TO GUESTS?

Today, the kitchen is as important as any other room in the home. Perhaps no other room has so much to do with creating a favorable impression of the house.

And guests have a way, these days, of making themselves at home in the kitchen. No kitchen is safe from sudden social invasions at any hour of day or night.

Are you proud of your kitchen? Is it a room that you thrill to show to guests? If not, start today to modernize it. There never was a better time; it has never been so easy.

One thing at a time is the sensible way to make these changes. And the natural beginning is to replace the old stove with a modern gas range. No other home improvement will give you so much pleasure.

Modern gas ranges have all the advanced features that simplify cooking and baking tasks. You'll be astonished at the way this one change will cheer up the whole room. Many sizes, styles, prices to choose from.

free trial

Without any obligation whatsoever, no rental cost or similar expense, we will install your choice of a new model 116 or 117 A.B. or No. 6590 Detroit Jewel whole room. Many sizes, styles, prices to choose from.

We want you to try this range and see how better even design means real food saving in baking, roasting, broiling—certain results without waste, goodness cooked in instead of out—every advantage a real saving. And so easy for YOU to have now.

There Is No Other Way

In supplying telephone service to Michigan, this Company's first concern is with the present. Above all else, the service must be good today. But to serve the present, we must be constantly preparing for the future.

To illustrate: In Detroit stands Michigan's largest long distance switchboard. It represents invested money, skilled labor and thorough engineering study. The need for this switchboard did not exist at the time plans were made for it. But a careful survey of the future had plainly indicated that such a need was coming. And when it came, this Company was perfectly equipped to handle the heavy traffic of long distance calls that flowed in and out of Michigan's great industrial areas.

The intricate mechanism behind your telephone cannot be assembled overnight, nor thrown together to meet a sudden need. It must be "built ahead." To do this intelligently—and economically—requires an intensive engineering survey of such factors as shifts in population, industrial developments and trends in real estate. The neglect of these preparations could be as wasteful as building a bridge accommodating a single lane of traffic, only to find later that additional lanes are imperative.

It is not a mere academic theory that this policy of building for the future is the only way to provide high-grade telephone service. Experience has repeatedly demonstrated that there is no other way.
