SERVE MICHIGAN"

The "Other Side" of the

St. Lawrence Waterway

THE ST. LAWRENCE Seaway rejected by the U. S. Senate in 1934 on its imagined navigation merits is being stirred into life again with its electric power phases blithely offered as a co-equally important argument. But in neither respect is the seaway needed.

VIEWED as a transportation agency, we already have a lakes-to-the sea route. On it can be, is being, economically borne all the products for which America can find world markets. (Our railroads with their 50% surplus of equipment can handle all traffic given them, now and through the coming generations.)

IT WILL create no new markets, nor new traffic. It is

IT WILL, not benefit the auto industry; or the wheat mer; or bring farm relief; or aid employment; or "cure e depression". It will shorten no trade routes. It has military value.

VIEWED for its power (half of which belongs to Canada) again the seaway is not needed. The region cannot absorb the vast surplus of harnessed hydro power it now has. The seaway is so remote from consuming (but disinterested) markets that transmission costs would make the new power—as it does present power—so costly as to be unsaleable.

TO ABSORB the contemplated power an industrial district twice as large as Detroit's must be built adjoining the seaway. Without such a nearby market the power and the immense cost of its development would be wasted.

LASTLY, we must furnish the bulk of the new money needed for a project benef ling another nation more under our own and lying more lat jely in another's territory than in the United States.

AT WILL Create to new markets, nor new train. It is simply a new shipping route, diverting traffic from existing transit agencies. It will function only in summer when railroad efficiency is greatest and need of it would be the least. It will be idle five months each winter when need of it would be greatest.

Contentment in Work
Without work, the average man
is lost. Give bim love, bealth, and
companionable to complete his happiness. In work he finds the contentment for which be yearned. To
be up and dolag, to contribute
something to the world; to provide
for his loved ones; these are the
ambitions of the true man, and
through work he fads the means of
achieving his dreams.

### Over \$50,000 Indebtedness Has Been Reduced to \$8,319.33 In Five Years

FIVE YEARS AGO FARMINGTON TOWNSHIP WAS OVER \$50,000.00 IN DEBT BUT TO DATE THIS INDEBTEDNESS HAS BEEN REDUCED TO \$8,319.33.

The Township Board has made it possible to greatly reduce this large debt while not increasing, but actually lessening greatly the burdens on the taxpayers.

By reducing the expenditures of the Township the Township Board have greatly reduced the tax budget each year.

This year our Township has enjoyed a saving to the taxpayers in the amount of \$2,452.41 in County taxes alone, for the tax levy of 1935, this saving being due to the ability of Supervisor Coe in getting a reduced rate for County taxes.

For the benefit of the citizens and tax-Por the benefit of the clizers and tax-payers of Farmington Township we there-for ask that you return these Township Officials to their respective Offices by plac-ing a (X) cross in the circle at the top of the Republican ticket. NOTHING MORE NEED BE DONE.
