

# "HOUSECLEAN" YOUR SKIN!

Don't be satisfied to give it merely a look and a promise. Half-way cleaning measures are responsible for many skin troubles, such as enlarged pores, black heads, dry and scaly skin. When you clean your skin with "Houseclean" —

What you want is a penetrating face cream such as Lady Esther Face Cream. It is a lady's face cream and does it in a gentle and soothing manner. It goes to work on the unbroken waxy matter — breaks it up — dissolves it — and makes it easily removable. When your skin is really clean it resumes its natural softness, smoothness and fitness.

As Lady Esther Face Cream cleanses the skin, it also lubricates it. It respects it with a fine oil that keeps it soft, smooth and supple. Use Lady Esther Face Cream tonight and see how your skin responds.

## SOUTHERN PINE GOES TO NEW YORK FAIR

NEW YORK (Special).—Southern yellow pine from the Eastern Shore, Maryland, and from points in Delaware, Virginia and North Carolina is already going into foundations in the central exhibit area of the New York World's Fair of 1939.

Grover Whalen, President of the Fair Corporation, has just announced the purchase of 450 sticks of pine piling, in lengths up to 80 feet, from Nichols Brothers, of 80 West Street, Manhattan, and Norfolk, Virginia. Shipments of this lot are originating at Frankfort, Delaware, Preston, Maryland, and Meigs and Chertion, Virginia. An order for piling of similar size is being filled at points in North Carolina.

The pine sticks are being driven into the ash-meadow fill of the 121 1/2-acre exposition site where they will serve as part of the foundations for bridge abutments near the Theme Center and amusement areas of the Fair.

## "WAY BACK WHEN" by Jeanne

DEISER WAS A BILL COLLECTOR

IF YOU lived in Chicago, Ill. 15 years ago, you may have bought carpet tacks or a can of paint from a young hardware clerk who looked like nobody at all to you. A few years later you might have rented an apartment from the real estate office where he clerked; a little later you may have seen a young man persistently ringing the door-bell of that neighbor of yours who was careless about her furniture installations. For Theodore Dreiser, famous in American letters today, was in his youth hardware clerk, clerk in a real estate office, and bill collector for a furniture house.

He was born in Terre Haute, Ind., in 1871. A poor boy, he attended the public schools of Warsaw, Ind., until the age of sixteen, then came to work in Chicago at \$3 per week.

An ordinary young man, with an ordinary background, who could have foretold that some day he would produce a book ("American Tragedy") which would arouse world-wide controversy, banned in some cities, required reading in some school systems.

After the collector's job, persistent calling at the Chicago Daily Globe got him a job as a reporter.

His rise was rapid as he developed a clear reportorial style, until 1908, when he became editor-in-chief of the Butterick Publications which included Delineator Magazine. His first book, "Sister Carrie," was published in 1900 and immediately brought to his frankness. It was not until 1911 that his next, "Jennie Gerhardt," appeared; and it was followed at regular intervals by other books of the "call a spade a spade" type.

"American Tragedy" appeared in 1925, was translated into many languages and was adapted to the stage in America and in Germany as late as 1926.

## February 29 Birthdays

Purely Calendar Problem. A person born on February 29 has a birthday only once every four years so far as the calendar is concerned. It is, however, purely a calendar problem. In reality, it serves a writer in the Indianapolis News, there is no problem at all, because none of us observe our birthdays on exactly the proper twenty-four hours, owing to imperfections in the calendar.

Every four years the calendar is about twenty-four hours behind the astronomical or true solar year. This difference is made up by adding an extra day to February every four years, making leap year. According to our calendar, this is every year represented by a number divisible by 100 but not by 400. This arises from the fact that the addition of a whole day every fourth year is a few minutes too much to make the calendar come out even. A person born on February 29 in leap year would be one year old exactly a year later, and his true birthday would begin then and would last for twenty-four hours, regardless of the calendar. The same holds true of a person born on any other date. But it is customary to adopt as one's birthday the entire calendar day nearest the astronomical date. Those born on February 29 have a choice of observing their birthdays on February 28 or March 1, except in leap year.

## WORTHWHILE

Twenty-four thousand deaths and nearly a million injuries would have been avoided between 1926 and 1935 had the national trend in motor accident deaths kept pace with reductions made in states that had standard drivers' license laws.

The trouble with a lot of child-rearers is that the education of their parents was sadly neglected.

## The Only Alternative

A good story concerning John Wesley, Methodist's pioneer, recounts how Wesley had ordered his assistant to do something or other, but which the latter refused to do. They both slept over this insubordination and the next morning Wesley asked if his assistant was ready to beg pardon. No, he would not. "Then I will beg yours," said Wesley.

## Istanbul Many Towns

Constantinople, known as New Rome when it was the seat of the Roman empire in the East and as Istanbul, after its capture in 1453 by the Turks is really a collection of towns and villages lying on both sides of the Golden Horn and along the Bosphorus. There are four general sections, however, consisting of Bosphorus, Istanbul (the Greek section south of the Horn on the site of the ancient city), Galata (the chief business center and seaport on the Horn) and Scutari. Foreigners have always called the entire city Constantinople, while the Turks called it Istanbul, a name which outsiders applied to the typically Turkish section, which is bounded on the west by the Sea of Marmora, on the east by the Golden Horn, and on the south by the ancient city walls. The name Istanbul is the Turkish form of Istantbul. It is derived from the Greek and literally means "into the city."
