## WILL SHOW LIFE OF DEAF IN FILM AT CHURCH

An interesting new film depicting the life of those attending the Evangelical Lutheran Institute for the Deaf will be shown at St. Paul's Lutheran Church at the corner of Middle Belt and Base Line Road on Wednesday evening, January 27, at eight o'clock.

Among those taking part in the scenes shown in the film is June Habermehl, daughter of Mr. and Mrs. Charles Habermehl of Farmington.

Scenes will be shown of the work, study, and play of the 37 deaf pupils now enrolled in this institution of the Lutheran Missouri Synod.

Mr. J. A. Klein, director of the institute, is in charge of the showing of the film which is entitled "Deafness." Rev. Graupner, pastor of St. Paul's Lutheran Church, cordially invites the public to make use of the opportunity to learn how the handicapped children are fitted for life. There will be no charge for admission. A collection will be taken for the benefit of the institute.

Donald S. Bell of Birmingham will complete the term of coroner which was vacated last week by the death of G. Dewey Kimball.

The appointment was made Tuesday by Probate Judge Dan A. McGaffey, County Clerk Lynn D. Allen and Prosecutor Franklin Morris. Mr. Bell, who was a candidate for the Republican nomination for coroner last September, polled a substantial vote in the Farmington area. He has been associated for the past six years with his father, S. O. Wyllie Bell, funeral director of Birmingham.

I must employ at once a man living in a small town or on a farm. Permanent work. Must be satisfied with earning \$75 a month at first. Address Box 312, care of Farmington Enterprise.

## Valued most when needed most

TELEPHONE SERVICE has become so efficient, so easily used, that it draws no particular attention to itself. But its value is sharply emphasized whenever a home is threatened by one of the three great domestic emergencies:

**Call the police!** No home is safe from the lawless prowler, intent on theft or violence. But the telephone is his enemy; its mere presence in the house creates an added risk for him. The prowler knows this. He knows how quickly it can spread the alarm, flash out the call that brings the police swiftly to the scene.

**I smell smoke!** After a fire breaks out, time is priceless. Every moment's delay increases the damage and danger. There is always a point beyond which control is impossible, and destruction complete. But almost any fire can be extinguished with trifling loss—if taken in time.

**Get the doctor!** Amid the panic caused by sudden illness or injury, one thought leaps to mind. The man needed now, above all others, is the doctor. The interval before he comes is one of anxious waiting—a dread period which the telephone can shorten. One call secures prompt advice on first-aid, and hastens the welcome arrival of the doctor.

In emergencies, even seconds are important. And the more important they become, the greater the value of the telephone in protecting property, relieving anxiety and saving human lives.

A standard drivers' license law, well administered, takes some drivers off the road of course, but just remember that it makes a much larger number of drivers fit to stay on the road.

### MOST DRIVERS ARE GOOD DRIVERS

The vast majority of motorists are good drivers who are ready to accept reasonable regulations and comply with practical and sensible safety measures.

The ease with which a driver's license may be secured in the county in which the applicant resides works no hardship on anyone. Keeping it is simply a matter of obeying the traffic laws.

## Tremendous Trifles

By ELMO SCOTT WATSON

### COLD OR HOT?

IT'S a little tube about half the size of a steel knitting needle and about as round. It influences our behavior, our market, our clothes and our comfort. It's a thermometer.

Rack in 1592, there was a Professor of mathematics at the University of Padua named Galileo. He was fond of uttering with tubes and acids. Being Greek, he christened one brain child that he fashioned "thermos" for warm and "barometer" for measure. It was a glass tube that was set in colored water. Galileo could hold the air bulb in his hand and find a measure of heat from his own body.

Up to 1640, however, there was no agreement as to what scale should be used on the fascinating instrument.

In 1714 Fahrenheit of Danzig evolved a scale, using the interval of 180 degrees. The freezing point of water was given as 32 degrees and the boiling point at 212 degrees.

This is the only invention that has such a background of universal co-operation from scientists of all nations.

Celsius proposed a scale to 1724 with a freezing point of water at 100 degrees and a boiling point at zero. These degrees were reversed some time later by Christian of Lyons and became the centigrade scale. It's a tremendous trifles—that little glass tube!
