Adrian, an Old Name and

Said to Mean Brave Man
Adrian is a very old name. It is
probably from the Greek and means
"brave," although one authority
asys it is Latin and merely means
"trom Adria." Adria gave its name
to the Adriatic ses, writes Florence
A. Cowles in the Cleveland Plain
Dealer.

Deabr.

Six popes have borne the name.

St. Adrian was a Pretorian guard
converted to Christianity and martyred in the Fourth century. His
day, September 8, is especially observed by soldiers.

Hadrian (as the name was sometimes spelled was emperor of Rome

served by solutors. Hadrian (as the name was some-times spelled) was emperor of Rome in the Second century. In the the Second century in the second century in the which he built in Britain Hadrian's wall, extending from Solway to the Type, traces of which may still be seen. He also built the arch of Hadrian in Athens and Hadrian's omb in Rome, now called the Castel San! Angelo.

Tariffs, Customs Houses

Tariffs, Customs Houses

Had Peculiar Beginning
The first tariffs and customs
houses began in alqueer way. Long,
years ago, when the great rivers
were the principal arteries of commorce in Europel, strong men, who
wished to live by preying on the
industry of their neighbors, built
their castles or forts on the banks
of the Rhine, the Danube and other
rivers, and levied fines or tolls on
all the commerce that passed up
and down these natural highways.
In time this lawlessness became a
custom, hence the name "customs
houses."

austom, hence the name "customs houses."

After a white, kings thought this would be a good way to raise revenue, and they adopted it at the same time abolishing, or greatly curtailing, the activities of the free-bookers. Later still, governing bodies took over this method of raising revenue, excluding by law all others, and while the system was inherently bad, this change remained to the system was inherently bad, this change remained to the system was presen server to stight of the continual residence of the system of the syst

Left-Handed Children

A strange but not altogether unusual phenomenon among schochildren is alforded by the left-handed ehild forced to live in a world
made for right-handed persons. In
right-handed persons, the left lobe
of the brain is dominant, and seems
to direct reading and writing from
left ho right. In left-handed persons, scientists suspect, and in those
neither strongly right-handed nor
left-handed, the natural inclination
may be just the opposite. About lefshanded, the natural inclination may be just the opposite. About one child out of every twenty, gen-eraby a lefshanded one, tries to write backwards, and in reading has difficulty in distinguishing between revorsible words like "saw" and "was."

English Garden in Germany
Germany has a strange and beoutiful park at Munich that occupies
600 acres, and its name is the Edglish garden. Its strangeness arises
from the fact that it was made by
an American more than 150 years
age, one of the strangest of Americans. He was born in Massachusetts in 1733, field to England during
the Revolution, became an officer
of the English army, was knighted
by the king, went to Germany and
was made Count Rumford, and later went to Paris where he forsook
publics for science, in which he
achieved new distinctions. The fine
