(The Trenton Time?) In the ancient Spripturedive are told that the days of a mirs life are three score years and ken. We have become so accustomic life eracting seventy as the finit of human life, that it comds as a surprise to most of us to Forn that ciccene not only, holds out koronize that the time is at hand when the average man for young can ex-pect to live long beyond seventy, but also provids that the average acc of the American people has been increasing stadily for many Years.

are of the American profile has been increasing steadily for many years. By taking the records of births and deaths, and the age at which rach person dies, he United States Census Office has compiled a table of "life expectancy", which is shows us some very interesting facts about ourselves. In the year 1900, for example, the average hoy hay could expect to live only to 48, but by 1930 the expectation of life for majes had jumped to 53, and the latest vital statistics indicate that the next tables will show a higher average diffe expectancy than that. Girl bables, start life with an action high the concern of longevity, the aver-lage woman living three years long-er than the average man. Some of the remaons for this longer life of Ampricans are plain enourph. Eables get better medical longer to file of ampricans are plain enourph. Eables get better medical long of few of the in Infaby. Also, the general health of grown-ups is better than it us its lo be. Except for war and the stjat influ-hart a million Americans, and 25 million in the rest of thy world, there has been not wholesble causo of death in forty years, to shorten the life of any great number of people.

the life of any great number of

being conquered. With more people living to grow up, and then living longer, the average American is coshiderably older than in the days of our grandfathers.
