### Peace Plank

(Christian Science Monitor).

The Republicans at Philadelphia attempted to take upon themselves the mantle of a "peace party" and to push the Democrats into a corner labeled "war party." President Roosevelt neatly escaped from that box when he declared that the new defense program would be used for no European wars. Now Senator Wheeler and others are putting great pressures on the Democratic convention at Chicago to fashion a "peace plank" which will win the isolationist vote.

We believe this would be a disservice to the Democratic Party and to the Nation. From the war's standpoint it would lose the favor President Roosevelt has won by his diplomatic resistance, to totalitarian aggression. And from the standpoint of intelligent debate of American foreign policy any pretense by either party that it is offering peace to the people is deceptive and stultifying. The very fact of a new defense program shows plainly that no one can guarantee peace to America.

Everyone wants peace. Anybody would vote for peace. But if the parties attempt to "sell" themselves to voters on promises to keep out of war, they will merely conduct what Herbert Hoover called an "auction" instead of an election. They will be pandering to one of the weaknesses of democracy at a time when the United States should be demonstrating the strength of self-government. We do not believe the people will be deceived. They know that the people of other countries also wanted to keep out of war. They know other peoples made war more certain by failing earlier to unite against aggression. They know that the question is really, how can America best defend its interests and ideas?

### Luxury Travel for Less?

(Exchange)

The anti-trust suit announced by the Government against the Pullman Company brings into question several practices which seem to withhold advantages of modern, low cost travel to Americans and which may or may not be justified.

One is the alleged resistance of the Pullman Company to introduction of lightweight, streamlined cars made by competitors of its own manufacturing company. The company, through a subsidiary, manufactures all its own cars and some other equipment for railroads while at the same time engaging in the operation of sleeping cars on practically all American railroads. Whether through its operating arrangements it has exerted undue pressure on railroads to prevent their adoption of lighter cars, which would be more economical to pull, is largely a question of fact for the Department of Justice to prove or the company to disprove.

There is another aspect of the matter, however, which will interest the ordinary traveler and which may be affected at least indirectly by the anti-trust suit. This is the comparison between "coach" fares of approximately 25 cents a fare which railroads now collect on Pullman car travel. The difference between these fares is about 50 per cent, or often more than the berth or seat charge which must be added. Railroads say this is necessary since Pullman traffic involves hauling more cars per hundred passengers. But that consideration might be modified by lighter cars.

In the light of the reductions which have been made in coach, bus, and air travel costs during recent years, this situation has operated to leave sleeping-car or parlor-car charges up on a shelf, apparently somewhat out of line with the others. It is true that the Pullman Company has been progressive in the introduction of new and ingenious designs for its cars and that it has provided America with a sleeping-car service relatively much more available in price to the average traveler than similar services abroad. Yet some investigation of the possibilities may bring out useful possibilities.

### vacuum cleaners can't be wrong.

Not in an age moving toward lightning the housewife's burden. That number is reported as sold in the United States in May, to set a record.

Today largely because of this and other adaptations of the electric motor, homemakers are being relieved of much of the drudgery which until two-score years ago, was regarded as the housewife's lot. The little "power box" has been taught to perform a multitude of time-and-labor-saving tasks. It washes and dries dishes, does family laundry and ironing. Because of it, woman's place is no longer endlessly and wearily "in the home." And the home can take its proper place as a center for interests not necessarily bounded by "four walls."

### "1066 and All That?"

(Exchange)

Looking around for new fields of "fronts" to conquer, the Nazis are reported to have discovered one in British history. It is reported that they are going to write English history in the way they think it should, as the little boy said, and "written." And to achieve the effect that the little boy's blunder suggests, they are going to use passages of self-criticism from great English writers.

But there is nothing worthy of the Nazi "new order" in such a project. The job has already been done, as is proved by the existence of source material for the German study. It has been done, let it be noted, by Englishmen who could say what they pleased about the system under which they lived.

Such writers already have provided the sort of "history" which the Nazis seem likely to produce. In "1066 and All That" one may read a volume possibly as accurate. Here there is a note for would-be conquerors of the British Isles in the author's typical observation that William the Conqueror managed to drive some Britons back into the hills of Wales, thus causing them to become Welsh, and that it is now considered doubtful whether this was a "Good Thing." There are several things the German leaders are doing today which may some day be considered similarly mistaken by their own people.

### Reading as Practiced

(Exchange)

It is disturbing educators that, having been taught our letters, we will not all of us use them well and purposefully to read with. Pennsylvania State College has decided from available statistics that at least half the population has no interest in reading. A survey by the American Council of Education says that "the ability to read well and purposefully can no longer be taken for granted." A writer in a magazine for teachers mentions as harmful "our present assumption that all six-year-olds are ipso facto ready to read."

Ipsi fact was commonly taken for granted by educators in the little red schoolhouses, who could read would read, starting with the Primer and so on through more mature literature. Those earlier educators, for one thing, had never seen the exhibit of literature in the apothecary's magazine department; they assumed that reading would ipso facto have the same results for the reader as were currently attributed to early reading and early to rise.

But what is interest in reading? There are nowadays magazines to help authors, and a casual examination of a list of "markets" for them shows a number of interests that educators probably do not hold high as conducive to good and purposeful reading. Thirty-one "detective" and "gangster" magazines; twelve "true confession" magazines; fourteen "romantic loves." . . . And newspapers: the other day told a commencement gathering that the newspaper is "one of the greatest aids to vitality we have!"

The newspaper, one infers, can be read well and purposefully, for enhanced vitality, or carelessly and to no purpose at all. Such interest in reading as the educators have in mind is necessarily an important objective of the whole curriculum, almost anybody of more advanced age will agree that a six-year-old is not ipso facto ready to read.

Magazine prayer service Wednesday at 7:30 p. m.  
Teaching, preaching and singing the gospel of Christ.  
Everybody Welcome.

Christian Science Society  
New High School Auditorium  
Farmington, Michigan

"Truth" will be the subject of the Lesson-Sermon in all Christian Science Churches throughout the world on Sunday, July 29. The Golden Text (Ps. 108: 1, 4): "O God, my heart is fixed; I will sing and give praise, even with my glory . . . For thy mercy is great above the heavens; and thy truth reacheth unto the clouds."

Among the Bible citations in this passage (Ps. 108: 1, 4): "Rejoice in the Lord, O ye righteous: for praise is comely for the upright. For the word of the Lord is right, and all his works are done in truth."

Correlative passages to be read from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, include the following (p. 287): "Truth cannot be contaminated by error. The statement that Truth is real necessarily includes the correlated statement, that error, Truth's unlikeness, is unreal."

Lake Superior, bordering Michigan on the north, is the largest body of fresh water in the world. From the Wisconsin border on the west to Sault Ste. Marie on the east, Michigan has 492 miles of frontage on this lake.

### SAME OLD "CURE"

IT'S WONDERFUL! REDUCING MEDICINE!

OH, YEAH? I'VE TAKEN THAT DOPE FOR OVER SEVEN YEARS AND I'M AS BIG AS EVER.

A cartoon illustration showing a man standing on a large scale. The scale is labeled 'UNEMPLOYMENT' and has a weight of '10 MILLION' on it. The man is looking at the scale with a speech bubble saying 'OH, YEAH? I'VE TAKEN THAT DOPE FOR OVER SEVEN YEARS AND I'M AS BIG AS EVER.' Above him is another speech bubble saying 'IT'S WONDERFUL! REDUCING MEDICINE!'.

### WEST POINT PARK.

Mrs. Elmer Heichman, with her sister, Mrs. Lionel Coffin of Plymouth, returned home Sunday, after spending a week with their parents, Mr. and Mrs. Peter Keller, of Farmington, Michigan.

Miss Shirley Zwalen was the guest Friday of Miss Olive Grimwade in Detroit.

Miss Maxine Mead of Frankfort, is spending her vacation with her aunt, Mrs. Elmer Heichman.

J. R. McEwan, Jr., of Detroit, was the week end guest of Don Heichman.

Miss Marjorie Heichman was the week end guest of the Zels at their cottage at Houghton Lake.

Miss Ruth Gagnon of Farmington was the Saturday night and Sunday guest of Miss Gloria Heichman.

Mrs. Austin Ault entered Mt. Carmel Hospital Sunday evening. She expected to undergo a major operation.

Mrs. Lena Strassburger, whom many of her old-time West Point Park friends have had the pleasure of greeting, while she visited her mother, Mrs. Lebbie Mansfield, of Middlebelt, returned last week to her home in Connecticut.

As a result of a foot injury sustained while about her household duties during the week end, Mrs. Clinton Ault is suffering much pain and inconvenience.

Mr. and Mrs. Harold McVicar, son Harold, were Sunday dinner guests of Mr. and Mrs. Max Bergin of Howell.

Forrest Ault, late of West Point Park, but now of Jackson, Mississippi, and who in connection with his college work, has been studying aeronautics the last two years, notified relatives here this week

that he has made his solo flights and is now a qualified pilot.

Charles Decker, son Charles, Jr., of Detroit, were Sunday dinner guests of Mr. and Mrs. William H. Zwalen.

Friends of Rev. and Mrs. Gordon Cameron, who do home missionary work in the Polker Subdivision section have received word that the pair have been enjoying a delightful vacation at Lake Avalon, near Hillman, Michigan. They expect to return much refreshed this week and will as usual attend the Sunshine Bible School which meets at 7:45 p. m. Sunday afternoon in and around Grandma Ault's cottage.

Clinton Ault, who has been suffering with a severe attack of rheumatism, is much improved.

Miss June Vance is spending a week with relatives in Detroit.

Edwin Johnson and family, accompanied by Lora Ann Ault of Jackson, Mississippi, and Leo Woods and family, of near Inkster, are spending a few days at Mr. Johnson's cottage in the lake district near Lansing.

Mrs. Albert Owen, who has been ill for the past week was taken to Highland Park General Hospital Saturday, expecting to undergo a major operation.

## MAY PLANT TROUT IN UPPER PENINSULA LAKE.

Lake trout are what the institute for fisheries research, of the department of conservation, prescribe for improvement of fishing in Lake Michigan.

Lake trout should thrive in this big lake, of 4,360 acres, with cold water in depths as great as 72 feet, the institute reports. It recommends planting lake trout nine to 12 inches long, where previous plantings of this species have been only of small fish. Six thousand adult smelt were planted last year.

Institute surveys found only 20 per cent of the lake shoal, less than 15 feet deep, with plant life relatively scant. Scattering of brush shelters in water five to 15 feet deep is suggested for encouraging the forage fish population, and protecting the young of game species.

Though now the most abundant fish in the lake, perch may have to be regularly stocked for maintenance. Crappies, smallmouth bass and pike are next most abundant in that order. Walleyes are rare, in spite of plantings totaling more than six million in five years. Lake conditions have been found unsuitable for sunfish, bluegills and, largemouth bass.

## W. A. Blume Cow Sets New Milk Record

A new record, exceeding the average of the Guernsey breed for her age and class has just been completed by a two year old cow, King's Holly of Belmont 50887 of Farmington, tested and owned by W. A. Blume. Her official record supervised by The American Guernsey Cattle Club is 103,856 pounds of milk and 490.9 pounds of butter fat in class "GQ." The club also reports the sale of a registered Guernsey bull by Charles E. Sorensen, of Farmington, to Lawrence Robison of St. Rapids, Mich. This animal is, Cesar Jupiter's Royce 255240.

Gypsum was first discovered in Michigan in 1827 near the mouth of Plaster creek in Kent county.

## SLEEP LIKE A PRINCE

in a house cooled for 5c a night!

If you have ever tossed and turned in a hot, stuffy bedroom until four o'clock in the morning, trying in vain to sleep, you will be thankful for a discovery that brings the cool outdoors right into your room . . . making it refreshingly comfortable. You will be doubly thankful when you find that this method of cooling your entire house costs only about 1/5c an hour!

So effective is this type of cooling—lowering the temperature as much as 7 to 14 degrees in the evening, depending on the outdoor temperature—that it is hard to believe you can accomplish it with nothing more than a giant fan in the attic. Do not confuse this fan with an ordinary fan, however. It is a special type of fan—very large—and its quiet, powerful blades are capable of producing a complete change of air in your house every few minutes. Prices vary from \$50 up (installation extra).

The principle on which it operates is simple. The attic fan draws the warm air in your rooms upward to the attic and discharges it out-of-doors. At the same time, a flood of cool night air is pulled in through the windows and gently circulated through the house—making the rooms delightfully comfortable and assuring long hours of restful sleep.

Department stores, electrical dealers, and fan dealers will gladly give you full information about this low-cost method of house cooling. Telephone today. The Detroit Edison Company. (We do not sell or install this equipment.)
