

Popular Ford Features Retained in New V-8

Few changes have been made in the 1936 Ford V-8. The main features which have contributed to the popularity of the 1935 Ford V-8 have been carried over, unaltered, to the new models. Chief among these is the 85 horse power, 8 cylinder motor.

The alterations are found in the length, treatment of interiors, and in chassis engineering. The combination of a longer wheel-base and a few changes in the radiator gives to the Ford V-8 distinctive, conservative, streamline effect. The mechanical refinements are designed to improve steering, provide greater riding comfort, and to facilitate the shifting of gears.

See the new Ford at Olin Russell, Inc., and arrange for a demonstration.

SCOUT NEWS

TROOP 45
 Under the direction of Scoutmaster Samuelson, last week's meeting of troop 45 was planned to allow a limited time to each of several projects. First on the program was a ten minute period of songs by Dick Tobin. Following this, twenty minutes were devoted to instruction in various tests. Mr. Hermann had undertaken some work in leathercraft. Likewise, many of the members of the troop started working on projects of their own. The meeting closed with taps and the scout vespers hymn after the boys had played a game.

THE "GAME HOG"

Hunters around the county may differ as to the amount of game to be had this season but they are all agreed upon one thing and that is that the "game hog" still exists. Killing for the mere purpose of bragging about it afterward, the "game hog" has become the lowest of creatures in the estimation of the true sportsman. Covering up his slaughter to escape the law is, of course, a part of his operation. To him can be traced the shortage of game in this country; on his shoulders must rest the blame for poor hunting in so many sections of the state. That the arrest and conviction of a few of his stripe would serve as a most object lesson, everyone agrees, but that is not always possible. The man who is sneaking enough to kill more than his share of legal game is also sneaking enough to cover up his violation of the law. Hunters everywhere, however, should be on the lookout for the "game hog." Report his slaughter to the proper authorities.

A man died the other day in a metropolitan city from starvation while he had hundreds of dollars in his pockets. Figure that out, if you can.

The First 8 Pennies

THE TAX Collector, not the railroad, gets the first 8 cents of each \$1.00 you pay for rail freight or fare.

AND, COULD you trace them, about 40 of the remaining 92 cents also ultimately become taxes—local, state and federal—taxes paid by those who supply the railroad with fuel, materials and labor and to whom the railroad pays bond interest and stock dividends (if any) and by those who supply the suppliers of the railroad, etc., etc.

THE RAILROAD pays the highest rate of tax of any agency of transportation. In return it asks nothing in the form of right-of-way publicly supplied and maintained, nor other kind of subsidy. It stands on its own feet—an institution privately maintained and privately operated, yet functioning in the public interest.

THUS WHEN you ship and travel by rail you ease your own tax burden by lending support to the one form of transportation that supports itself and gives most to the support of government.

AND THE freight fee or the fare you pay is the final payment. No "hidden cost" looms later in your tax bill to plague and penalize you for the so-called saving which some subsidized transit agency held out for your patronage.

GIVING BUSINESS to the trucks means giving it to a tax-consumer whose operations only add to our taxes and living costs.

SHIP AND travel by rail and the first 8 cents of your freight or fare dollar will always come back to you as a discount in your tax bill.
