MODERN CARS HAVE MORE LUGGAGE SPACE

Modern automobile bodies, designed primarily for safety, passenger comfort and appearance, possess an additional advantage, over models of fairly recent years, in their capacity to accommodate large amounts of luggage without inconvenience to passengers. The point was brought out by Fred L. Cook, Jr., assistant general sales manager of the Chevrolet Motor Company, during a discussion of the new 1936 cars.

"In the old days," said Mr. Doran, "there was room under the seat cushions for tools. On some cars, tool boxes were provided on the running board, without seriously marring the appearance of the car. Such bulky items as luggage, up until fairly recently, had to be accommodated either on luggage racks, installed on the running board or in the rear, or in trunks, which also were extras.

"With the advent of streamlining, a decided change has taken place. There is no room for tool boxes or luggage carriers on the running board, for the modern car door extends so low that it would not clear, even if considerations of beauty did not prevent their installation. There is no room under the seats, for the new emphasis on comfort calls for deeper cushions, extending almost to the floor.

GREATER SPACE
"Yet, in spite of these restrictions, we find in the modern cars greater space for storing things than ever before. In Chevrolet, for instance, we find the back of the rear seat of sedan models pivoted at the bottom to tilt forward and admit luggage to a large compartment behind it. In the sport sedan models, there is a capacious built-in trunk which not only accommodates a large amount of luggage but is remarkably easy to get at.

"For those who want extra large carrying capacity, the coupe models are ideally designed. They will be a surprise and delight especially to sportsmen, for their rear decks contain enough space to carry a whole camping outfit, including tent, suitcases, and mattresses. In fact, if the hunter does not prefer to advertise his prowess by tacking his deer to the running board, it should be a simple matter to bring it home in this coupe compartment, which has interior dimensions of approximately five by four by two feet.

"If streamlining has done away with some of the luggage accommodation which formerly existed, it has certainly more than compensated by the addition of storage space elsewhere, and with this added space, it has imparted a brand new type of fleet, graceful beauty."

Calendar of Coming Events

FRIDAY, December 6—Boy Scout Council meeting at Methodist Church.

FRIDAY, December 6—Annual bazaar of the Methodist Church.

SUNDAY, December 8—Members of the Salem Evangelical Sunday School will hold their first rehearsal for their Christmas pageant at 11:30.

MONDAY, December 9—P. T. A. of West Farmington will hold their monthly meeting at the school at 7:45. Dr. Monroe of Pontiac will speak on contagion.

MONDAY, DECEMBER 9—Woman's Club meets with the Redford Woman's Club in Redford.

MONDAY, December 9—Farmington Lodge No. 151, F. & A. M. in the Town Hall.

THURSDAY, December 12—Farmington Board of Education meeting.

THURSDAY, December 12—The Golden Rule Circle of the Ladies Aid of the Methodist Church will meet.

TUESDAY, December 17—Ladies of Our Lady of Sorrows Church will give a Sauer Kraut supper in the school auditorium.

WEDNESDAY, DECEMBER 18—Farmington Woman's Club meets for a Christmas party at the home of Mrs. Lenora Gildemeister.

MILK PRODUCTION FALLS AS SALES INCREASE

Milk production of the 12,220 members of the Michigan Milk Producers Association producing milk for the Detroit market, during the month of October, dropped 8.9% compared with September. Compared with production a year ago among the same producers, production is 1/8 or 1% lower.

The interesting thing, however, is that sales during the month increased 1.5% over those of September. This small increase doesn't show up very much in the farmer's milk check, but it is a move in the right direction.

During the month, 52,304,614 pounds of milk was produced for the market. Of this amount, 47,937,662 pounds was paid for at \$2.15 base price delivered Detroit, and 4,366,952 pounds was paid for at 95 cents per cwt, the surplus price at country receiving station. This is the smallest amount of surplus milk that has been produced since February, when there was 3,695,470 pounds of surplus milk shipped.

During October, 34,924,498 pounds of milk was sold in Class I, for which the distributors paid \$2.43 per cwt, with 3.5 cents delivered Detroit. In Class II, 1,473,830 pounds was sold at \$1.47 per cwt, delivered to the city. The balance, 15,906,586 pounds of Class III, was sold for \$1.12 per cwt, at country receiving station. For October, 1934, Class I sales totalled 33,915,809 pounds; Class II sales 2,357,682 pounds; Class III 16,033,899 pounds. Class I sales were 2.97% higher this year during October than a year ago.

It is rather interesting to note the comparison with June when 70,737,573 pounds of milk was produced, compared with 52,304,614 pounds during October. That is a decrease in production of 25.5%. Sales in Class I during June were 32,334,190 pounds compared to 34,924,498 pounds for October, or an increase in sales of 4.5%.

Farmington Boy Breaks Leg in Sled Accident

Billie Carpenter, ten year old Farmington boy, who was out on Shawwassee avenue, became the first victim on the winter sledding casualty list Friday when he broke his leg as he and some of his friends were enjoying the first winter snow. The accident occurred on Parker Hill.

Bill and some of his friends were taking advantage of the Friday holiday from school. One of Bill's playmates didn't have a sled, so Bill generously told his companion to "jump on." As the two were sitting erect on the sled, Bill's lost control, swerved off to the side and finally landed up against a stump.

While the accident occurred Friday, the parents did not realize until Monday that Billie's leg was broken.

He was taken to a hospital in Birmingham, where x-rays revealed that Bill fractured the large bone in his left leg, between the knee and the ankle. His leg is now in a cast, and it will be at least six weeks before the cast can be removed.

Farmington Couple United in Marriage

Mrs. Hazel Whipple and Henry Miner, both of Farmington, were united in marriage Saturday, November 16, in a ceremony performed at Our Lady of Sorrows Church, Rev. John J. Larkin, pastor of the church, read the service.

The bride wore a brown ensemble with brown accessories and a shoulder bouquet of baby mums and rose buds.

Mrs. Edwin Tammy, sister of the bride, sang "Ave Maria," from Mendelssohn. Miss Dorothy Kurz played the wedding march. Following the ceremony a breakfast was served at the home of Mrs. Tammy. The newly married couple left for Chicago for a brief trip.

Both Mr. and Mrs. Miner are members of Our Lady of Sorrows Church. Mrs. Miner moved to Farmington from New Haven, Connecticut.

The New Ford V-8 For 1936 Adds To Its Prestige

The Ford V-8 that led all other cars in 1935 has added to its prestige in its 1936 car. New beauty, new safety, more dependability—that is the new Ford V-8.

Everything has been tried and tested. Its Genuine Steel Body makes for more strength and safety for the motorist. It has Safety Glass—all around at no extra cost. These are only two of the many features.

For the rest of the features come and see Olin Russell, Inc. Make your appointment today.
