Saturday evening. A fish and chips
supper was much enjoyed by all.

DEATH RATES DECLINE

Declines in the general death
rate, the infant death rate and the
maternal death rate as well as
an increase in the birth rate on
the basis of provisional vital sta-
tistics for 1931 provide a rather
optimistic view of the state of
Michigan's health, according to
Dr. Doa W. Gudakunst, state
health commissioner.

The maternal death rate of 3.56
a 1,000 live births was the lowest
ever recorded in Michigan. A total
of 326 mothers died from causes
connected with childbirth in 1931.
The 1936 rate was 4.30.

Survey Shows Small Decrease in Delinquency

Juvenile delinquency cases
showed a net decrease of six cases
or 1.9 percent, for December 1932,
as compared to the same month in
1931, according to reports on 48
identical Michigan counties just re-
leased by the Michigan Child Guide-
ance Institute at the University of
Michigan.

Fifty-six counties reported for
December 1932, 60 a year ago. The
total number of new cases reported
was 354 in 1932, 304 in 1931. Of
the 48 identical counties reporting
in both years, 27 showed no
change; 11 counties, including
Genesee and Ingham, reported in-
creases amounting to 84 cases; 17
counties, including Wayne, Saginaw
and Kent, reported decreases
amounting to 90 cases—making a
net decrease of six cases in the
identical counties.

The delinquency rate for the 56
reporting counties amounted to
81 cases to each 100,000 persons
for children between the ages of
10 and 16 years. The Institute's re-
port covered \$1.1 percent of State's
population.

U. S. HAS 500,000 DIABETICS

NUMBER MAY DOUBLE

Diabetes claims approximately
500,000 victims in the United
States today and, at the present
rate of increase, will double that
number 10 or 20 years hence, ac-
cording to estimates made in an
article appearing in the current
issue of Public Health Reviews,
monthly publication of the Uni-
versity of Michigan's Division of
Hygiene and Public Health.

The great increase in diabetes in
this country, the article explains

is that many more people are
reaching the age period above 40
years than in past times. Diabetes
it points out, is twice as prevalent
in the period following 40 years as
in the period preceding it.

"Public Health organizations,
both official and non-official," the
article says, "have shown their
worth in the control of tuberculo-
sis. Similar organizations can do
a comparable piece of work in tom-
bating and controlling diabetes."

You Can Depend on the Man Who ADVERTISES

Nine times out of ten you will find that the
man who advertises is the man who most
willingly returns your money if you are not
satisfied.

He has too much at stake to risk losing
your trade or your confidence. You can
depend on him.

He is not in business for today or tomorrow
only . . . but for next year and ten years
from next year. He knows the value of
good-will.

You get better merchandise at a fairer price
than he could ever hope to sell if he did not
have the larger volume of business that
comes from legitimate advertising and
goods that bear out the promise of the
printed word.

Don't miss the advertisements. This very
day they call your attention to values that
tomorrow you will be sorry you overlooked.

THANK YOU!

I wish to express my gratitude
and thanks to all voters who sup-
ported me in the recent primary.

In asking for your support in the
coming general election, I pledge
to further my attempt to justify
your continued confidence in me.

Township Treasurer
