yes, risky to be too sure about anything." Mary reminded her.

"You haven't bought a new dress; since you were married—than't swo years ago. Men like variety, and that means clothes."

Laura dropped her sewing and went to her bedroom, to return with a green lace dress over her arm. When she held it up for inspection, Mary laughed. "That's what I mean dear. I know that dress and so does everybody else, and that includes Stan. You've worn fit to every party for two summers. I'll bet Stan groans when he sees it coming."

She served the dessert—and announced: "Big news! Your wife has an absolutely new dress for Saturday night."
Stan looked up, but as if he had not heard.

"I said, I have a new dress for Saturday," Laura repeated sharply.

Use for Paint Grows

Oil from soy beans is used at an increasing rate in manically by paints. It no doubt would be feed more extensively if farmers if the Middle West could grow their live more rapid drying oils, say a mount of lotine continued in it is directly related to the drying, soy entries of the paint made for the oil. The higher the lodine C that the faster the paint dries. Painteries say that oil from perilla seens has a higher lodine content than oils from other oil-bearing seeds fuch as soy beans, fax, and hemp. Ferilla seed oil cannot be used alone in making paint because it dries too fast, so it is mixed with soy bean oil. The perilla oil now used in this country is imported.

The Needlework Guild.

The Needlework Guild of America was started in 1885 by 4 small group of Philadelphia woman who made garments by hand for needly familles. The organization took its pattern from one introduced in England in 1882 by Lady Wolverton of Dorsetshine. All the clothing distributed by the members must be new.

When You Excharge Lamps . . . Get the right size . .

Do you have small imps where you need large enes for adequate lighting, or large lamps where smaller sizes should be used? The Oetroit Edison Company will gladly help you to get the right lamp in the right socket by advising you on correct famp sizes and by exchanging large lamps for small and vice versa.

When you bring your BURNED OUT lamps to the Edison office for exchange, cell us where the lamps are to be used and we will help yo to get the right sizes. There is no charge for lamp reflewal service. The only requirement is that you bring with you your most recent electric bill for identification. This practice protects our sustomers against renewals of lamps by people who are not customers of The Detroit Edison Company, and provides our bookkeeping department with the necessary records on lamps passed out.

For comfort and convenience, and to insure adequate light for safe seeling, keep your sockets filled with lamps of the right size. When you have burned out lamp butbs, exchange them for new ones at your Edition office.

Note: Lamps are renewed without extra charge only for residential and commercial customers paying lighting rates and in the following sizes; 25W, 40W, 60W, 100W, 150W, 200W, 300W, 50W, 4nd 3-lite lamp 100-200-300W.
