Wondering how many lines of a popular song the average person remembered, Ferde Grofe, who is both a composer and an orchestra leader, took a list of 10 and submitted it to 10 friends, all non-professionals. All started bravely with the first line, a few finished the second, but scarcely any could recall the third. The memory of the music, however, was better. Five hummed the list through from start to finish; three knew the music of eight and the others remembered at least half of the scores. And where does that leave lyric writers?

France is Second Only to Russia in Air Power

Paris.—Air Minister Pierre Cot declares France today is second only to Russia in air power. "No air force in the world has ever made the progress in 12 months that we have made in the last year," he said. He listed the accomplishments. "We have increased our modern equipment in use by 110 per cent. By the end of 1937 the increase will be 180 per cent. "There has been an increase of 80 per cent in the reserve. "Our bombing power has increased 400 per cent. "Our air force has become one of the most powerful in the world; second only to that of Soviet Russia. "Nationalization has strengthened the aircraft industry, he said. "Our industrial potential has been raised in the course of a year by 30 per cent," he said. "By the end of 1938 it will be 100 per cent greater than it was in 1935. "We have raised the officer strength by 25 per cent and in order to give our air force vigorous commanders have lowered the retiring age limit."

World War Hand Grenade Is Unearthed in Indiana

Pottsville, Ind.—Citizens here still are puzzling over the mystery of how an unexploded World War hand grenade found its way into the ground of a Bethel township farm where it was turned up by a plow without exploding. Children found the grenade on the farm and sold it with some other scraps to G. C. Byrd, a junk dealer. He retrieved it as it was lying on the floor of his truck with heavy steel being loaded upon it. The popular supposition is that the grenade was brought back from the war by some Posey county veteran who either lost or threw it away. Byrd destroyed it.

The Three R's
AND TELEPHONE TAXES
Approximately \$29,000,000 of the money which the people of Michigan have paid for telephone service over the past ten years has come back to them in the form of primary school education for the boys and girls of the state.
That is because taxes assessed by the state against certain utilities, including the Michigan Bell Telephone Company, are paid into the primary school fund. From there the money is distributed among the 83 counties of the state, and helps support the elementary, grammar and high schools.
Money alone could not account for Michigan's high standards of public education. Our state has been fortunate in the men and women entrusted with this work—the superintendents of public instruction, state, county, city; the local school boards, Parent-Teacher associations, and the individual teachers.
This Company makes the largest individual payment into the primary school fund. During the past ten years the Company has paid into the fund \$26,978,000, this year's payment alone amounting to \$2,624,092.47. This is an important contribution to a school system to which is entrusted the education and character-molding of 960,000 boys and girls—Michigan's school children today, her citizens of tomorrow. These taxes are in addition to the Company's Federal and miscellaneous taxes.
