series of debates in the Association will be completed on January 12 when high schools throughout the State enter their fourth round of competition. This debate will take place on the proposal that all radio broadcasting in the United States should be conducted in stations owned and controlled by the Federal Government. This same proposal has been the subject for discussion in earlier contests on November 17, December 1, and December 15. Each school is given the opportunity to defend the affirmative side of the question in two debates and the negative side in two debates, with two contests held at home and two at nearby schools.

The Walled Lake girls and boys Basketball team will play at Milford Friday evening at 7:30 o'clock.

This game was originally scheduled for Walled Lake but was changed because of replacement of the floor in the Walled Lake gym.

This should be one of the hardest fought games of the season and Walled Lake fans are urged to attend. Admission will be 10c and 25c. Net proceeds of the game will be divided equally between the two schools.

Some of the Walled Lake parents may have wondered why the menus for the hot lunch for the week should appear in the paper. This is for the benefit of those mothers who wish to avoid duplication in the lunches which they send to school. The menus may be clipped from the paper and kept in some convenient place for ready reference. For the week of January 15-20 we are serving the following:

Monday: Creamed corn soup, escalloped cabbage, baked potato, cocoa.

Tuesday: Noodle soup, mashed potato, baked apples, milk.

Wednesday: Beef soup, macaroni, cheese and tomato, ice cream, milk.

Thursday: Vegetable soup, Spanish rice, fruit jell-o, cocoa.

Friday: Cream of potato soup, o'Brien potatoes, buttered cabbage, ice cream, milk.

Many parents of young children fear they may lose it. To money to school with their children for fear they may lose it. To solve this problem some of the older brothers or sisters bring the money and buy the tickets on which the younger child's name is written in it. It is then left in the lunch room. This eliminates the likelihood of loss of either money or tickets.

MICHIGAN WOMEN
GIVEN VAIL MEDAL

TWO TELEPHONE OPERATORS
ARE CITED FOR OUTSTANDING
ACTS OF PUBLIC SERVICE

Two Michigan telephone women have been awarded the Theodore N. Vail medal in recognition of outstanding acts of public service during 1933. It is announced by Burch Forsaker, president of the Michigan Bell Telephone Company and chairman of the Michigan Committee of Vail Medal Awards. They are Olive M. Martin, chief operator of the Elmira Telephone Company, a small company operating at Elmira, near Petoskey, and Mrs. Eleanor Purdy, 7446 East Ferry street, Detroit, who was an operator in the employ of the Michigan Bell Company in the exchange at Centerline until she left the service last fall.

Both are cited by the committees for initiative, good judgment and prompt action in an emergency. Miss Martin summoned outside help when her village was threatened with fire, and Mrs. Purdy was instrumental in saving the life of a Coeuraine telephone subscriber who had been overcome by fumes from a heater.

Awards of the medal are made under a fund created thirteen years ago in memory of Theodore N. Vail, formerly president of the American Telephone & Telegraph Company, whose life-work was devoted to the development of universal telephone service and who incited into the Bell System many of its high ideals of service. All telephone men and women, regardless of company affiliation, are eligible to receive the Vail medal for the performance of acts of outstanding merit. Since the establishment of the fund, 54 Michigan people have been awarded the medal, 49 of them employees of the Michigan Bell Company and

DOG OWNERS MUST
BUY TAGS IN OWN
GOVERNING UNIT

Attention of owners of dogs in Farmington Township and City is called to the new circumstances surrounding the issuance of dog licenses this year, due to the action of Farmington City in setting up a system of collecting its own dog tax.

Heretofore, owners of dogs in either the Township or City could apply to either the township or city treasurer and obtain the dog license, because both treasurers collected for the County. Now, however, with Farmington City issuing its own tags, the two license-issuing facilities are entirely separate and distinct.

Farmington City dog-owners must obtain licenses for their pets from the City Treasurer, L. C. Thayer. No other license is necessary and no other issue will take its place. County licenses will not be valid for dogs owned within the City.

On the other hand, owners of dogs in Farmington or any other township cannot obtain licenses from Mr. Thayer, as he issues City of Farmington tags only. Township dog-owners should apply to Mrs. Loretta Cox, Township Treasurer.

In the past the two treasurers have both accommodated dog-owners of either Township and City, regardless of where the owner lived. Now, however, Mr. Thayer can issue only City licenses, and Mrs. Cox issues licenses for dogs owned in Oakland County outside the City of Farmington.

Farmington May Be
Homestead Plan Site

(Continued from page one)

In the event of a refund, only two have been actually authorized.

May Be Test Area
Mr. Durbin believes that the Farmington location is so advantageous and his plan will be so complete that he will obtain the approval of Washington as the initial experiment in the Detroit area. It is believed that the Government will decide on one project for each of the industrial areas in the country for observation and a test-measure.

The Farmington site is considered ideal by Mr. Durbin because it is within 20 miles of both west and east side Detroit industries and within 12 miles of Pontiac, thus being quickly accessible to practically every industrial plant in the Detroit area. The soil also has been shown by tests to be of high fertility, and there is not a single acre of waste land.

Among other advantages, Mr. Durbin lists the fact that there is a school immediately adjacent to the site, which is also adjacent to three paved highways to Detroit and Pontiac, that there is a shopping center within three miles that it is almost equidistant from both east and west side Detroit industries, that electricity and gas are available at once, and that many individuals have been ed nearby upon garden and home projects of three to six acres in recent years with marked success.

Would Cost \$4,000 Each
Mr. Durbin stated that the 640 acres is obtainable at a net cost of \$100 per acre. He estimates the costs of building homes to be about \$3,000 each, about \$1,800 for the lot, and \$1,200 for the labor. Other costs would bring the total to \$4,000 each. In all, 210 families could be accommodated leaving 10 acres for a park. If the entire plot was occupied, the project would reach a total cost of \$867,000.

All of the funds are to be furnished by the Federal Government. Mr. Durbin is to be loaned to the prospective home-owners according to the Washington plan. However, Mr. Durbin would provide for the purchaser furnishing one-quarter of the capital instead of having the Government supply it all. It is indicated that such proposal will gain more ready approval at Washington. The home-buyer could furnish his share either in cash or by doing the work of building himself.

Loans By Corporation
The Government does not loan directly to the home-buyer, but a non-profit corporation must be set up locally to handle the funds. The Government will advance the money to this corporation, which in turn supplies it to the home-purchaser.

The Government sets the interest figure at 4 per cent, with a suggested additional percentage for the management costs. It is believed that 1 per cent would provide for a paid manager after the project had reached a fair size. The principal is to be repaid by the home-buyer within 75 years.

Mr. Durbin presented the plan briefly to the Exchange Club, and President Earl Gosvior appointed a committee to consider the matter, consisting of Howard Warner, Lloyd S. Gullen and Hyman Levinson.

'GUSHER' BROUGHT
IN ON BLANCHARD
FARM—BUT WATER

A "gusher" has been struck in Farmington Township, and if it was oil instead of water, Ernest V. Blanchard would probably be a millionaire in short order. But even the gusher of water is making him a mighty satisfied man. He has the fastest-producing well in this section, a flow of water sufficient to supply the needs of the entire city of Farmington.

The "gusher" was brought in after six weeks of work on the Blanchard farm on Grand River near Halsted Road. A check-up showed that the flow of water is at the astonishing rate of 8,000 barrels a day.

When the well was brought in, the pressure was so great that the water gushing out at that height. It was estimated the well would raise the water to a height of 29 feet above the ground. For several days water flowed at full force out of the end of a three inch pipe, drenching the hills and low ground on the east end of the farm.

The well was brought in by Layman Bros. of Keego Harbor, who said it has the largest capacity of any well they have drilled in this State. Although the well would flow at the full capacity of three-inch pipe, probably indefinitely, Mr. Blanchard has no use for this quantity of water and will reduce the pipe to a 1½ inch size and use the water in the barn.

BANK RECEIVER'S
CAR SMASHED ON
GRAND RIVER ROAD

Howard C. Knickerbocker, Receiver of Farmington State Savings Bank, and Mrs. Knickerbocker narrowly escaped serious injury Monday night when the car in which they were riding home from Farmington was struck and turned around twice by another machine.

Mr. and Mrs. Knickerbocker were going east on Grand River about 11:30 p. m. They were just passing Middle Belt Road when a car came northward over the sharp rise in Middle Belt Road a few feet south of Grand River. The northbound car, driven by W. G. Sprague, 55, of Ortonville, was travelling at a good rate of speed.

Sprague's machine struck the Knickerbocker car in the right rear wheel. The pavement was slightly slippery and the car slid instead of turning over. It stopped some distance down the road after making two complete turns.

The front end of Sprague's car was badly smashed. No charges have been filed against the Ortonville man, who promised to pay for the damage to the Knickerbocker machine, estimated at \$125.00.

ED WYNN AT THE CHIEF

OPINION OUTLINES
TWO METHODS OF
BOND REFUNDING

Farmington City should have no difficulty in refunding water bonds outstanding which are now due and soon to become due, with interest payments also owing, it appears from an opinion prepared for the City Commission by Schulte and Pore, attorneys. The question has arisen through requests of the holder of \$9,000 in city water bonds for payment of interest due last August. Principal on \$3,000 of the bonds was also due last August.

In their opinion, the attorneys point out that there are two ways of refunding the bonds permitted by legislative act of 1932. The method permits refunding over a period not to exceed 40 years from the original issue, and another for refunding over not more than 15 years. Arrangements must be approved by the Public Debt Commission at Lansing.

One of the chief questions was as to whether the interest overdue could be refunded and the attorneys, while stating that the statute does not specifically cover this point, offer the opinion that the past due interest can be included in the new refunding operations.
