Minnesota Education Is Going Streamlined

Education is going streamlined! Because newspapers, magazines, movies and radio play such a vital part in the life of the average person today, Thomas T. Blewett, Wyhona (Minn.) High School English department head, has introduced several changes in the language arts curriculum this year to study the organization of these institutions.

"The newspapers and magazines are forms of literature often approaching the greatness of classics and therefore well worth our study in schools," Mr. Blewett said. "It is important that those means of entertainment and communication are approached intelligently." The new units of study will include an analysis of the organizations behind the newspapers, broadcasting corporations, and movie producers to reveal to the pupil many facts about the product of these agencies as it is given to the public.

Charlie McCarthy Says: "Let 'er Go!"

Charlie McCarthy, in spite of college degree and national acclaim, is like other bright little boys when it comes to trains and locomotives. With an engineer's cap set firmly on his head, he places his hand with customary aplomb on the throttle of the SUPER CHIEF to pilot it on his thrillest return to Hollywood.

Charlie McCarthy and Edgar Bergen look pleasantly down from the cab of the Santa Fe's big Diesel as they wave to friends.

FEDERAL ACTIVITY IN MICHIGAN IS TOLD BY DIRECTOR

An itemized record of Federal activity in Michigan from March 1933 through June 1933 to show results obtained from the loans and expenditures made on the work relief and public works programs, was released recently by Abner E. Larned, State Director for the National Emergency Council in Michigan.

In listing the 21 major Government agencies participating, together with a brief summarizing of their activities, the statement points out that these Federal programs have been carried out with the cooperation of State, county, municipal and local bodies.

186 Projects
The Public Works Administration, through loans and grants, has completed 186 projects covering the following: 81 schools, 26 water works projects, 19 disposal plants, and other projects of wide description. Under its current program the Administration has appropriated thus far some \$21,000,000 for new projects in Michigan—a vast program of schools, hospitals, disposal plants, dormitories, water-works systems, bathhouses, swimming pools, community buildings, libraries and jails requiring a total expenditure of \$45,000,000.

The Works Progress Administration has constructed, through its works program, more than 1,400 miles of new highways, roads and streets; improved 5,000 miles of other roads, and constructed 169 highway bridges. A total of 483 new public buildings was erected, and 1,700 additional buildings were improved; nearly half of the 1,700 buildings improved were school buildings and 166 were recreational buildings. The remainder included 42 courthouses, offices and other administrative buildings.

Detroit To Ionia Trip Took Settlers 18 Days

It is only three hours by auto mobile from Detroit to Ionia in 1933.

It was 18 weary, trail-building days by oxteam for Ionia's original settlers in 1833. Federal Writers' Project workers in Michigan have learned.

After seeing the land and purchasing a section through the White Pigeon land office in 1832, Samuel Dexter returned to Herkimer, N. Y., and formed a colony. The party of 63, including six families, came by canal to Buffalo and forwarded the bulk of their goods by water to Grand Haven, following in another boat to Detroit, where they landed May 10, 1833.

Reach Pontiac
Leaving Detroit with two horse wagons and four oxen, the caravan reached Pontiac May 14, camping where night overtook them. Cutting trails, skirting marshes, and fording streams, the colonists reached the Grand River near Lyons May 25 and continued along the Indian trail to their destination with the death of a child of the Dexter family the only fatality. The old records reveal, on the present site of Ionia, the party found a considerable village of Pottawatamies occupying five bark wigwams and partly cultivated plots of melons, squashes and corn. These the settlers purchased and occupied. Settlement of Ionia followed legal creation of Ionia county by two years and preceded by three years its designation as county seat.

SWINGING BASKETS TRANSPORT SOME SCHOOL CHILDREN

American boys and girls will go to school this winter in everything from automobiles and dog sleds to baskets swinging across a steep canyon.

Some live in such remote places that schoolhouses will be taken to them and parked for the term. The National Education Association said that going to school does not always mean taking a bus or walking a few city blocks with a couple of safety patrol boys to help at street corners.

Boats
One hundred and seventy-four pupils of Cobscook River School in Oregon and many at Solomon's Island school in Maryland use boats for transportation. Children from several islands in the Gulf of Mexico are carried to school in Lee County, Florida, by motorboats.

A large truck with sled runners for front wheels, called a snowmobile, pulls a 40-place sled full of children to a school in Bancroft, Idaho. In Caribou County, Idaho, dog sleds are used.

In Lemhi County, Idaho, several pupils cross the Salmon River gorge twice a day in a basket which hangs by a pulley from a heavy cable.

School Terms
Crane school in southeastern Oregon serves a district in which some of the homes are almost 200 miles apart. So the children don't go to school daily. They move there for the term and live in a dormitory.

Children in the isolated wood-cutting camps and ranches of Lin-

coln County, Montana, go to a trailer schoolhouse. The building is mounted on an auto chassis and transported in early fall to an accessible spot. There it stays for the winter.

In areas with more passable roads, the school bus is the most frequent vehicle for school transportation at public expense. Approximately 3,000,000 children will be transported to and from school this winter by 80,000 school buses.

A mid-west editor runs the following at the top of the front page of his paper: "We only print news, we do not make it. If you don't like the kind of news we print, don't make that kind."

A&P FOOD STORES

A Buying Guide

Before you order a dinner in a restaurant, you consult the bill-of-fare. Before you take a long trip by motor-car, you pour over road maps. Before you start out on a shopping trip, you should consult the advertisements in The Enterprise. For the same reasons!

The advertising columns are a buying guide to you in the purchase of everything you need—including amusements! A guide that saves your time and conserves your energy; that saves useless steps and guards against false ones that put S-T-R-E-T-C-H in family budgets.

The advertisements in this paper are so interesting, it is difficult to see how anyone could overlook them. . . fail to profit by them. Just check with yourself and be sure that you are reading the advertisements regularly—the big ones and the little ones. It is time well spent . . . always.

Avoid Time-Wasting, Money-Wasting Detours On The Road To Merchandise Value. Read The Advertising "Road Maps"
