Motorist Closes Deer At 35 Miles an Hour

How fast can a deer run? This is a moot question, but in Michigan's Houghton Lake State forest there is a whitetailed deer that can do as much as 35 miles an hour.

The deer, which was a large buck with antlers in the velvet, was clocked by I. H. Bartlett of the Game Division, Department of Conservation, over a stretch of road a half-mile in length.

Bartlett had jumped the buck unexpectedly as he was driving at a moderate speed along the road. Instead of braking off into the woods the buck fled ahead of the car and alongside of the road.

Accelerating gradually, Bartlett tried to pass the deer, but it kept abreast of the car for approximately a half-mile at a speed of 35 miles an hour, then swerved off suddenly and disappeared into the woods.

Several years ago Martin R. Webb of the Game Division clocked a deer in a quarter-mile stretch in the Molokan river district at a speed of 41 miles an hour. The deer finally made a spur and crossed the road 20 feet ahead of the car at which time Webb estimated its speed at about 43 miles an hour.

Ernest Thompson Seton, widely-known naturalist, has estimated that deer can run at an average speed of 25 miles an hour for not over three miles.

Fish and Game License Sale Reaches New High

The year of 1934 established three new records in the sale of Michigan fish and game licenses. Although all returns have not yet been received from license agents, the reports on hand show that more small-game hunting licenses, more fishing licenses and more deer-hunting licenses were sold during the past year than ever before.

The number of deer-hunting licenses tabulated by the Department of Conservation for the fall of 1934 is 79,173. This figure is well over the previous high total of sales, 70,329 which was made in 1930.

Small-game hunting licenses sold have reached a total so far of 341,553. The previous high record was for 1929 and 1930 which was 332,000.

The decoloration of wood by sap-staining fungi can be avoided by simple, inexpensive treatments developed by Government scientists and southern lumbermen.

12 Year Old Pike Hooked in Muskegon

John L. Richards of 440 Lyon street N. E., Grand Rapids, has learned that a walleyed pike which he took from the Muskegon river June 12, was about 12 years old.

Richards caught the pike while casting with an artificial pike minnow above Hardy dam. It weighed 12½ pounds, measured 34 inches in length and 18 inches in girth.

Scale examples were sent by Richards to the Fisheries Division, Department of Conservation, and forwarded to the Institute for Fisheries Research at Ann Arbor for examination. Gerald P. Cooper, forage fish investigator of the Insti-

tute, reported as follows: "The examination of the scales which you enclosed revealed that this fish was definitely either 11 or 12 years old, probably 12. Scales of such large and old fish are very thick and difficult to examine, thus a determination of the age of such a fish is somewhat more uncertain than that of a younger fish."

Trachoma is so rare in Switzerland that it has been suggested high altitudes prevent this eye disease, but this is disproved by presence of the disease at various altitudes in the American Rockies.

Cook ANYTHING you LIKE in DUTCH OVEN SUSAN

There is almost no limit to the good things you can cook with Dutch Oven Susan. Here is the most complete cooking appliance of its kind on the market. It will do every cooking operation possible on a small stove. It will roast all cuts of meat to perfection. It will fry eggs, steaks, chops, etc. It will bake cakes, pies, cookies, biscuits and muffins and it will hold half-a-dozen pint jars when canning by the cold pack, hot water bath method. You simply plug it into any convenience outlet, and it uses only about as much electricity per hour as an electric toaster. And Dutch Oven Susan is so compact that it can be tucked away in a corner almost anywhere.

You can put a complete meal for a family of six—two vegetables, a roast, potatoes and gravy—in the cooker, and go out for the afternoon. When you come home your dinner is waiting, perfectly cooked—piping hot and ready for the table.

Dutch Oven Susan is available in several styles and sizes to fit your needs exactly. The medium size model will roast a 10-pound ham, a 6-pound chicken, or a large leg of lamb. The large size will easily accommodate a 15½-pound turkey. And there is "Small Sister" Susan, an electric casserole, with a two-quart capacity. See this modern appliance on display at Detroit Edison offices, Department Stores, and Electrical Dealers.
