

LOSEY CORNERS

Mr. and Mrs. Robert Fredericks, Jr. and Mrs. L. A. Mansfield and Miss Edna Tamm were Saturday evening dinner guests at the home of Mr. and Mrs. Walter Dixon of Breton Road, Walter, who has been in Scout work for the past two years, recently transferred to the Sea Scout, and was most entertaining as he described this new interest. Mrs. Dixon, long known to her friends as a musician, proved herself a fine cook and a gracious hostess as well.

Tuesday, December 12, at Denton school. Parents are invited to attend these meetings and enjoy the programs planned.

Girl Scout Troop 29, are studying a group of songs under the direction of Mrs. George Timerson.

Mrs. John Hughes who has been conversing at the home of her parents, Mr. and Mrs. John Natta, is returning to her home in St. Louis, much improved in health.

The P. T. A. is working on a very interesting Christmas program, and with the cooperation of the teachers, expect to present a program of school talent that will be most enjoyable as well as giving the public the chance to see the fine young artists in our community.

Mrs. Robert Fredericks, founder and president of the Woman's Aid, resigned her office at the last meeting, due to poor health. Much regret was expressed and wishes for a speedy recovery were made. Mrs. William Foster will fill the

office for the remainder of the year.

Mr. Roy Davis has just added an attractive legged porch to his home.

Livon Garden Club will meet

December 12 at the home of Mrs. Timerson on Middle Belt, next to the Savoy Kennels. Time 2 p. m. Election of officers will be held.

ANGELS' MESSAGE

Tinsel that gleams in the candle light,
Evergreen trees and holly bright,
Ribbons tied in a big red bow,
Stockings stuffed to the tip of toe.

By all these tokens we may know
'Tis Christmas time with hearts a glow.

Let us pause to think of the long ago
When Angels sang and a star burned low
To lead the Magi to a manger bed,
Where the baby Jesus lay.

Peace on earth, good will to men,
Was the message to all the Angels sung.

A vision we see in the candle glow
While the bells ring softly across the snow;

If a Merry Christmas we all would know,
Good will to others we must show;

So we sing along to the Angels sung,
Glory to God, Good will to men.

—Mrs. Robert Fredericks.

BETTER YEAR IS FORECAST FOR STATE FARMERS

Operators of the state's 196,000 farms can afford to be optimistic about prospects for 1940.

The opinion of R. V. Gunn, Michigan State College agricultural economist, prices for most farm products should average higher than they did in either 1938 or 1939. His survey is a result of studying probable demands and supplies and estimating Michigan's

condition for the next twelvemonth. He has probed possibilities of production and consumption and he has taken war factors into consideration.

"Demand for farm products is expected to be considerably stronger in 1940," says the economist. "Reasons are found largely in prospective increases in domestic income levels."

"Don't expect a runaway market because of war conditions. Europe is much better supplied with food and other materials than in 1918. Even so, it could expect war price increases we ought to remember that during the World War of a quarter century ago farm prices did not advance materially for the first two years."

What about Michigan's beans, winter wheat, livestock, potatoes, dairying and poultry?

Here are some of Mr. Gunn's deductions on probabilities: Winter wheat acreage appears to be about the same nationally as was needed for harvest in 1939. Unfavorable drought conditions have tended to support wheat prices, with increased demand abroad by abundant supply which apparently will be carried over into 1940.

Bean supplies are about the largest on record. There likely will be some decrease in bean acreage in 1940. Normally it is expected that prices for beans in the 1940-41 season will be higher than the average for the two preceding seasons.

Potato acreage is expected to increase. Present market conditions indicate the remainder of the 1939-40 season will average higher than the 1938-39 season. Foreign trade will have little effect but consumer purchasing power will be a factor.
