Bear and Four Cubs Is
Surprise to Naturalists
SEQUOIA NATIONAL PARK,
CALIF—A mother bear with a
quartet of cubs was seen at the
bear feeding grounds here. Naturalists report this is the only case or
record of a bear giving birth to four
offspring.
Mother bears are very jealous of
their own infants, and never permit any other cubs to play with
them, so it is considered unlikely
that this one adopted part of its
family. The four are all brown and
marked like their parent.
