When your furnace fire goes out for the summer

HOW WILL YOU GET

Hot Water?

Hot water is indispensable for a dozen daily tasks - and with summer almost here, the furnace no longer supplies this needed convenience. Are you obliged to heat water on the stove or run up and down stairs to light a manually-operated tank? End this annovance and waste of timeinstall automatic electric hot water service in your home!

A new low rate is being offered for water heating. This is a flat annual rate for year 'round service. You can enjoy automatic

electric hot water service for as little as \$2.34 a month. You may buy or rent an electric water heater, whichever you choose. Rental rates are low, and if you prefer to buy the heater, convenient monthly terms may be arranged.

With an automatic electric heater, you are assured an abundant and constant supply of water, steaming hot, at a turn of the faucet. Day and night, summer and winter, you have hot water instantly when you need it-for bath and for shower, for shaving, for washing dishes, for the laundry, for housecleaning. There is no waiting, no inconvenience. And you do not need to depend

> on a furnace coil for hot water, which -contrary to general belief-is an expensive method of heating water, due to the coal burned in the process.
