### Farmington Drug Co.

Stanley F. Smith  
PRESCRIPTION DRUGGIST

"It is more vital for the car owner to get his automobile ready for the heavy summer driving this year than for a long time past," according to Earl Viver, manager of Viver's Super Service.

"During the extremely severe winter weather we have just passed through, the average car was subjected to more stress and strain than usual. Many motorists realized the importance of thoroughly checking every part of the car for safety in driving during the months when getting out on the open road is a real pleasure.

"Motorists are beginning to learn that heat as great as that of boiling water is often generated in the engine when driven at 40, 50 and 60 miles an hour. That's the reason we like to tell car owners about a tire that resists heat and keeps the blisters that eventually cause blow-outs, from forming," Mr. Viver says.

"Then besides tires, there are brakes that need checking, batteries that should be inspected, and accessories such as head and tail lights, windable wipers, horns and other equipment that should be looked over if trouble free motoring is to result. In our Spring sale we are featuring many of these items that tend toward safety of motoring."

### THINGS OUR CHECKING DEPOSITORS Never Worry About

- 1 Hold-ups, theft, lost bankrolls**  
They never carry much cash with them. They can always get more by calling a check.
- 2 Lost remittances in the mail**  
They know they can stop payment on a check and send another.
- 3 Keeping track of expenses**  
The monthly statement from the bank does most of their bookkeeping for them.
- 4 Wasting time making payments**  
They use a fountain pen and a check book as time and labor-savers.

Why should you worry either, about these matters. We invite you to open a checking account with this bank.

### SELF-CONFESSION

By CARLTON JAMES  
Associated Writers  
WNU Staffer

INSPECTOR JOE WARREN read the last few lines of "The Gladiolus Murder Case" and closed the book. He looked across at the young man who sat on the opposite side of the desk, and shook his head.

"I may sound all right in story books, Mort, but it doesn't go in real life. There are two things in this crime-detection game that you can depend upon. First, the murderer will return to the scene of his crime. And second, that murderer will out."

"Meaning by that, I suppose," Mortimer Landers smiled, "that someone or other, every killer is apprehended." "Not necessarily. I mean that nine times out of ten a murderer will confess his crime to some one. If it appears he's getting away with it, he'll become boastful." Warren tapped the book with a forefinger. "This book of yours isn't flattering to the police. It seems to me you've hardly given a credit to the men in blue who do you have to base it on the Dyer affair, anyhow? The public still remembers that the killer of Old Man Dyer was never apprehended, did it give you a headache?"

Mort Landers shrugged. "Chiefly because I knew all the people involved in the Dyer murder. The old man was a particular friend of mine. I don't know how you're saying so, but I think the police did rather a sloppy job of it."

For a moment, Inspector Warren studied the young man without speaking. Then he said: "Mort, you've been hanging around here for the past three months, gathering material for this novel of yours. We co-operated as best we could, did our best to help you out. Now you've bitten the hand that feeds you by giving us a job in this

cock-eyed story you've written. . . . All right, skip it. It's your business, I suppose, to write realistic, and I don't know a blame for being sore. Dyer was a friend of yours and you blame us for not avenging his death. O. K. But listen," Warren leaned forward. "I've got a bunch of ideas for a theory in the matter. What is it?"

"You read the story. Remember, I wrote it from the point of view of the murderer. I explained how to my mind, he could have accomplished his crime and got away with it. All the clues I mentioned were there for the police to see, but they overlooked them."

"I see. Then you think young Stan Alcus killed Dyer? Stan was his nephew and would have benefited by the will."

"Not necessarily, Stan. Why him?"

"Then some one connected with the family?"

"Yes."

"Willetta Wimple, the granddaughter?"

"I'm not saying."

Warren sat back. "In other words, all I have to do is fit a name to the Dyer family to the character in your book, and I'll have the murderer of James Dyer?"

"You may and you may not. I can't tell. I'm not a detective. But as an ordinary man, I'd say you'd be closer to your man than you have been during the past three months."

"I get it," Warren bit on the end of an cigar. "Mort, do I understand that you don't believe in my theory? I mean, the one about the murderer, believing himself clever, confessing his crime to some one sooner or later?"

"I disagree with it most heartily. No man is vain enough to jeopardize his freedom, perhaps his life, by boasting about a thing like that. I pointed that out in my book. My killer was content to sit back watching the futile efforts of the police and chucking over them."

"He got away with it?"

"In the end he got his punishment by figuring in an airplane crash but that little touch of melodrama is necessary to present day novels. You must get it just down on the public won't buy books."

"I've discounted your touch of melodrama, and I've also discounted the theory that a member of the Dyer family is guilty of the crime."

"You have? Why?"

"Because we've had them under surveillance, checked back their activities a hundred times, questioned them, investigated them, investigat-

### Excessive Heat Caused Ice Age, Scientist Says

A revolutionary theory of the cause of the Great Ice age, blaming this episode of earth history on more warmth than was received from the sun instead of less, was proposed at a recent meeting of the Royal Meteorological society in London, England, by the weather scientist, Dr. G. C. Simpson, says a writer in the Detroit Free Press.

The theory also explains the succession of four ice ages and three inter-glacial periods during which the ice retreated, according to the new theory, the ice age began about a million years ago with a slight increase in heat reaching the earth from the sun. This raised the average temperature of the earth only very little, but did increase greatly the amount of water evaporated from the ocean.

This increased evaporation caused heavier rains and snows all over the earth, including snows in the Arctic and Antarctic regions and on high mountains. The summers being too short for all this snow to melt, the first stage of the ice age came on.

Doctor Simpson supposes, however, that the slow increase of the sun's heat continued. Probably this was enough to affect the earth's temperature as well as to increase the evaporation of sea water. Accordingly, the accumulated ice and snow melted again and there happened a wet and relatively warm inter-glacial period.

As the sun's heat then increased again this cycle is believed to have occurred in the reverse order, creating another period when more and ice accumulated and which ended, when the sun's heat had decreased enough to stop the excessive evaporation of ocean water.

Quite Ice Evaporates Capital Quito, capital of Ecuador, along with Mexico City, and Cuzco, antedates the white man's discovery of America. Its exact age is unknown. It is believed that in prehistoric times it was inhabited by the Quits; then by the Caras, a race contemporary with the Incas, and under their rule; and later by the Spaniards, after Francisco Pizarro executed the Inca ruler in Peru, he sent one of his lieutenants north to invade the Caras' territory and establish the kingdom of Quito.

### Science Students Visit New Waterworks Plant

An education trip, which was arranged and conducted by Herbert F. of the Farmington High School was taken by pupils in Mr. Fox's general science class and eighth grade students who have attained high scholastic rating in science. They left for the plant Tuesday afternoon. They visited the new \$30 million dollars water works plant on Warren avenue in Detroit.

Interesting is the fact that A. C. Wood of Farmington, who has two daughters, Mary Louise and Betty Jane, are in the eighth and ninth grades respectively of the Farmington High School, supervising the installation of the boilers in the new plant.

### BASEBALL TEAM TO MEET STRONG NEW HUDSON '9'

Dood pitching, combined with an exceptional display of batting power and commendable fielding, all of the Farmington High School baseball team to continue its record of games won by swamping Keego Harbor 17-0 on the Farmington diamond last Friday.

The game until the fourth inning was fairly even but from then on the Farmington team pulled away to the final lopsided score. In the fourth the entire Farmington lineup batted, collecting eight hits and seven runs to go into the lead 11 to 4.

Farmington scored three more runs in the fifth and one in the sixth.

In only one inning, the second, did the Keego Harbor team threaten. Waters, 2nd base, opened with a hit, Cooper received a base on balls. The third man up, Kultz went out, but the fourth batter hit safely and Waters scored. Cooper scored on a passed ball.

While scoring 17 runs, the Farmington players were garnering 15 safe hits off the offerings of the Keego Harbor pitcher. They were aided by errors made by the Keego Harbor team.

The visitors made six hits off Clark, who pitched the entire game for Farmington. Farmington made three errors.

The "big guns" on the Farmington batting front were Bob Werschlin, Norm Hunt and Donnie Lee. Each hit safely three times and among them scored six runs.

Himmelspach got on base in three out of four attempts and on each occasion scored a run, without making a hit. The second and third times up he received bases on balls and the fourth time got on through an error.

He was the only Farmington player who failed to hit safely. Every Farmington man scored a run.

**New Hudson Next**

The next game will be played Friday at New Hudson. It is reported that New Hudson has one of the strongest teams in the history of the school. They are said to have beaten Walled Lake, co-champions of the league last year.

Commenting on the showing made in the first two games of the season, Coach Kammerer stated there were a lot of rough spots to be out but that he was particularly pleased to find his players adopting the "big league" attitude of standing up to the plate and

"taking a cut at the ball." It was also learned that Harvey Hamilton, who quit school earlier in the year has returned and will be eligible to play next week. It is expected he will strengthen the most serious weakness of the team.

The Keego Harbor game was the first to be played on the reconstructed field and the players found it excellent. Both players and coaches commented later that the city workmen had done a "professional job" of leveling and grading.

The starting lineup for Farmington was pitched on by: catcher, Warren Werschlin; first base, Hunt; second base, Lee; short stop, Davis; third base, Turner; right field, Linklater; center field, Himmelspach; and left field, Bob Werschlin.

### WEST FARMINGTON

Mr. and Mrs. Lorin Long are the parents of a baby boy. Mrs. Long is at the home of her parents Mr. and Mrs. George Woodworth. Mother and baby are doing nicely.

Mr. and Mrs. Wallace McDonald spent Sunday with Mr. and Mrs. Stan Graham and family.

Mrs. Lawrence Giegler and daughter and son-in-law Mr. and Mrs. David Long called on Mrs. Edith Graham Sunday.

The Minstrel Show staged by the West Farmington Parent-Teacher Association was a decidedly successful affair. The school was crowded to capacity. Some of the school children took part in the program. Other people taking part were members of the P. T. A.

Mr. and Mrs. Raymond See have moved from the Bleeming's house on 13 mile road to their own home on 14 mile road.

Mrs. Harry Colstock and daughter Sally Lou who were in an automobile accident at the school are home from the hospital and are getting along nicely.

Several children from here who are in the fifth and sixth grades at Walled Lake school were in the group which visited Greenfield Village Tuesday afternoon.

Donald Dickie is out of school this week on account of sickness.

Mr. Fox has moved to the Smart residence on 13 mile road.

### It's Time To Change

from Winter lubrication to oil and grease suitable for driving in warm weather.

Don't wait too long before having your car lubricated with the proper grades for spring and summer traveling. Oil and grease that was recommended and used for low temperatures are not adaptable for warm weather driving.

Just as you change your wearing apparel to lighter weights when the mercury rises, so you should treat your automobile and see that the moving parts have the correct grade "clothing."

Bring your car in and let us go over it "from stem to stern." We will lubricate your automobile COMPLETELY with the proper oil and grease for your particular needs.

IT PAYS TO BE PREPARED.  
DRIVE IN TODAY
