"TRY IT YOURSELF
MR. HUSBAND!"

You try doing the housework with a lot of cold, clammy water. You try fooling around waiting for water to heat—depending on furnace coils after furnace weather (do you know how much fuel they waste in the winter, too?)

DO HUSBANDS KNOW?

Husbands know what comfort there is in an ever-ready supply of hot water for shaving and the bath at any and all hours. But most husbands don't realize what such hot water means in running the home. Instant hot water for the dishes, for baby's bath, for the laundry, for hurrying cooking, for housecleaning, for the hundred and one things that are a regular part of every woman's busy day.
