

Postal Facilities Many, Lee Says

Postmaster Norman Lee told in last week's Enterprise of the delivery service that parcel post provides for rural shoppers. This can be used by telephoning or writing an order in to a local merchant and asking him to have it at the post office before 9 a. m. If this is done it will be delivered that forenoon, except for a few boxes which are not reached until 1:30 p. m., Mr. Lee says.

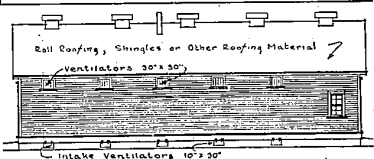

The state highway department this week sent vouchers to the Auditor-General totalling \$2,000,000 for payment to counties in accordance with the provisions of the McNitt township road law. Under the McNitt Law, \$1,000,000 is returned annually to the counties to assist them in maintaining former township roads. The township roads have now been taken into the county road systems. The \$1,000,000 comes from gasoline tax revenues. The allocation to Oakland County was \$34,195.87.

"ORPHANS OF THE STORM"

Fleeing a tornado near Clyde, Texas, parents of these babies were killed, their automobile tossed a quarter-mile away. Hours later a telephone lineman heard a child's whimper in a roadside ditch. There he found 3-year-old Jesse Donald Rutledge, water up to his chin, holding his 3-month-old brother Darryl's head above water. Relatives being unable to care for the orphans, Red Cross workers arranged a maintenance fund to support them until they are 16. A Texas college promised scholarships and ranchmen started a herd of cattle for their benefit. The Red Cross will help the boys make adjustments as they grow older.

EXPERT TELLS HOW TO STORE ONIONS PROPERLY

Whether in June or January, the demand for onions knows no let-up. Many dishes, both humble and aristocratic, owe their tastefulness to this basic "flavor" food. The grower who would meet this year's round demand, however, harvests his onions only once a year and must somehow protect them successfully against changing temperatures if he is to get better prices when onions become less plentiful. Storage facilities become increasingly important as farmers recognize that it's good business to hold the finest stock for late winter deliveries.

Onions must be well ripened when stored. Plenty of ventilation, coupled with a temperature of from 60 to 80 degrees, should be maintained in the storage house during curing time. The onions should be stored in crates in such a manner as to permit the free circulation of air around them. The necessary movement of outside air through an onion storage house requires properly spaced ventilators both at the floor and ceiling levels so that when the vent doors are open a current of air can continuously rise up and out. Experts have a homely method of determining when onions are sufficiently cured in storage. At this stage, they say, onions will "rattle like blocks of wood" when poured from one crate to another. After the onions have been cured

the temperature of the house should be reduced to about 35 to 40 degrees and held there. To be able to cure and then hold proper temperatures, an onion storage house should be constructed along lines suggested by the United States Department of Agriculture. Agricultural engineers state that in addition to adequate ventilation, insulation built into walls and ceiling is necessary to offset climatic temperature changes. Insulating board is recommended as being the most practical and economical. However, one should take the precaution to select an insulation board that is weather-proofed moisture resistant and protects from attack by dry rot and termites. Experts estimate that for a stored crop of 1,500 bushels a house 16 by 36 feet in size will be needed. For a 30,000 bushel storage the house should be 32 by 72 feet.

Al Ghesquiere, sophomore half-back of the University of Detroit Titans, has one of the longest and most useful punts in the school's football history to his credit. Against Purdue, he stood on his

NEW MERCURY 8, TWO NEW FORDS FOR 1939 SHOWN

The newest car in motordom—the Mercury 8—is being shown at Olin Russell's salesroom, 23234 Grand River. It is the Ford Motor Company's representative in the lower medium-price field, for it fills a place in the Ford-Lincoln line between the DeLuxe Ford V-8 and the Lincoln-Zephyr.

Also being shown are the two finest Ford cars in the 35 years of the company's history. The cars are the 1939 Ford V-8 and the 1939 DeLuxe Ford V-8. Both have hydraulic brakes, and so does the Mercury.

Introduction of the new Fords climaxes a year of activity which saw the company embark on its current plant expansion program, bring out its entirely new Mercury 8, and establish the Lincoln-Zephyr still more firmly as the acknowledged style leader in the automobile industry.

The DeLuxe Ford V-8, with wholly new streamlines, has a distinctive appearance of its own. At the same time, both it and the Ford V-8 share a family likeness with the Lincoln-Zephyr and the new Mercury 8.

The DeLuxe has a deep hood with long lines unbroken by louvers, low radiator grille in bright metal, and wide-spaced headlamps set into the fenders. The words Ford DeLuxe, in script letters of chrome, are divided at the front of the hood. The Ford V-8 for 1939 has a full grille and unobtrusive louvers at the rear of the hood sides. It has the same chassis as the 1939 DeLuxe, or a 60 horsepower motor can be used.

Ten Million Trees Is CCC Fall Goal

Hundreds of CCC enrollees are at work throughout the forest lands of the State in the annual fall reforestation program.

A goal of approximately 10,000,000 trees has been set. Whether this many trees can be put in this fall will depend on how soon cold weather comes. The planting was started Sept. 19 and will continue as long as the weather remains favorable.

The CCC enrollees were given special instructions in planning throughout the summer and again just before the work was started this fall. During the summer the enrollees also prepared thousands of acres in scalping operations which consisted of removing the ground vegetation from spots about 18 inches square. The young trees are planted in these "scalped" areas. In the more open spaces some preparation was made by furrowing with tractor and plow.

Approximately 20,000,000 trees were on hand at the state nursery at Higgins lake, ready for planting this fall and next spring.

"LONG DISTANCE"

"Long Distance" is the quick and easy way to reach out-of-town relatives, friends and business associates. It is economical, too. Rates for calls to most points are lowest every night after 7 and all day every Sunday.

Miscellaneous Silver Night

You may be able to secure any PIECE OR PIECES you are short of, to complete your silver set.

DETROIT'S Outstanding HOTEL VALUE

Large rooms tastefully furnished to insure solid comfort—in a location that can't be beat for convenience—at rates which are surprisingly economical.

DUTCH SUSAN Electric Cooker

Your kitchen isn't complete if you haven't one of these handy appliances as an adjunct to your range! It will do so many things better... cook tough cuts of meat to tenderness, bring out new and unsuspected flavor in roasts, save time and trouble in the preparation of meals. It's amazing what this compact electric cooker can accomplish!

\$19⁹⁵
Rectangular Model
(Other styles \$9.50 up)

Simply plug it into any electric outlet, and it will fry eggs, steaks, chops, etc.; bake bread, cakes, pies, pastries, biscuits and muffins; steam vegetables, fruits, puddings. With an 18-quart capacity, this large cooker will prepare as much food as you can cook in the oven of a full-sized kitchen stove. In fact, you'll enjoy using it instead of the large stove, for many of your meals. Its cost of operation is about 2c an hour. Several styles and sizes are available, from \$9.50 up.

Convenient—cooks a complete meal for 10 people, all at one time

See these electric cookers on display at hardware stores, furniture and department stores, electric appliance dealers and at all Detroit Edison offices
