PROGRAM WELL RECEIVED
A large crowd enjoyed the musical program at the Universalist Church Sunday afternoon. Bill Hitter's Dearborn ensemble in cooperation with local talent gave instrumental and vocal numbers. Tea was served during intermission by ladies of the church. The program was well received.

Starting of Word "Tank"

The same tank was first used in December, 1915, as a blind to conceal the true nature of the experimental fighting machine then being secretly constructed in England. After the first appearance of the machine in the field the name was retained.

First Use of Razors

Razors were in use at a very early period and known to the people of Egypt. They used a primitive form of razor, in many cases merely a sharpened flint. The first safety razor was made by Michael Thimble of Sheffield, England, in 1875.

Smartness . . .

May seem to have little to do with a pair of glasses. But it is true that the glasses you wear have a great deal to do with your appearance. Many are inappropriate, and do not do justice to you.

Rightly-selected FUL-VUES will make you look your very best.

MICHIGAN BELL TELEPHONE CO.

ANNE:

"Since we had our telephone put back in, Jo, we've had so many more good times. It seems that someone calls almost every day to invite us to something. I keep in touch with Mother, and Bob calls every noon from the office. No more lonesome days now, Jo!"

JOAN:

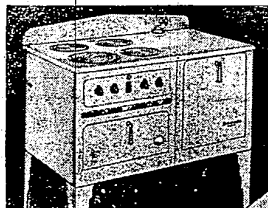

"Yes, Anne, there's all that and more. I do my shopping by telephone in bad weather, and John often has business calls at home in the evening. I feel so safe, too, with a telephone, for you never know when you're going to need a doctor, or the firemen or police right away."

COOKING UTENSILS REMAIN

CLEAN on your
Electric Range after
LONG USE

PROVE IT FOR YOURSELF
★ ON ONE OF THESE

POTS and pans used on an electric range are as easy to wash as any china dish—even after long use. You do not have to scour utensils after each cooking operation and there is no caking of grease to discolor them. An electric range cooks with pure, concentrated heat—without flame or smoke or soot. There are no products of combustion as in a fuel-burning stove—nothing to blacken pots and pans or soil kitchen walls and curtains. An electric range supplies only PURE HEAT from a glowing wire. Electric heat is as clean as sunlight.

★ We want you to try electric cooking in your own kitchen—without making any investment or being under any obligation. So we have arranged a special trial offer. We will install an electric range in your kitchen without initial charge, and let

TRIAL
ELECTRIC
RANGES

you use it for six months, removing without charge if you do not like it. During the trial period, you pay for the service as registered by your meter, plus a monthly charge of \$1 for the range. If you decide to keep the range, your monthly payments will be applied toward the purchase price. If you decide that you do not want it, the range will be removed at our expense.

Since this trial plan was begun a short time ago, over 1500 of our customers have taken advantage of the offer. Send in your application for a trial range today!

THE DETROIT EDISON CO.

A study of one thousand families using the electric range showed a cooking cost of
