Bulgaria is the only country in

At the beginning of the present year, the number of dial telephones in operation throughout the world was estimated at 14,292,270.

On the first of Jahuary, 1935, there was a total of about 33,500,000 telephones in the world, of which approximately 93 per cent could be connected with any Bell System telephone.

Overseas telephone circuits of the American Telephone and Telegraph Company connect with many foreign telephone systems, but in none of these countries does the A. T. & T. Co, own or operate a telephone change.

Montealm County, irritated by disregated of more polite warnings to motorists, has now placed depu-ty sheriffs and patrolmen on county pwA jobs to control recklessness where men are employed repairing roads. Caution flags and signs failed to stop speeding through lanes where men are working.

The effect of safety campaign in Sault Ste. Marie: The first day 274 cars were checked. Treaty-four had defective brakes and 42 defective lights. The second day 285 cars checked showed 11 with defective brakes and 31 defective lights. During the two days 30 drivers were found to be driving without operators licenses.

### A Safe Car Helps To Make A Safe Driver

Safety comes first in the Ford V-8. The Ford was the first low-price car to give you the extra protection of a steel body. It was also the first low-price car to provide Safety Glass throughout (in windows as well as the windshield) at no extra cost.

well as the windshield) at no extra cost.

Any time something new and better is found it is built into the car. Let Olin Russell, Inc. show you that the Ford Motor Company does not experiment with safety. The Super-Safety, Brakes reflect that policy. They are if the long-tested, sureacting mechanical design and they stop the car quickly and with certainty under all driving conditions. Big and powerful, with an unusually large braking area, yet easy to apply.

When the Bell Telephone system untablished the first training course for telephone operators, in January, 1992, in New York City, one of the pioneer steps in vocational training was undertaken. Since thet, vocational training has become with the properties of the properties of the properties of the properties. Learned as Best Tray Could In the early days of the telephone, new operators learned whit the learned without a great feet of teaching. The training the properties of the properties and severe then permitted to listen-in on older operators handling actual calls.

Atter a few days of this, they

Alter a few days of this, they were allowed to bandle calls themselves, with the coaching and assistance of experienced operators beside whom they were seated. Points of such great importance to day as the tone of voice to juse were not even mentioned in those early

First Training Course Established First Training Gourse Established Frinally, the need of a training course became apparent and the first school for operators was established in New York City th January, 1902. By this time the change from the old magneto to the common hattery switchboard had been completed in all the central officers in that city. The establishment of this school marked a real milestone along the road which has led to the great degree of operating efficiency which now characterize the Bell System.

System. The theory on which this operating school was based closely followed that generally accepted in
ducational cricles at the time.
There was a definite capphasis on
classroom work, tof which practice
at the switchboard was
supplemen-

from the switchboard.

Al. The equipment of the school consisted of a room furnished after the manner of an pleal school room, which was and the school room, which was not so that the school room, which was not so that the school room, and an operating. The latter duplicated, as many as passible, the equipment of an actual central office, with a twelve-position switchboard, d. chief operator's desk, and other equipment.

an actual central office, with a twelve-position switchboard, it chief operator's desk, and other equipment.

The routine of the course included presentation, both in the classroom and at the switchboard, of the operator's description to be learned for the day; allow-up instruction and practicular particular particula

operators. At either side of the new-comer lare experienced girls; busy with their work. The position to which the new operator is assigned is identical with the others at the heard, except that it has a key which cuts' it of from the rest of the switch board and protects the service against disturbance by practice calls.

Actual Calls Are Simulated

board, and protects the service genhald disturbance by practice calls.

Actual Calls Are Simulated a postion and is given some information of the given actual properties in the given actual work to do. Under such given actual call during light traffic, periods, and thus she works into her job almost without being aware of it.

This might be termed a process of learning by doing. It is supplemented by discussion of operating practices, and drills, conductes are bid, but the eroup actual calls during light traffic periods, and the supplemented by discussion of operating practices, and drills, conductes are bid, but the eroup students are bid, but the eroup of the chases information of the chase info
