

Detroit Wins Second Game In Series; 3-2

(Continued from Page One)
to Rothrock in deep right center. Gosselin fled to Rothrock and with the count three and two and Regell at bat, Gehring stole second. Regell then walked. Owen fled to Orsatti in left. No runs, no hits, no errors.

ELEVENTH INNING
ST. LOUIS. Walker fanned. Martin doubled to left center. Rowe fanned Rothrock and Frisch grounded out, Gehring to Greenberg. No runs, one hit, no errors.

DETROIT. Fox fouled to Collins. Rowe struck out swinging for the fourth time. Doljack, playing center field for Detroit, fouled to Collins. No runs, no hits, no errors.

TWELFTH INNING
ST. LOUIS. Medwick grounded out, Gehring to Greenberg. Collins was out on a fly to Doljack in deep center field. Delancey fanned. No runs, no hits, no errors.

DETROIT. Cochrane was out. Durocher to Collins. Gehring singled to left, scoring Gehring with the winning run. One run, one hit, no errors.

Always Busy
Life has a way of evening things. For every woman who makes a fool out of some man there's another who makes a man out of some fool.

BIRTHDAY PARTY PLANNED FOR MAN DEAD SINCE 1915

During this week, tuberculosis associations and sanatoriums in Michigan have been asked to stage the strangest birthday party in the world—one at which the guest of honor will not be present.

Friday is the eighty-sixth anniversary of the birth of Dr. Edward Livingston Trudeau, who built the first sanatorium for the treatment of tuberculosis in the United States, fifty years ago.

The 1934 tuberculosis Christmas seal, which finances the work of the Michigan Tuberculosis Association and its affiliated societies in this state, carries a picture of that first sanatorium, the "Little Red," built at Saranac Lake in New York's Adirondack mountains.

When still a young man, with a promising career as a physician before him, Dr. Trudeau was told he had "consumption"—in those days a death sentence. He went to the Adirondacks with the intention of dying among the woods and mountains he loved, but while there he discovered the still-used principle of tuberculosis treatment—rest, fresh air and good food.

He died in 1915, sixty-seven years after he was told that he had but a few months!

The Woman's Auxiliary of the American Legion had installation of officers Tuesday night. Officers installed were president, Mrs. Carl Hogle; vice president, Mrs. Homer Eisenlord; second vice president, Mrs. Elma Elkin; secretary, Mrs. Dorothy Smith; treasurer, Mrs. Beatrice Carpenter; chaplain, Mrs. Stella Tammi; sergeant-at-arms, Mrs. Joseph Devriendt; historian, Mrs. Minnie Hogle. A chicken dinner was served and after the installation cards and buncos were played. Guests from Pontiac were Norma Crawford, 17th District committee woman, and Maud Keller, District secretary.

"Growing Pains"

Those vague, ambiguous pains in children which are popularly known as "growing pains" are entirely misnamed. Such pains are probably associated with rheumatism, according to Jacob, who first clearly saw the clinical relationship between growing pains and articular rheumatism and even endocarditis. The medical scientist noted that uncomplicated muscular rheumatism is rare in young children, and at that time he wrote: "Growing pains" are not infrequently inflammatory rheumatism, and endocarditis of later years may be traced back to the growing pains which are but dimly remembered.—Cleveland Plain Dealer.

One of the world's largest coal pockets is at Fushun, Manchuria.

Another Man's Wife

By SHIRLEY DENTON

By McClure Newspaper Syndicate

© 1934 Service

CAREY BURTON knew when he received that invitation to have dinner with his sister and her husband that something was in the wind.

"And when she promises my favorite fried chicken and mushrooms—well, little brother knows his leg is going to be pulled in some way."

"Little brother was quite right. It was just following his second helping. A large, fat drumstick, that Betty said sweetly:

"You know, Carey, Sam and I are going off again to France and—"

"Oh, that's it, and I am to have that information rather of replying the apartment for you. The scramble last time was like an Irish meeting, and I spent three whole days dashing from the office to the apartment with an assortment of apartment seekers."

"You're the first edition of the apartment hunter's guide," laughed Sam. "I guess we'd better ask \$100 a month and there won't be such a riot."

But Carey, resigned, put the advertisement in the daily papers and his own office address and telephone, made the inventory, saw Sam and Betty off and awaited the rush.

There were two inquiries before he reached the office, and along they came until Carey was quite fed up. It was the voice of John Wilson over the phone, however, that prompted Carey to sense the right tenant.

"If that apartment's the right thing," said Wilson, "I'll send my check."

Mrs. Wilson is coming to all the way from Easthampton, hoping we can secure it, and said she'd be there about twelve."

So it happened that Carey waited the arrival of Mrs. Wilson. Of course, he had not thought she would be such a charming woman. But she certainly seemed charming when she stood poised in the doorway with an intriguing look in her big dark eyes.

This was the moment for which Carey blessed his sister for asking his assistance in renting the apartment.

"What a lovely apartment," she exclaimed, "and a good view of the Hudson. Oh, dear, I do hope Mr. Wilson told you how very much we want it."

She turned imploring eyes on Carey and he felt bewildered by their brilliance.

Carey laughed and remembered telling her that Mr. Wilson had all but settled it for her.

"Since you and your husband seem destined to have drawn the keys from the multitude, why not take the keys for good?"

A curious smile crinkled the fair one's eyes.

"But won't your wife want to—well—look us over, too?"

"My sister," corrected Carey, "is on the high seas."

"Oh," commented the lady. Having got the information, she seemed more animated. "Is there any way we could get in touch with you this evening—should any questions come up which we might want to ask you about?"

Carey gave her his card and telephone number.

After a moment or two longer he had to watch her vanish into the subway.

The rest of the afternoon seemed both short and long. Always through Carey's brain kept running, "Thou shalt not covet thy neighbor's wife," but that didn't prevent his heart losing a beat at the very remembrance of her loveliness each time the telephone rang.

He hoped against hope that some information would be in demand about the apartment but it was not until after five that Wilson rang him up.

"I say, old chap," said Wilson, "my wife is tremendously taken with the apartment and wants to celebrate. We wonder if you'd waive convention and join us at dinner and show them the place?"

Wilson is along and it will just make a foursome."

Thus it was that Carey, armed with two of the delectable, tiny oysters he could secure, met Mr. Wilson, his wife and sister and started off.

Carey was about to tuck the sister, as he supposed, under his protective wing, when Wilson stopped him with a laugh.

"Mrs. Wilson and I have been married five years, but I still prefer to take charge of her—rather than let the other fellow do it."

"Oh, I say," laughed Carey with a flush where the secret of his love for the apartment was more joyous than apologetic, "I supposed," he looked indifferently at that wonder woman who was not his neighbor's wife, "in fact, I was led to believe—"

"It was your own mistake," said Miss Wilson demurely. "I only speak of my brother as Mr. Wilson, which is quite correct—when addressing a perfect stranger."

"I am glad you think me perfect," confided Carey, "because the feeling is mutual and we can soon forget the stranger part—can't we?"

The other two had gone ahead and the girl tucked her arm around Carey's. "Oh, perhaps it can be done in time," she agreed flippantly.

Lionsome Spot
Friend—Don't you wonder, tomorrow when you give your speech you will have all intelligent men on your side.

Candidate for Parliament—That is what is worrying me. I would rather have the majority—Lustige Blatter, Berlin.

Georgian Bay Islands

Georgian Bay, with its 20,000 islands, is that northern section of Lake Huron which is the waterway between Owen Sound, Midland, Peterborough and Parry sound at the eastern extremity and the St. Lawrence river at the western end, touching en route at many fishing resorts on the north shore of Georgian Bay and Manitoulin Island. The 60-mile stretch between Midland and Parry sound at the eastern end contains the archipelago of 10,000 islands situated in the "inside channel."

WANT-AD COLUMN

RATES: Cash, 15 cents per word minimum 35c. Fifteen cents per line. Copy must be in by Thursday noon. Phone 25-2.

Pro. 1000—The being a rich source of protein, vitamins, carotene which in the body of an animal produces vitamin A. This vitamin promotes growth in farm stock as well as human beings, and enables them to resist disease.

The site of Salt Lake City first was seen by fur trappers, but the city was founded and grew through the efforts of the Mormons, under leadership of Brigham Young. These ardent workers founded the University of Utah and erected buildings which still grace what is now the state capital.

Steady Drive for Greater Safety Reduces Major Accidents by 90%

First aid instruction and equipment, as well as safety training and supervision, have contributed to a sharp reduction in serious accidents in Bell Telephone plant employees by more than 90%. Above: Types of first aid kits. Right: Immediate attention prevents infection.

Accidents resulting in loss of working time among plant employees of the Bell Telephone System have decreased to 5.6¢ per year for each 1,000 employees, as compared with 60.1¢ for the same number of men 10 years ago.

Many Factors Aid In Program
This great reduction in serious accidents has been brought about by constant safety practice instruction, improved supervision, better trained workers, safer tools and equipment, and standardized first aid training and first aid supplies.

First aid materials are provided for minimizing the seriousness of accidents when they do occur, either by providing for the treatment of minor accidents or, in the case of more serious accidents, by providing temporary relief until a physician can be reached.

Safety Training Includes First Aid
In the Bell System, the medical director prescribes the formulas and first aid treatments that are in use. The development engineers specify how the materials shall be packaged and labeled to meet the requirements of the telephone personnel.

In specifying the variety and quantity of materials provided, the kinds of accidents most frequently encountered with various types of work and the number of people that must be provided for are considered.

For example, a man working alone on certain kinds of jobs has a first aid kit about the size of an ordinary deck of playing cards, which fits conveniently in his pocket. This contains the most used materials, such as iodine swabs for sterilizing minor wounds, one inch and two inch compresses, carbolated potassium, and ammonia inhalants.

All Crows Carry Kits
Larger boxes, designed for light construction and maintenance crews, carry additional compresses and bandages, and when field requirements warrant it they also provide tubes of petroleum jelly.

The largest kit in the outside telephone plant is designed for the heavy construction crews and is stocked with a complete stock containing not only all the items of the smaller boxes, but also a tourniquet, wire splints, scissors and tweezers.

Cabinets Are Well Stocked
For inside plant or central office use, an emergency wall cabinet of sheet metal construction is specified. This contains, in addition to the most commonly used materials of the portable kits, such other items as might be found in the wall stocked family medicine cabinet.

These include relief remedies for minor ailments, as well as other often used items, such as absorbent cotton, adhesive tape and a hot water bottle.

Don't Go Through Another Winter With That Wasteful FURNACE COIL

Many women tolerate the bother and inadequate supply of warmed water from various makeshift means in summer because they believe their furnace coil gives them FREE hot water in winter. This is an expensive notion because engineering tests show one out of every five shovelfuls of fuel burned in a coil-equipped furnace is used to heat the coil. What is 20% of your winter's fuel bill? Can you afford "coil-heated" water?
