City Baseball Team To Play Four Games In Three Days

Farmington Merchant ball teams have scheduled a busy week end for themselves when they meet four opponents in three days.

On Saturday the team travels to Ypsilanti to meet the Michigan Normal College nine. Two games are scheduled for Sunday. The traveling team will go to Cass Station Park to play the Northville team in an Inter-County League game, and the other squad will play host to the Hartland nine on the Farmington field. On Decoration Day the Farmington Merchants team comes to Farmington for an Inter-County League contest, the game beginning at 2:30.

Last week end the Farmington squads won two out of three games played. On Saturday the Merchants defeated the League leading Cass Benton team in a closely fought 5 to 4 practice contest. Whitehead and Kales of River Rouge won a league contest on

the Farmington diamond, 12 to 3, on Sunday. The traveling team defeated the Novi Merchants at Novi Sunday, 7 to 4.

In the Novi contest the Farmington pitcher, Ralph Candell, allowed only seven hits. The regulars played a strong game against the Whitehead and Kales sluggers, despite the defeat. A bad fifth inning in which the visitors scored six runs spelled defeat, after Farmington held them to a one to one tie for four innings.

Summaries of the week end games follow:

	R	H	E
Farmington	5	12	1
Cass Benton	4	3	2
Novi	7	14	1
Farmington	3	6	2
Whitehead & Kales	12	16	2
Farmington	7	14	1
Novi	4	7	2

Question Box

Editor's Note: This is the sixth in a series of questions and answers on Job Insurance. Today's installment answers the questions of employer. Readers are invited to submit their questions either to this newspaper or to the Information Service of the Michigan Unemployment Compensation Commission, Detroit.

Q. Is there any provision for a refund of contributions when an employer pays by mistake?

A. Yes. The employer may make an application for contribution adjustment or the commission itself may make a refund if it discovers error.

Q. Is the computation of contributions based only on remuneration paid workers in the form of cash?

A. No. Remuneration includes all compensation payable for personal services and includes commissions, bonuses, cash interest, board, room and lodgings of any sort.

Q. How are contributions handled by the commission?

A. All contributions are placed in a separate Michigan Trust Fund held in the United States Treasury where the fund earns interest. This fund—principal and interest—may be used only to pay benefits.

Q. What are some of the forms of remuneration other than money on which contributions must be paid?

A. Furnishing of electricity, water, merchandise, rent-free services, board, lodging, prizes and gifts.

Q. Does the Federal government select commission employees?

A. No. Appointive positions are filled by the Governor and the commission. All other positions are filled from Civil Service lists established by the state.

Q. What is the definition of an employee?

A. An employee is an individual who works for an "employer" as defined by the law.

Q. What is the definition of employment?

A. Employment means service, including service in interstate commerce, performed for remuneration or under any contract of hire, plus any service performed in this state included as "Employment" under the title of the Social Security Act, regardless of the fact that such service may be specifically excluded by other provisions of the Michigan law.

Q. Define the term "administration fund."

A. The administration fund is that fund created in the state treasury to be used solely for the expenses of administering the Michigan Unemployment Compensation Act. None of this fund is a burden on the general tax payer but every dollar of it is diverted by the Michigan Act from the Federal funds that otherwise (under Title IX) would go to the United States Treasury.

Editor's Note: The next installment will answer the questions of workers.

Science War on Crime To Be Told at Fair

Amazing secrets of criminal investigation laboratories will be revealed to the public for the first time in the scientific crime detection exhibit planned for the 1933 Golden Gate International Exposition on San Francisco Bay.

In the huge Hall of Science "green blood," the sensitive chemiluminescent test for the presence of invisible blood stains, will be demonstrated to the astonishment of millions of visitors. Sprayed with diamorphous hydrate, articles stained with blood glow with a green luminosity in the dark.

Garnets, laundered so that they show not the slightest stain, blaze with brilliant green spots in the jet blackness of the test cube when treated with this amber colored solution. Even weapons, brightly polished so that stains of years past are no longer visible, show a telltale greenish glow.

Michigan Deer Hunters Gain in Numbers

That approximately 30,000 more persons hunted deer in Michigan last season than the year before is indicated by the return of license remittances to the state department of conservation from hunters.

Tabulations completed to the first of this month showed 157,349 resident deer licenses sold as compared to 135,742 in 1932. In addition the same accounting recorded 1,216 non-resident licenses sold as compared to 349 in 1932.

A CENTER FOR FOREIGN STUDENTS

One of the unique features of the social life of the students at the University of Michigan is the great number from foreign countries on the Campus. This includes 615 enrolled directly from foreign countries or those born in foreign parentage. Of this number 300 plan to return to their native land. Last semester there were 160 students from China alone, including 33 women.

This great body of foreign students, larger than the total enrollment of many American colleges, is to have a new international center. In the addition to the Michigan Union to be completed in the near future there will be installed special accommodations for the office of the Counselor to Foreign Students, the secretaries of the Barbour Scholarship Committee and the International clubs which have been organized.

Don't Buy Complexion, Eat It, Chemists Say

The home garden is no friend of the beauty specialist where complexion is concerned, scientists tell us, because the properly balanced diet containing vitamins and mineral fresh vegetables will give nature its chance to do what was intended, bring health to the body, and with it, a good complexion.

Vegetables are not the only foods to produce such results, of course, but they are the "deficiency" types, which supply the hidden food elements lacking in so many modern table delicacies. The fact that they are grown at home and can be used fresh from the garden without the loss brought about by being kept out of the ground, makes them doubly valuable for the health and complexion seeker.

STATE HIGHWAY DEPARTMENT AGAIN PROVIDES DUSTLESS ROADS FOR SUMMER VISITORS

A section of calcium chloride treated gravel on state route M-4 near Cedarville, in MacKinnon County. An inlet of Lake Huron may be glimpsed through the trees.

Years that visitors to Michigan are gratifying to know that there will be no holiday in the maintenance of Michigan's fine gravel road system.

While the highway department has made great progress in the construction of paved surfaces on most of the major trunk lines, gravel roads will probably always provide access to many of the state's parks, lakes and other beauty spots.

In the first place, paving of roads that carry appreciable volumes of traffic only during the summer months is economically unwise. Then, too, there

is something about a gravel road — provided it is smooth and dustless — that appeals to the summer visitor. Perhaps it is because a gravel surface seems closer to nature, blends harmoniously with the trees, lakes and streams, and suggests quiet and comfort.

In any event, the thousands of Michigan citizens who benefit directly or indirectly from the state's popularity as a vacationland will join in commending the highway department's decision to continue the dustless maintenance that has made our gravel roads famous.

SORENSEN COW ESTABLISHES NEW OFFICIAL RECORD

A new record, exceeding the average of the Guernsey breed for her age and class has just been established by a three and one-half year old cow, Beatrice Mae, 357139, of Farmington, Michigan, tested and owned by Charles E. Sorensen. Her official record supervised by the Michigan State College and announced by the American Guernsey Cattle Club is 11762.4 pounds of milk and 638.0 pounds of butter fat in class D.

A children's restaurant at the 1933 Golden Gate International Exposition will serve specially-prepared food guaranteed to appeal to youngsters.
