

# "Mama! Mama! I Don't Wanna DIE!"

BUT SHE DID DIE! Poor kid, only 8 years old . . . prettiest little girl you'd ever want to see. It was horrible to see her lying in the street . . . bloody and broken. Her Mother hysterical . . . holding her in her arms for the last time. And the man who killed her was there too. He didn't look like a murderer, but you could tell by his face that he felt like one. He just stood there thinking . . . thinking that if he had only been driving a little slower . . . watching where he was driving instead of rushing to get home a few minutes earlier, that child would still be living. But all the "ifs" in the world wouldn't bring that little girl back to life. It was too late!

And pity that driver . . . he will always see that scene . . . his punishment is life imprisonment to a horrible memory. No, Mister, you don't want to be that way . . . just remember when you drive your car that "ifs" can't bring back the dead, or restore the crippled to health . . . drive carefully and there won't be any "ifs!" Please Drive Carefully!

## Award Gold Medal to Head of Phone System

At the annual dinner of the National Institute of Social Sciences, held recently in New York, President Walter S. Gifford of the American Telephone and Telegraph Company was awarded the Institute's Gold Medal for distinguished service to humanity.

The award was in recognition of Mr. Gifford's services "as Director of the Council of National Defense; President of the Charity Organization Society of New York; Trustee of Johns Hopkins University, General Education Board, Carnegie Institution of Washington; Director of the President's Organization on Unemployment Relief; President of the American Telephone and Telegraph Company, the greatest non-governmental organized service in the United States; and as trustee of numerous educational and scientific foundations."

In responding to the presentation of the medal, Mr. Gifford said in part:

WALTER S. GIFFORD

President of the American Telephone and Telegraph Company, to whom the National Institute of Social Sciences recently awarded its Gold Medal "for distinguished service to humanity."

"I like to feel that your award of this medal to me is a recognition that business is an activity which plays an important part in the betterment of mankind, and that a business man, in attending to business, can render distinguished humanitarian service thereby. Those, I understand, are the activities and qualities for which your awards are made."

"I should like to suggest that business men, like others, do not live by bread or material comforts alone and that they, like others, will respond and do their best for the betterment of mankind when their efforts to that end are encouraged."

"America's leadership of the world in well-being did not just happen. Neither is it just because of an abundance of natural resources. It is largely because we have made better use of our natural resources. It is because we have kept opportunity open to all. More than anything else it is because of our encouragement to enterprise and to management, produced more often than not from the ranks."

### Copyrighting the Bible

Only new translations of the Bible are copyrighted in the United States. Anybody may print the King James, or other old versions. In Great Britain, however, a copyright on the authorized or King James version of the Bible rests perpetually in the crown. This version was translated and published at the expense of the crown for the established church of which the king is head. The right to print it is restricted to the king's printer and to Oxford and Cambridge universities. It is still customary in Great Britain and her dominions for publishers who desire to print the authorized version to apply for permission from either the Oxford or the Cambridge University press. The character of publication originally granted by the crown to these publishing houses is recognized and respected by British publishers. This rule does not apply to publishers in America on other countries.

### Healing Properties of Hot Springs

Tradition says that the curative properties of the waters at Hot Springs, Ark., were known to the Indians long before the Spanish explorations; that they warred for them, finally making an agreement whereby all tribes had access to the springs. They were probably known to De Soto, and were visited about 1600 by French hunters and by members of the Lewis and Clark expedition in 1828. In 1832 congress created a reservation to prevent exploitation of the waters for private gain, but litigation ensued which was not ended until a Supreme court decision in 1876.
