### CHEVROLET ADDS FOUR-DOOR FIVE PASSENGER SEDAN

For the first time since Chevrolet added the Standard six in 1933, a four-door five-passenger sedan is now included in its lower priced line. In announcing the new model as an addition to the 1934 Standards, Chevrolet Motor Company declares it to be the lowest priced four-door sedan in the field of sixes and eights. Its list price is \$540, or \$410 under the Master four-door sedan.

The major new feature in styling is the treatment of the rear end, where the body panels extend low in an unbroken contour to cover the back of the chassis. This construction does away with the rear cross-member cover, and provides a smooth, sweeping effect. The rear tire carrier and the rear bumper supports extend through openings in the body panel, as does the gasoline tank filler-neck.

Comfort for rear seat passengers is improved by provision for extra leg room, the back of the front seat being deeply recessed, giving plenty of space for a full foot rest. Maximum elbow room is obtained by means of deep recesses in the sides of the body above large arm rests. A capacious pocket on the back of the front seat is an added convenience. Upholstery is of mohair.

material of a new shade and texture, set off by harmonizing headlining.

Equipment features include an adjustable sun-shade at the driver's seat, button type latches for locking all doors, dome light, and rear-window curtain. The front doors are equipped with no-draft vent-panels, fitted with exterior rain shields.

### THIS TRIAL PLAN!

Have you heard friends or neighbors talking about the advantages of an electric range, and wondered if you could afford one? Is the question uppermost in your mind the subject of cooking cost? Have you deferred buying a range for this reason? Here is the answer to your problem:

You do not need to guess at the cost of cooking electrically. You do not need to take any one's word for it. You can find out definitely for yourself without buying a range or making a penny's investment. We will let you use a range in your own kitchen, and you are under no obligation whatever.

The plan briefly is this: We will install an electric range in your kitchen without initial charge, and let you use it for six months, removing it without charge if you do not like it. During this trial period, you pay for the service as registered by your meter, plus a monthly charge of \$1 for the range. If you decide to keep the range, your monthly payments will be applied toward the purchase price. If you decide that you do not want it, the range will be removed at our expense.

Since this trial plan was begun a short time ago, over four thousand of our customers have taken advantage of this offer. Send in your application for a trial range today!

A study of one thousand families using an electric range showed a cooking cost of less than 1 cent a meal per person.
