Discovery of Aluminum
The existence of aluminum was
first suspected in the Eighteenth
century. Experiments were attempted in France, in England and
forem with the Eighteenth
of the Eighteenth
of the Eighteenth
of the Eighteenth
of the Eighteenth
in England and
forem with falled to Isolate the
metal, suggested aluminum as a
suitable name for it. The French
scientist, H. Sainte-Claire Deville,
discovered, a successful technical
process for producing aluminum
and; caused a medal to be struck
and presented to Napoleon III. The
Emperor became much interested
in the possibility of using aluminum
for helmets and armor for certain
of his soldiers and encouraged Deville to continue his experiments
sirst article made of aluminum is
reported to have been a haby rattie which was presented to the infant Prince Imperial.
