Beet and dairy cattle soon pay back manyfold the cost of treatments for cattle grubs that cut linto milk production and beef by annoying the animals. Non-poison-tonitents and washes paralyze the grub and heal the bump. The time to do the job is now, according to C. B. Dibble, entomologist at 'Michigan State College, East Lansing, Many farmers cut down grubs in 1935 and will be able to "clean up" their cattle grubs this year if they treat the animals now.

Cause of Stattering
Strittering usually is not caused
by a defect in the organs of speech
but by a highly nervous state which
interferes with them. Persons so
afflicted can always whisper and
sing and even speak normally at
times. Some become so nervous
that they "stutter" in other ways.
A musician may sound the same
letter several times spasmodically
before going on to the next one—
Collier's Weekly.

Preaidential Succession established by acts of congress in 1858 provides for the secretary of state of the secretary of state of both the President and the Vice President; after him, in order, are the secretary of the treasury, secretary of two are, attending special postmaster general, secretary of the navy, secretary of the navy, secretary of the navy, secretary of the navy, secretary of the fine of the nave, accretary of the mary, secretary of the interior. There is no provision for the election of a new President to fill a vacancy. The retiring President remains President until his successor has been inaugurated.

Tallest Building

The Russians have deeded to build the tallest building in the world and call it the "Falace of the Soviets." They have called into consultation well-known architects and engineers, who are the world's foremost experts in this kind of work. The structure will steel and marble, and in for like the tiers of a weddin; assumenated by a 200 foot chroundinn-plated status of Lenin. Altogether, it will be 1356 feet high; that is 576 feet higher than the Empire State building, at present the tallest building at present the tallest building. higher than the Empire State build-ing, at present the tallest building in the world.—Pathfinder Maga-zine.

Frederick II, Prussia Good Example for Boys

Frederick II, Prussia,

Good Example for Boys

History is filled with the plots
and intrigues of those who tried to
gain a litrone, but here's case of
a prince who ran away from
the property of the property of the
real wary from the power, the
riches of his future position, just
like any boy who feels himself
abused at home, says a writer in
the Washington Post.

Frederick was fond of music and
literature—he wanted to become a
poet. But his father, Frederick Willam I, did not sympathize with
these classical likings—he wished
the heir to the throne to be a great
solder: So he subjected the your
prince to a very harsh, narrow, and
severe imilitary training. Finally
Frederick became so fed up with
this soft war was the control of the
stream of the control of the control
stream of the control of the control
stream of the control
stream

Messages Without Wires
The radio or "wireless" telegraph
was first used commercially less
than half a century ago. Yet the
research which led to this service
began is early as 1824, when Joseph Henry demonstrated the oscillatory [character of Leydra Jar discharges and detected the impulsal
interfed feet away. In 1870 D. E.
Hughes found that such a discharge
would [cause to milings, though not
physically, connected with the jar, to
"cohere," but failed to appreciate
the importance of his discovery and
did not then publish it. In 1887
Heinrich Rudolf Herts produced
did not then publish it. In 1887
Heinrich Rudolf Herts produced
and detected electro-magnetic waves,
since then known as Hertian
waves. Upon these froncerfloring the service of the condition
and the service of the condition
defending years of labor in order
to create the far-reaching systems
of radio telegraph and telephone
facilities, which serve the world today.

Measuring Length of Golf Hole
The usual and accepted method
of measuring the length of a golf
hole is on an air line from the middie of the back to the center; of
the green. The air line simply
means that it is measured across
natural depressions, instead of)
lowing the ground contour. On a
dog-leg hole the fairest method
would seem to measure the line
which would moranity be taken by
a standard golfer in playing the
hole, i. e., put a peg in the middie of the fairway at what mighbe called the angle point of the
middle of their back tee to
the middle of their back tee to
the green.

Purpose of Banding Birds
Banding is done to make possible
the scientific study of the habits
and travels of migratory birds. Investigators trap the birds, attach
numbered bands and release them. Information concerning each band-ed bird is filed in Washington, and when the birds are captured again reports are filed and the data traced.

Watching Fishes Beneficial Watching Fishes Beneficial
Watching the rhythmic more
ments of fishes and the rippling undulations of submarine plant life
is beneficial to the overwrought
nerves of patients, say the doctors. Dietitians agree that fish are
as soothing to the senses when
alive as they are supposed to be
good for the brain when boiled.—
Pearson's Weekly.

Nile Fish Chileage Anglers
Africa, the land of big game
Africa, the land of big pame
bouling, is also the land of big
pame fishing. At Athar, 1,500 miles
up the Nile river from the one
up to 200 pounds, is caucht, as well
as tiger fash, which weigh as much
as 15 pounds. The tiger fish is almost a buildog in ferceity.

Henry III of England
Henry VIII of England was the
third child and second son of Henry
VIII and Elizabeth of York. He was
born at Greenwich on June 28,
1491. His brother died in 1501, and
after the death of his father in
1509 he succeeded to the throne.
