### OLD SPRAY DRUMS SAVE FARMERS' FIELD FROM GULLY

A huge gully formed during one cloudburst no longer threatens to destroy valuable truck land on the farm of Fred Carter, Berrien county, thanks to old spray drums.

The spray drums, together with soil conserving practices and planting of black locusts, have eased the wrinkles of worry from Mr. Carter's brow—his field is now safe.

It happened this way: To reduce the amount of water entering the gully, the fields above were cut strip cropped and old spray

drums used to construct a drain pipe or flume for carrying surplus water out of the field. Both ends were cut out of each old drum, and one edge was crinkled, like stove-pipe, so that the drums could be fitted together. The drums were bolted in place, and the joints filled with plastic asphalt. Two coats of asphalt paint were applied.

A reinforced concrete catch basin was built at the top end of the drain, together with two diversion channels to lead the water into the basin. A stilling-basin of reinforced concrete was built at the lower end to prevent damage by the discharge from the spray-drum flume. The drums were covered with earth, and the gully reforested with black locust. A fence was built to keep out livestock for the protection of the plantings.

The gully, Mr. Carter recalls, was formed during a cloudburst in the summer of 1934. It was 60 feet long and 15 feet deep, and by 1937 was 100 feet long and had eaten back 35 feet into the truck land at the top of the ravine. Mr. Carter has been a cooperator with the soil conservation service since 1937.

### GOSSIP-GRAMS News and Views on Air Personalities

By Jim Lepper

ELSA HITS her hobby of talking to the driver while riding in a taxicab proved to be rather expensive recently when she was on her way to a rehearsal of the "Ellen Randolph" series. (Broadcast Monday through Friday, 1:15 to 1:30 p. m., over an NBC network.) Besides making her late to rehearsal, the driver became so interested in showing her photographs of his daughter that he overbilled a red light, and by request, had to "pull over."

Elsa Hitz

HAVE you ever wondered what

happened on at 8:00 a. m. re-

hearsal? Here's a glimpse of

the Pretty Kelly cast at that early

morning hour. Clayton Col-

lier, who plays Mike Conway,

studying his lines, while

Arline (Kelly) Black-

burn, making

into the studio late, wearing mis-

matched stockings, the result of ar-

riving early after a late broadcast

the night before. (Scene Mr. Wally

Hooty at a special microphone. Six

feet four inches in height, he towers

above the rest of the cast of the

program. This is the scene, Monday

through Friday at 10:00 a. m., EST,

over CBS.

SEEKING always to present to

radio listeners unusual women in

outstanding fields of en-

deavor, General Electric, for its

cost-to-coast "Hour of

Charm" broadcast on Sunday

nights at 10 o'clock, selected

to its twelfth "Woman of the

Week." Major Julia C. Stimson,

president of the American Nurses' As-

sociation, and the first woman ever to hold the

rank of major in the United States

Army. The program which features

Phil Spitalny and his attractive all-

girl orchestra originated from New

York's Radio City, and marked the

orchestra's return from a three

week's tour of the middle-west.

### New Device Will 'Talk' But Encounters Difficulty

Sir Richard Paget, inventor of a machine that talks, seems to have confused for a time his inventive genius and his ultimate goal; but out of his works may come in the end an improvement in methods of human speech. His machine leads air through a tube to various mouth pieces, and by pressing the bellows with his foot and placing a thumb before the orifices he makes the apparatus utter a few simple words, says the Philadelphia Evening Bulletin. All right so far; but it is the hardest way to talk ever demonstrated with success.

On the other hand, Sir Richard philosophizes that, culturally, human speech is thousands of years behind the times. He notes that speech is the natural result of gestures of the mouth and jaw, capable of 144 variations, but that the upper arm, forearm, wrists and fingers together can make 700,000 gestures. To complicate speech by sign language would generally annoy all except tourists in a strange land, but the talking machine has a mission if finally perfected.

Radio, for example, would become more popular if all announcements were broadcast by a robot voice. All would sound alike; no peculiar hates would be attached to voices under general classifications of silly, raucous, nasal, flippant, guttural, staccato. Elimination of vocal personal cannot be attained by transcriptions, but a mechanical voice could do the trick.

On the hustings a good, durable mechanical voice could be fed a speech covering all issues, which could be sent from town to town spreading the argument without injection of any personal element. It could be used to speak unpleasant sentences in court, answer the telephone when one wants to report himself not at home, and for other purposes to which an individual voice is not fitted or from which it shrinks or grows hoarse.

### Tiny Animal Aids Study Of Cell's Regeneration

A discovery in cell regeneration, a leg-making factory in a small animal which grows 12 or more legs every time one is cut off, was reported recently at the American Association for the Advancement of Science.

The leg-making was described by William Balamuth of the University of California. He found it in a very complex, tiny animal, named stylocyba. It has many legs, usually about a dozen, all primitively formed by combination of cells, which are hairs of living protoplasm.

When one is lost, the factory makes an entire new set, there being no organized nervous signal system to inhibit overproduction. The "factory" produces the materials for new legs. These substances seem to migrate to the sites of legs. There the old limbs dry up and the new ones sprout. The same "factory" does the same thing for the missing hairs which the animal uses to sweep food into his mouth.

The discovery shows there probably is only one mechanism capable of doing this kind of work and scientists do not know how to create one.

### Seagoing Aviary

A seagoing aviary, built up over a period of 20 years by Capt. John Stamperius, visited Seattle aboard the motorship Dellddyk of Rotterdam. The 40 specimens in the cages that line the walls of the lower bridge were rescued from probable death by the kind-hearted captain after they tried while flying over the sea and alighted on the ship. Normally they would have starved to death or died from exhaustion. The collection includes Japanese thrush, saffron finches from Colombia, a Holland blackbird that is a fine singer, two Cuban doves, several kinds of canaries, two Clarke's crows and other species. The crows are a puzzle to ornithologists as well as the captain. They landed on the Dellddyk in the middle of the Gulf of Tehuantepec, off Lower California, where the weather is tropical.

### Meanings of Colors

Each of us has a preference for some particular color, but not all of us know why. A slight knowledge of the meaning of color will help us analyze our likes and dislikes. It is wise to consider the characteristic properties of individual colors before we proceed to change the color combinations in our homes. Red, for instance, symbolizes vitality, energy, power. It is highly stimulating. Blue signifies tranquility. Psychologically, its influence is quieting. Yellow symbolizes light, cheerfulness. Green soothes, yet exhilarates.

### Elephant 'Fish' Story

The game department of the Uganda protectorate in East Africa confirms, in its annual report, a strange hunting accident in which three elephants were killed through the firing of a single bullet. While standing on a steep slope, No. 1 was shot, fell and started to slide downward. An instant later, No. 2 stepped directly in the way and was swept off its feet. Both falling animals then struck No. 3 and all went tumbling to death in the valley below.

### TOWN HALL TO PRESENT ACTRESS JANE COWL

Jane Cowl, Broadway star of "Smilin' Through" and "Lilac Time", two of the biggest stage hits of recent years, which she also co-authored with Jane Murnin, will open the after-Holiday season of the Detroit Town Hall in the Fisher Theater Wednesday, January 10, at 11 a. m. In her first Detroit stage engagement, the star of "First Lady," "Art and Mrs. Bottle," "The Road to Rome," "Within the Law," and one of the theater's best known "Jullets," will present dramatic excerpts from her famous roles.

Elsa Maxwell, previously scheduled for this date, will speak before the Town Hall February 7, it is announced by Kathleen Snow Stringer, director. The postponement is due to Miss Maxwell's recent Hollywood assignment to make movie shorts during January.

H. R. Knickerbocker, world famous war correspondent just back from the front lines, will speak January 17. His subject will be "At the Ringside of History." Other January speakers will be biographer Carl Van Doren, January 21, whose subject will be "The American Imagination" and Dr. Donald A. Laird, psychologist, who will speak January 31 on the question "Why Introvert or Extrovert?" Com. Edward Ellsberg, naval and submarine authority, comes February 14 to discuss "Submarine Warfare Today." Stanley High will talk on "America's Tams vs. Americanism," February 21. Muriel Draper, internationally known for her novels, will discuss "The Art of Conversation," February 23. William Lyon Phelps, an annual favorite, has chosen "How to Live with Yourself" as his subject, March 6.

### Registered Guernsey Bulls Sold by Sorensen

A registered Guernsey bull has recently been sold by Charles E. Sorensen of Farmington to Hawthorn Farm at Libertyville, Illinois. This animal is Cesar General's Marquis 2700.

Another bull was recently sold by Sorensen to M. L. Witz of New Lisbon, Wisconsin, Milo E. Niles and Edward F. Maurer of Mauston, Wisconsin.
