## Discovered Quinine

The Indians of Peru used and introduced it to the Jesuit priests. Between 1629 and 1633, the Countess of Chinchon, vice queen of Peru, lay ill of a fever. She was cured by a brew made from the bark of the plant, and sent a quantity to Spain for experimentation. Hence, it has spread throughout the world.

## Michigan Bell Officials Move Up

Burch Foraker, right, president of the Michigan Bell Telephone Company since 1926 and one of the outstanding figures in the Bell System, has been advanced to chairman of the Board of Directors. G. M. Welch, left, who has been vice president and general manager, has been elected to succeed Mr. Foraker as president. Mr. Welch joined the Michigan Bell organization in 1905. Both have risen from the ranks.

## A Platoon School

A platoon school is an elementary school organized in a program of studies so arranged that the divisions alternate in using the two kinds of school rooms, as class and study rooms on the one hand, and shop, laboratories, auditoriums and gymnasium on the other, and thus fully utilize the physical resources of the school plant.

## Honor Town's Heroes

Inhabitants of the French Village of Beaulieu have a special holiday each year to honor the memory of the town's heroine, Jeanne Hechette, the local Joan of Arc. It was Jeanne who saved the small city centuries ago when it was besieged.

## Millions in House Boats

Because of over population in China, the land as far as possible must be used to grow the necessities of life and thus millions of people are forced to live in house boats on the various rivers.

## Silk Stronger Than Steel

The silky threads with which a spider spins its web are about a hundred times finer than human hair. It is said that a piece of steel of the same thickness is not nearly so strong as the spider's thread. These threads can resist strong winds.

## Farming Is Systematic

Members of a tribe discovered by the Australian government in the interior of New Guinea cultivate their land in a series of square plots, systematically arranged, with channels for irrigation between the plots.
