You'll open your eyes, when we open our doors. You'll find a new type seat, roomier, softer, more comfortable than any theatre seat you ever sat in. You can stretch and relax to your heart's content. And it will be cool, regardless of what the weather conditions may be outside. When the question of a cooling system arose, we decided to go the limit. No expense was to be spared to bring you the coolest comfort on the hottest day. Perfect visibility on the new, large silver screen, with perfect sound from the very newest super-sensitive sound equipment and scientifically tested acoustics will guarantee your enjoyment of the fine programs offered. Any seat you may select will offer you easy vision. All these plus beautiful surroundings, refined, clean atmosphere, courteous service, cool comfort, soft seats, make the CIVIC THEATRE, in Farmington a show place fit for a king.
