highway commissioner, revealed this week that teats have been completed by the Highway Planing Survey to determine safe speeds average cars can be driven on every type of curve. He said the Department is, at work on redesigning its circus eigns so that this information will be given to drivers in symbol form.

In making tests engineers included careful office computations hased on the gravitational and centrifugal forces involved to gether with exhaustive tests with cars on the highways. Twentyone curves with a vide variety of curvature were driven in making determinations. The new size which will utilize the marginary of the commissioner pointed out of the road.

The commissioner pointed out that many roads, were built as long as 29 years ago with curved designed to necomodate speeds of 25 or 30 miles an hour. Many of the more-recently built highways, however, have long, easy, super-levated curves on which speeds up to 65 miles an hour are practicable. In other cases, curves on older roads have been lengthened and banked.

MEMO FOR

NGELICA PEPPER didn't like the stiff, efficient click of the typewriter in the practically deserted office of Pepper Wholesale and Distribution. Inc.

TUESDAY

88

Pepper Wholesale and Distribu-tion, Inc. She didn't like the smug interoffice

memos.

She didn't like this trim efficiency flaunted at her previously pampered existence.

She didn't like it that she had to answer telephones in Papa Pepper's office now that his business was office now that his again on the upturn.

But she did like the chestnut-haired young man who was making two contracts grow where none grew before.

This was old A. J.'s new business management engineer and his name was Jake Fernal.

was Jake Fernal.

Today Jake Fernal would mount the upper rungs on the ladder of success because this afternoon Harlan Franklin, owner of a string of prosperous cutrates in the Southeast, was scheduled to appear per

east, was scheduled to appear per-sonally.

He was expected to sign con-tracts which would mean a foraging trip to New York for Mr. Fernal, a resuscitation for A. J., and incident-ally would put Angelica Pepper back in her natural environment where she might feel free to be appealing to Mr. Fernal.

Up to this time she had not been appealing to Mr. Fernal.
On the contrary.
Now and again there had been an interlude.

Once he had helped her on with

made love and what he'd say if he talked.

It was Miss Persons, the stenographer, who explained to her that he never talked.
"Secred?" Angelica demanded.
"Probably." said Miss Parsons.
"Specializes in letters and sales gags, office routine, Good at it, apparently."
"Good!" Angelica was ironic.

parently,"
"Good!" Angelica was ironic.
"He's cloquent. That memo about
the cosmetics, now. He said, "No
war pt." And the one about the
phones. Tels: routine form. Give a

name. Observe strictly."

She had written him a memo then:
"Are you trying by some error of judgment to make a robot out of me, Mr. Fernal?"

Mr. Fernal?"
And he had come back with:
"Employees not in key positions must not waste memo pads. Pls. co-operate."
"You snake," Angelica said, grinning from ear to ear. She wrote-between telephone calls—"Of course you must be patient with me, Mr. Fernal. Naturally you agree that I do not belong here. Slip of fate, you know."
Mr. Fernal answered quite soberly via a plnk memo:

ly via a pink memo:
"Life is a game of compromise,"
On which Angelica had promptly
demanded:

emanded: "What kind of talk is that, to a

But Jake Fernal would never talk

that way to a lady.
She chuckled about it until Harlan Franklin came in. He looked around with strange disappointment and suspicion.
"Hey what are you trying to will."

suspicion.

"Hey, what are you trying to pill off here. Fernal?" he demanded. "Where's all the office help they say you got? Two girls! Why, they tell me that every time somebody call up he gets a different name. The whole town's saying how much business you must be doing. So why else am I here? It's a racket." He pushed on his hat.

Jake Fernal was goping at him helplessly.

Angelica stood up at the dusty old switehboard and either Harian Franklin back. "I think I can explain." As easid. "This is going to be hard—but I'm not going to have this town saying that snooty Angelica Pepper had to answer telephones in her pa's office. Just a little whim of mine. I answered your old phones, Jake Fernal. I answered to the name of Smith, Jones, Green—anything that popped into my head. So what?"

Jake Fernal didn't say anythine Angelica stood up at the dusty old

Jake Fernal didn't say anything. He'd probably surmount this Jake Fernal didn't say anytung, He'd probably surmount this grave crisis by dashing off a memo which Harlan Franklin could read at his leisure—when he was doing business with somebody else, per-

aps. Franklin was looking at her con-

haps.
Franklin was looking at her contemptuously. "People in business ought to have a standard," he said.
"People can't do business without standards. But society women in business—they don't know nothing about the rules. Well Tim on an honest business—they don't know nothing about the rules. Well Tim on an honest business—the business—they was pressed into silence by a large, muscular young hand which rested upon his beaving chest.
"Mr. Franklin—" Mr. Fernal was saying, drmly, "let me ask you what this has to do with our transaction. You are here to deal with a concern whose reputation is based on half a century of performance. We are prepared to fulfill every item in any agreement we make." Jake indicated a littered desk. "Time is limited, You may not prefer to do business with an old line com-

pany like Pepper Wholesale. How-ever, it was nice of you to call, and—" he opened a door, "good day

ever, it was nice of you to call, and—"he opened a door," good day to you, Mr. Franklin."
Mr. Franklin, was being propelled outward with the general technique of a burn's rush. "Now, now, Jake."
Mr. Franklin protested, unctuously, "I didn't say I wouldn't sign no contract here. Maybe I am a little hasty-."

"I didn't say I wouldn't sign no contract her. Maybe I am a little hasty-"
He smiled. Jake Fernal smiled. It was in the bag. Angelica stood there tingling and looking at Jake Fernal.

"Jake, you're marvelous!"
Jake smiled at her, a frosty impersional smile that was worse than contempt, had thought. But he said, "Nice of you to stand up, Miss Pepper, Good girl. But of course you see the wisdom of using your own name. Now Ir. Franklin..."
Angelica fell brushed off.
Jake Fernal was a secious young business executive with a 'job on his linguids angles he was a silly girl. She plugged in a signal "Pepper Wholesale and Distribution". Then she sait lost in hought.

After a while she was barely con-

thought.

After a while she was barely conscious that Jake Fernal had come bouncing out of his office.

He stopped in the middle of the outer room as if halted by some

outer room as it halted by some troublesome indecision.

She watched him go back into his office and scribble something.

Long after he had gone out she gotjup to examine what he had written. Incredibly this man had in these few hours become a legend.

A trace citizen.

these few hours become a legend.
A rare enigma.
She read: "Angie's eminently oke.
Find out if free to accept. If favorable try to close deal for H. M.
in New Yrk. Departure, Tues. C.
H. ploses 5:30."

n. closes 5:30. "
Angelica did a lot of speechless clutching at pens and pencils. Presently she inscribed an indignant addendum:

AND IF YOU'RE LATE THE
M. I. C. SOMETIMES ISSUES
THEM AT THE HOUSE. YOU
BIG FAKE!

ANONYMOUS
And then she went home and incred her nighties.

Eyebrows and Eyelashes
Supply Much Information
There is a science of eyebrows
and eyelashes.
It has long been recognized, however, subcensciously, by artists,
novelists and beauty parlor operators that both of these fall into
definite types and that they may
tell a good deal labout the history of the
individuals, asys a writer in the
Things his from the old masteristic Property. Czechoslovakiani anthropologist, has published a
scientific eyebrow and eyelash elassification. He finds that there are
definite sex, age and perhaps personality differentiations.
Thus, he points out, "in the paintings of Da Vinci and Titian, and
also in primitive and some very old
classical art, such as the Egyptian,
we's see decidedly feminine eyebrows with a very hish position and
decidedly nog and curved eyelashes to
give the face a full ferminine and
decidedly go and curved eyelashes
to give the face a full ferminine and
complete the second of the contension of the control of the contension of the control of the contension of the contension of the confollows the same trend. Flum accentuated double form in the inen. The
modern fashion of shaving eyerbrows
and painting them in a high position
follows the same trend. Flum actresses, especially by
means, make their eyelashes long
and curved to accentuate the young
and c

town.

A curious thing is that the color of the eyebrows generally is the same as that of the hair and, that both color and form tend to be hereditary, while the color of the eyebrows seems to have no relation, to the color of the hair and the form is not demonstrably hereditary.

Artificial flowers are made from the inside out, put together by hand even in large factories. They are used not only for a fastion. He was a fastion and the factories of glass dowers to the factories of glass dowers and the

Very Little Pure Iron
There is very little pure iron as
such in nature. Ore is really a nort
of rust—iron exide. Burn out the
oxygen in the form of this exide
and we have iron. Unfortunately,
the ore is combined with other elements besides oxygen. There are
carbonates, silica and alumina, the
chief components of ordinary clay.

Puerto Rico a Flower Garden
The tropical Island of Puerto Rico
is a veritable garden, with 3,353 varieties of brilliantly colored flowers
growing on its mountains and coasta
plains.

License Rush Expected By Managers

Branch Managers throughout the State are preparing for the rush to purchase llcense plates, when some 60,000 motorists will trade their black and white half year plates for the black and green full year plates. In the past more plates have been sold in the last three diy period before the deadline than in the whole period alloted for the sale of license plates at half price. Motorists are urged to purchase

sale of license plates at half price.

Motorists are urged to purchase
their plates as early as possible.

They will not only benefit themselves by not having to stand in
the line, but will enable the department to operate without hiring extra help.

Every-gush means the spending
of hundreds of dollars for extra
clerk hire.

Titles
"People spend money for a lawyer to examine the title and abstract of a vacant lot, which sometimes cepts less than an automobile", says Leon D. Case. "But
when it comes to purchasing an
automobile most buyers are very
negligent and sign papers without
finding out what they are signing.
They sign contracts for hundreds
of dollars and then sign to have
their titles sent to someone other
than themselves.
"Motor car owners are eautlaned

for their own good to read what they are signing and not "sign here" just because some one tells

them to. Many car owners would have less trouble and more money in their pockets if they would have done just this.

"The Michigan Automobile Title is a valuable document, protect it as you would any other valuable namer."

CHANGE OF ADDRESS

Ample notice of change of address should be given when moving. Notice should be given before changing if possible.
