

INSTALLED AT OUR EXPENSE REMOVED AT OUR EXPENSE ★ Try an Electric Range in YOUR OWN KITCHEN

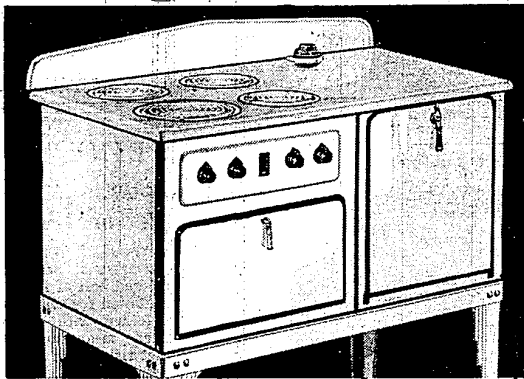

THERE is no catch to this offer... there are no strings whatever. The only way we can prove to your satisfaction that electric cooking is what you want is to let you try it for yourself. We want you to enjoy electric cooking in YOUR OWN KITCHEN—to learn at first hand how much you like it. To make this easy for you we will install an electric range without initial charge, and let you use it for six months, removing it without charge if you do not like it.

During the trial period, you pay for the service as registered by your meter, plus a monthly charge of \$1 for the range. If

you decide to keep the range, your monthly payments will be applied toward the purchase price. If you decide that you do not want it, the range will be removed at our expense.

We want you to discover in how many ways electric cooking is better. We know that it is NOT EXPENSIVE—we want you to prove it for yourself from your electric bills. All you have to do is to ask us to put a range in your kitchen—we do the rest.

Applications for ranges on trial installations will be taken care of in the order they are received. Call any Detroit Edison office.

Enjoy These Advantages of Electric Cooking!

- **CLEAN.** Electric heat is as clean as sunlight. There is no smoke or soot to soil kitchen walls and curtains. Cooking utensils remain bright and shiny after long use.
- **HEALTHFUL.** Electric cooking seals in nourishing juices and natural elements in meats and vegetables. Important food values are retained.
- **WATERLESS COOKING.** With your electric range you use no water for roasts and only half-a-cup for vegetables.
- **MODERN.** In attractive and striking designs, these electric

- ranges do much to brighten and add a feeling of newness to your entire kitchen.
- **FULL FLAVORED.** Electric cooking has a deliciously different flavor—a natural flavor in foods. Meats and vegetables cook to melting tenderness in their own juices.
- **INEXPENSIVE.** Electric cooking costs less than a cent a meal per person.
- **SAFE.** An electric range supplies only pure heat from a glowing wire—there is no flame, no matches, no fumes.

A study of one thousand families using the electric range showed a cooking cost of

Mrs. Edward Stromoski in Northville.

Mr. and Mrs. James Eastman entertained the Scotch Eight 500 club last Friday evening in their home.

Mr. and Mrs. Frank Gould gave a farewell dinner Sunday in honor of their son and family Mr. and Mrs. Newton Gould, who leaves Wednesday for Florida. Mr. and Mrs. John DeBore, Annette and Jackie of Detroit were also present.

Mrs. Tom Granger two sons, Ted and Bob of Detroit were guests Monday of her parents, Mr. and Mrs. Wm. Woodley.

LILY PONS PLAYS IN CHORAL UNION SERIES AT ANN ARBOR

Lily Pons, the diminutive spectacular French operatic soprano, who for three years has been the stellar attraction of the Metropolitan Opera House in New York, will be heard in the Choral Union series, in Hill Auditorium, Ann Arbor, Monday, January 29, in a recital of songs. This will constitute her second Ann Arbor appearance. Three years ago shortly after she made her astounding successful debut at the Metropolitan Opera House, she was prevailed upon to remain in this country in order that she might make her Festival debut at Ann Arbor, where she received an ovation. In order to appear in Ann Arbor at that occasion, it was necessary for her to forego a return trip to Europe and to delay her sailing for South America where she was billed for twenty-operative appearances at the Colon Theatre where she is said to have received \$4000 net.

Miss Pons is petite in stature, exceedingly attractive in stage presence and personality to arouse the artistic sensibilities of her audiences. Everywhere she is always a prime favorite and her coming Ann Arbor concert will constitute one of the seasons outstanding musical presentations.

A limited number of tickets are still available for this concert at \$1.00, \$1.50 and \$2.00 each and may be secured by forwarding remittance to Charles A. Sink, President of the School of Music.

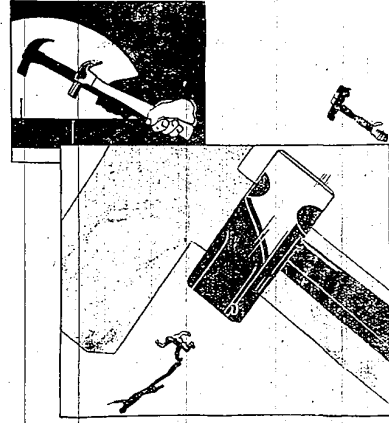

Raccoons Like Oysters

Eggs and shellfish are especially relished by the raccoon and this animal has developed great skill in opening oyster shells and scooping out every particle of the flesh contained therein.

STOPPING CAR LIKE DRIVING NAIL, AS DAMAGE DEPENDS UPON BLOW

Let Hammer Accidentally Hit One's Thumb. Lightly; Then With Resounding Whack, and Full Import of Speed Danger Will Be Appreciated

It is not the force equivalent to the weight of the hammer, but the force which comes into existence when the hammer is stopped that drives the nail into wood. A simple thing, easily understood. It is not the force equivalent to the weight of an automobile, but the force which comes into existence when the automobile is stopped that causes personal injury and damage to property.

The harder the hammer strikes a nail the quicker it penetrates wood. The faster a moving automobile strikes an object or person the greater the damage and more serious the injury. Let a hammer accidentally hit one's thumb, lightly, then with a resounding whack, and the full import of the danger of increasing rates of speed will be appreciated.

Accidents More Serious
Statistics of the causes of automobile accidents throughout the United States in 1932 and their consequences compiled by The Travelers Insurance Company show that although cars last year were not in collision with other cars and pedestrians as frequently as in 1931, the consequences of the collisions which did occur were relatively more serious.

The decrease in deaths from automobile accidents last year was not as great as the percentage drop in accidents. This fact is brought out by the detailed records of important states having more than a third of the country's total population. The latest experience shows for 1932 an increase of 1.3 per cent in deaths per accident, an increase of 2.2 per cent in

injuries per accident, and an increase of 2.4 per cent in deaths and non-fatal injuries per accident.

Speed A Vita Factor
Other figures show how increased speed causes more severe accidents. Of the non-fatal injuries, fractures, contusions and internal injuries suffered by automobile accident victims in 1932 accounted for a larger percentage of all non-fatal injuries than in 1931. Of all the accidents due to improper acts of drivers a fourth resulted from excessive speed. The deaths from such accidents were more than a third of all the fatalities for which acts of drivers were either wholly or in part responsible.

It is speed, still more speed and then greater speed which under many traffic circumstances is the all-important factor which too many drivers fail to keep under control. Speed may be dangerous at 20, 25 or 30 miles an hour, just as it is potentially dangerous at 50, 60 and 70 miles an hour. High rates of speed are hazardous under most conditions of travel. Relatively low rates of speed prove to be hazardous also when they are maintained under improper conditions.
