The Fortunate Accident

By JANE OSBORN

MARTHA was preoccupied as she drove home from the office that Saturday afternoon. For Martha, who had been driving her little car only six months, it was quite necessary to concentrate all attention on the road ablead and the geam-before formed. Stream Sanuel Stovens was the youngest of the young lawyers who frequented the old law offices a was the youngest of the young lawyers who frequented the old law offices at which Martha was employed as stenographer.

That morning, Samuel had somewhat falteringly asked Martha to go to an important football game; that afternoon, and with her dainty head held rather high Martha had declined the invitation. Samuel, jooling decidedly hurt and embarrassed, had mumbled out something to the effect that he had only asked her because he happened to have the tractic them.

Martha felt as species of annor-

tickets and it seemed a shame to waste them.

Martha felt a species of annoyance at this rather ungallant speech of his! Also she felt annoyance with herself for having declined the first of the state of the state

asking sarrun, to produce her license.

Then Marthal felt a strong ateady
hand upon her arm. "Excuse me,"
said a clear voice beside her, "yet
said a clear voice beside her, "yet
said a clear voice beside her, "but
"Martha looked and saw the calm,
atrong face of Samuel Stevens. He
seated her again at the wheel, took
the number of the trolley car and in
parting shook hands with the mytorman. He had been going horie on
the trolley when the accident occurred—not caring to go to
tagain without her.
Passengers piled beack clinic the
rolley white horse shoop street for
ward her light car and breathed a
sight of deep relief to know that Samuel was at her side.
"I saw it all," said he, "and have
the names of witnesses. The frolley
wan't even scratched but there's
about a hundred dollars worth of
damage all told to your car. Fault
of the cointy, road should have
been repaired or barred. They'll
courte you ought not to have turned
to the left that way."
"Sknow it," said Martha, "but
the side of the strong of the strong
was a thinking of you." Then
suddenly Martha felt weak and exhausted. She drew her can to the
right out of troffic and stopped. "I
was just thinking of you." Then
suddenly Martha felt weak and exhausted. She drew her can to the
right out of troffic and stopped. "I
was just thinking of you." Then
suddenly Martha felt weak and exhead against Samuel's shoulder and
shedding tears on his rough coatmile without the slightest hest istalian
of embarrassment Samuel's strong
arm encircled her.
"T've only done what any man
would have done—for any woman,"
said Samuel. "But I wish I could
have done and to more. Because I
love you. I ought not to have be a

too the left them." in any upon her arm. Excuss me, single clear voice beginde her, will happen to be this lady's layers. It happen to be this lady to be completed by the layers. It happen to be the lady the later of the layers of the layers. It happen to be the layers of the layers. It happen to be the layers of the layers. It happen to be layers of the layers of the layers of the layers. It happen to be layers of the layers of the layers of the layers. It happen to be layers of the layers of the layers of the layers of the layers. It happen to layers of the layers of the layers of the layers of the layers. It happen to layers of the layers

Building Profitable Pastures on Michigan Farms

CHICAGO.—How Michigan farmers can obtain the most profitable results from fall-seeded pastures was described in a statement issued here by the Middle West Soil Improvement Committee.

"The farmer's primary job," says the statement, "is to get a good stand of idynamic and grasses, and the statement, fart of all, to propare the seedbed early so as to kill as many weeds as possible.

"Next, it is vital to have the soil steed for lacidity and to determine whether it is jadequately supplied with phosphorus and potata. Whether the stand is ja good or poor one will be dejarmined by the presence or absence of plant food.

State [Colleges Co-operate.

will be defarmined by the presence or absence of plant food.
State Colleges Co-operate.
"Agronominate at state colleges, or county agents are prepared to co-operate in making these tests and providing recommendations covering the use of fertilizers on pashire crops in a rotation.
"In gentral, because of permanent in the fall will pay for itself many times ovest in producing earlier and more succulent grass for spring graing, as well as a more sturdy root system, encouraging heavier growth.

Journal of the producing earlier and provided the producing earlier and more surchylent grass for spring reading, as well as a more sturdy root system, encouraging heavier growth.

Journal of the producing earlier and present and pressers is manifold. Thousand the producing earlier and grassers is manifold. Thousand pressers is manifold.
