## TANGLED WIRES

THE office was very quiet that morning. Colonel Gray had gone away for two weeks and Judith was alone. This meant plenty of time to think, and this was the last thing Judy wanted to do. It was thinking, during these days when she had left Van, that had brought her up against the dead wall of her present wretchedness and despair.

At the time of her marriage she had wanted Van to buy a certain new little suburban bungalow, set in a grove of silver birches, and to keep her position in Colonel Gray's law office. But Van, who was not always on a grand scale. High spiritual and aesthetic values are reflected by the humble ever available to those who seek them, beyond the first sight of eyes or where music too soft for hearing yields peaceful harmonies.

## Winged Decade

(Exchange)

Calling of the trans-Atlantic air race commencing the first of May. New York flight is a compliment to the industry Colonel Lindbergh brought to advance by his daring adventure ten years ago. Aviation no longer means such spectacular adventures. The Department of Commerce is exercising wise restraint.

The official ban emphasizes that flying has passed from the circus stage to that of a firmly established public transport system. Accident now is not considered a disgrace. One has only to trace the amazing strides commercial aviation has made since 1927 to view this significant anniversary in its proper light. In that comparative short wingspan of time, commercial flying has grown from a few mail routes to a nationwide network of day and night passenger service. The five continents have been bridged by flying boats. Nothing could better typify the outlook of aviation leaders today than the practical part Colonel Lindbergh is taking in helping to build up the industry. It is significant that even while the Department of Commerce is canceling the contest, Lindbergh's first great achievement, the flier goes quietly about his work as technical adviser to interests now preparing plans for a trans-Atlantic airline.

Banning the projected air race should in no way detract from the friendly feeling the occasion calls forth. Americans will be no less appreciative of the French Government's desire to join in celebrating the landing of the "Spirit of St. Louis" at Le Bourget. Peoples on both sides of the Atlantic share a real and lasting affection for the daring youth with the modest bearing and expansive smile. Max will regret festivities held in New York in his honor. And those who understand the reasons for his absence will be drawn only the closer by ties of respect and admiration his courageous conduct has always inspired.

## What is a Boy?

(Exchange)

He is a person who is going to carry on what you have started. He is to sit right where you are sitting and attend when you are gone to those things you think are so important. You may adopt all the policies you please, but how they will be carried out depends on him.

Even if you make leagues and treaties, he will have to manage them. He is going to sit at your desk in the Senate, and occupy your place on the Supreme Bench. He will assume control of your cities, states and nations. He is going to move in and take over your prisons, churches, schools, universities, a corporation. All your work is going to be judged and praised or condemned by him. Your reputation and your future are in his hands. All your work is for him, and the fate of the nation and of humanity is in his hands.

So it might be well to pay him some attention. Tennessee Wild Boars Tennessee's wild boars, descended from Russian stock imported and feral by South Carolina planters some decades ago, bear about the same relation to domestic pigs as a Tasmanian bushman bears to a canary bird. Lean and muscular, weighing 120 to 400 pounds, the boar's chief characteristics are great speed, ferocious courage, dagger-sharp tusks which can rip a dog or man to tatters. Tennessee mountaineers rate them more dangerous than bears.

It worked like a charm. She called him every morning, carefully dictating his name. She coqueted with him openly as the acquaintance progressed, but he was always a gentleman. If he had to be a villain, she thought, he did it well.

"You're a pretty good repair clerk," he told her once, rather wistfully. "I think you could mend broken hearts—and goodness knows mine needs it."

For a week she refused his invitations for a ride, hardening her heart against the coaxing tones that had thrilled her so during the brief sweet madness of her courtship and honeymoon; but, finally, on Friday, in a mood half pitying and half fearful, she yielded.

"How about Sunday?" she asked. He assented joyfully. "A picnic all day! I'll take lunch—I've a peach of a hamper." A sob caught her throat as she thought of the happy times they had packed it together.

She was terribly apprehensive, now the time to meet him arrived. They might have patched up the fragments of their life-together, once. Could they—after Sunday? She doubted.

At 11 o'clock she stood at the entrance to the Arboretum, looking for the shabby roadster that had whirled her away one autumn night, with Van, straight to paradise. Presently she saw it, but stopped, abruptly, her hand upon her heart. For the driver who got down now and came to meet her, wasn't Van at all, but a thin young chap in glasses with a friendly but uncertain smile.

"I think you're the young lady I'm supposed to meet," he said. "Van sent me. We're to pick him up later. It's all right, you know, have his car." Her brain didn't seem to be functioning. Like a sleep-walker she got into the car.

## Odd Justice Prevailed

In Isle of Man Affair For two or three centuries in its history, the central position of the Isle of Man was a positive disadvantage. It was a popular retreat for English debtors, rebels from Ireland, and for some obscure reason, Scotch people.

The population came in time to be more than ordinarily representative of the surrounding kingdom, and the task of keeping the peace, which fell on the Lord of the Isle, his deemsters and 24 keys, was no sinecure, says the Windsor Star.

Every person who took up residence within the Isle was required to make oath of faith and fealty to the Lord of Mann, failing which defaulters were deprived of the right of making a will, their goods, at death, became the property of the king. In addition, they were sometimes outlawed, and not only so, but islanders who gave them food and shelter, were regarded as traitors.

Thus in 1500, the constable of Peel castle was found to be a traitor "for entertaining two Scots in the garrison," as a predecessor had been for "keeping a Welshman in the garrison."

Coastlines Michigan has a total of 1,715 miles of coastline on the Great Lakes, 905 miles in the Upper Peninsula and 810 miles in the Lower Peninsula. The U. S. Coast and Geodetic Survey lists only southeast Florida, with a coast of 399 miles on the Atlantic and 798 miles on the Gulf of Mexico, a total of 1,197 miles. California, with 913 miles and Louisiana with 397 miles. In tidal shore line (including islands), Florida has 2,276 miles to California's 1,190 miles. According to the methods used by the Coast and Geodetic Survey, Maine has only 228 miles of coast (not including islands); if all the indentations are measured, it would have about 3,000 miles.

The Egyptian ceremony of breathing on the ground was a form of obeisance. Arabians would touch the ground with a finger, then put it to the lips or forehead, thus performing an obeisance symbolically. In China three bows were made before those of more exalted ranks, each person bowing the number by a bow or two, out of compliment to the other.

## Arab and His Pipe

The Bedouin Arab of Arabia is a difficult fellow to understand. His personality is as mysterious as the desert he inhabits, but there is a most attractive and human side to him and that is his love of his pipe and tobacco. His pipe, which is designated the beaba, consists of bowl carved from a soft stone, and the stem is of considerable length. His tobacco pouch is the skin of a newly born kid.
