

STATES HAVE OPPORTUNITY TO SHOW WARES
IN HUGE BUILDING AT NEW YORK FAIR

NEW YORK, (Special).—Included in the limited edition book of unusual size and beauty which the New York World's Fair 1939 incorporated has sent to state governors and, through diplomatic channels, to foreign governments, is the following text devoted to:

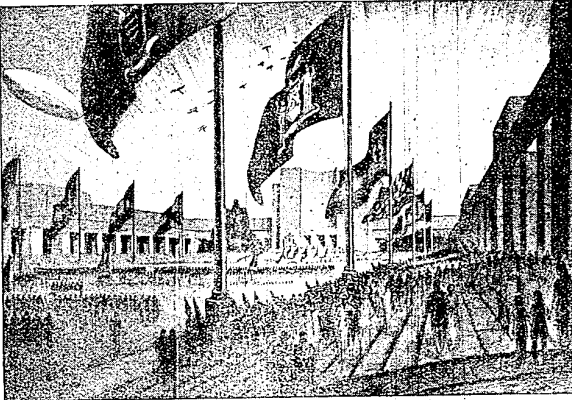

The Sovereign States of the Federal Union

George Washington, in declaring that the public felicity and prosperity of America depend upon the firm union and the unceasing cooperation of the sovereign American States, divined the future. The prosperity and the greatness of these United States have arisen from the free and unimpeded circulation of ideas and products in the world's greatest consumer market.

The Fair gives to each State the appropriate setting and opportunity to announce to the world its unique and indispensable contribution to America's rich and colorful civilization. The Fair contemplates a Hall of States, in the imposing Government group and flanking the structure which the Fair looks to the United States to build, to house the exhibits of the forty-eight States, and the Territories. Those wishing to participate more extensively will, in addition to their exhibits in the Hall of States, either erect their own buildings or obtain space to display their products and attractions in one or more of the exhibit zones.

The State of New York has naturally taken the leadership in the participation of the sovereign States of the Federal Union. Its total appropriations for Fair purposes may exceed \$5,000,000 and the New York State World's Fair Commission, appointed by the Governor, has been active for some time. Other States already are beginning to express enthusiastic interest in participating more extensively than at previous world's fairs.

The many visitors will find a fresh cause for pride and enthusiasm in the revealing exhibits of their respective States. But beyond this, the exhibits will enable the States to make a persuasive presentation to all visitors of what they have to offer to the consumer and to the tourist.

CANDIDACY FOR
RE-ELECTION IS
ANNOUNCED

Friends of State Highway Commissioner Murray D. (Pat) Van Wageningen in the Farmington area as well as throughout Oakland County are pleased with the announcement of his candidacy for re-election to his present position. The commissioner announces his candidacy with a statement as follows:

I announce my candidacy for re-nomination on the Democratic ticket and re-election to a second term as state highway commissioner.

Frankness impels me to say that I seek re-election because I like my job. It is attractive to me professionally. It offers a fine opportunity for public service. No other position of public trust in Michigan is closer to the people of all walks of life than that of state highway commissioner.

The three primary qualifications which I believe the people desire in their state highway commissioner are honesty, ability, and a vigorous prosecution of one's duties.

My administration has administered millions of dollars the last 3½ years without any hint of irregularity. The one synthetic attempt to attach any scandal to my office ended in a boomerang for its perpetrators. We have practiced clean government.

Physical improvements on the trunkline highway system in every section and county of the state have been made in the vast amount of construction during my administration. An enlightened maintenance policy has kept the roads open at all times with safety to the motoring public a primary objective.

"Political Roads" Gone

The political road has vanished. Our work has gone forward with favor to no particular group or class and with equal benefit to Michigan's industrial, agricultural and tourist business. Rural improvements have been matched by municipal highway development.

Our trunkline system is on a "Pay-You-Build" basis. Obligations are met promptly when due. Our books are in the black.

Ours has been a progressive, efficient organization, alert to every opportunity.

every opportunity. As a result, Michigan has developed a national leadership in highway construction, both in the amount of work and its quality.

On this record I stand. It is on this record that I solicit the support of all the people. It is my purpose to launch a vigorous campaign in every section of the state immediately. Before the end of the month, I expect to be in every one of the 83 counties of Michigan in behalf of my candidacy.

New Lighting, Even
Bubbles in Color
To Beauty Fair

NEW YORK, (Special).—None of the scientific discoveries or developments being hurried from the laboratories to make the New York World's Fair unusual and thrilling with more startling results than the latest technique of illumination.

This statement was issued by Grover Whalen, President of the Fair Corporation, at the inauguration of experiments by the Fair's staff of engineers and illumination experts or their consultants. These men are already at work with quarter-inch scale models of the Fair, types of lighting equipment, even before used in comprehensive manner, and utterly new principles never developed practically. They are dealing with everything from fluorescent dyes and colored bubbles to concentrating lamps and floodlight systems.

The plan is not to create spectacular effects in the usual sense of the term, says Mr. Whalen, but rather to create designs in light that will make their appeal through their magnitude and their sheer beauty.
