APPLE STAMPS  
BRING GRADE  
IMPROVEMENT

The Michigan apple harvest is on! And with it, the promise of finer, better Michigan apples for the markets than ever before.

For forty years, efforts to promote increased sales of Michigan apples by advertising have been met with the query, "Why advertise until we improve the grading?" While the argument is not without some merit, the majority of progressive growers with a pack they are proud to sell have seen that Michigan would never have an apple advertising program if they just sat back and waited for the grading problem to cure itself.

Leading apple growers agreed that a program of compliance with the Apple Advertising Law was the best solution for enforcement on grades. They felt that state inspectors, while checking for apple stamps, could see that packs were labeled and graded in accordance with Michigan regulations.

For the truth of the matter is apples in this state never had the benefit of a concerted inspection that would require compliance with grading and marking laws. It was not until a sentiment was built up to bring about compliance with the Apple Advertising Law that the state inspectors began giving any serious attention to apple grades.

Today progressive apple growers throughout the state are thanking the Baldwin "Apple Advertising" Law for a marked improvement in Michigan grades.

For example, a recent survey of Detroit Eastern Farmers Market reveals it is for the first time standard practice there to label each pack as to grade, minimum size, variety and grower name using the Michigan State Apple Commission's combination grade and apple advertising card. Once a grower has declared the grade in this fashion, he is required to live up to it. Practically the same story can be told of Grand Rapids Wholesale Market.

At the Denton Harbor Market, there have been more arrests and seizures for overloading and other grade law violations so far this season than there were altogether in the preceding three years.

As one grower puts it: "The Apple Commission's program, entirely aside from the obvious benefits of advertising, is more than paying for itself by forcing an honest pack in these market places."

Not to take any undue credit for itself, the Michigan State Apple Commission wishes to acknowledge with enthusiasm the support which the Commissioner of Agriculture has extended. Formerly in charge of foods and standards inspection himself, Leo V. Card singles out the enforcement of grading and marketing measures as the most important feature in Department of Agriculture activities.

5 Children on 1 Nickel  
Brings Slight Congestion  
NEW YORK—A slight case of congestion developed when five Bronx children tried to jam through a subway turnstile, on one nickel and it took a police emergency squad to extricate them. Carefully disposing themselves in the non-too-roomy compartment of a self-service turnstile, they began to push when the last one in dropped the coin into the slot.

One girl caught her head between two bars. The crowd drawn by her screams brought patrolmen with crowbars. Police sergeant delivered a lecture.

The commandments of God are the bread of life for the nations.—Roswell D. Hitchcock.

Nature's Recipe for Bumper Crop

CHICAGO—Soils that grow sick crops will respond to the right treatment, once the ailment is diagnosed and the correct prescription selected, according to a statement of the Middle West Soil Improvement Committee.

"Nature, itself, provides most of the clues in making a diagnosis," says the statement. "Soil fertility is dependent on an adequate supply of nitrogen, phosphorus and potash. When any of these three is absent, tell-tale signs manifest themselves in the physical appearance of growing crops.

Tell-Tale Signs.

"A lack of nitrogen results in stunted growth. The young seedling will exhaust its food supply from the seed soon after germination. Then, having removed what little it can from the soil, it ceases to grow. Leaves become thick and brittle. A low yield of poor quality at harvest completes the story.

"Phosphorus deficiency shows itself in slow growth and lateness of maturity, in stunted plants, discoloring leaves and poorly formed kernels or fruit.

"When potash—the balance wheel of plant foods—is missing, growing plants are an easy prey to diseases, parasites and extreme variations of temperature. A complete lack of potash may result in a 'blight' sweeping over an entire crop.

"Plant food deficiencies, in many cases, can be corrected during the growing season by side-dressing the plants with fertilizer. The most certain help, however, is to have soil tests made which will reveal what plant food elements are lacking. Then fertilizer analyses can be selected that will meet the nutritional requirements of growing crops."

Girl Scouts to Sell Doughnuts October 31

A doughnut sale will be held by the Girl Scouts of Farmington on October 31, under auspices of the Local Council of Girl Scouts. Funds from the sale will be devoted to the furtherance of the scouting program in Farmington. Orders for the doughnuts will be taken in advance by the Girl Scouts, and delivery of the orders will be made October 31. Mrs. Warren Joy heads the committee in charge of this project.

Rev. and Mrs. Graupner Observe Golden Wedding

The Rev. and Mrs. Paul Graupner, 23095 Middlebelt Road, celebrated their golden wedding anniversary Tuesday, October 14 with a family dinner party at their home. An open house for friends could not be held because of the poor health of Mrs. Graupner.

Five of the seven living children were present: Misses Lillian and Martha Graupner, at home; Mrs. Emma Gugel, Detroit; Mrs. Louise Meyer, West Point, Pa.; and Arthur Graupner of Columbus, Two sons, Carl of Toronto, and Oscar of Minnesota, could not be present. A fourth son died several years ago. The Graupners have 11 grandchildren, part of whom were present Tuesday evening.

Many flowers and plants were received from relatives and friends both far and near. Members of the family presented the honored guests with a gift of a purse.

The Mid-Winter Conference of the American Legion of Michigan will be held in Pontiac this year. The tentative dates are set for December 6 and 7.

One more installation of officers and every post in the District will then have their 1942 officers. The last installation will be in Berkley on Friday, October 17, and every one is welcome to attend. A good time is assured, for His Honor the Mayor is a good Legionnaire, and will see to it that all guests are royally entertained.

The installation at Redford-Detroit Post last Friday is one that will be long remembered by all who attended. Mason Giberson was installed as Commander of the Post. Comrade Giberson did the Groves-Walker Post a good turn during the Gala Days program by helping on many occasions when the Post was short of help. Good luck, Mason, and we of the Groves-Walker Post wish you a very successful year.

Carson Baldwin, Junior Vice-Commander of the Post, who was unable to attend the installation of officers due to his being called away to Oskanoma City, Oskanoma, for a conference of Michigan Unit parades and extreme variations of temperature. He was entertained by the Oskanoma City Legion Post, and they showed him a wonderful time.

Mr. Baldwin stated the Federation set-up is similar to the Legion in its makeup—the different officers, local and regional, and the Districts, States and National. Their membership at the present time is around 200,000 members.

Were you ever back, Carson, and hope that during the coming year you will not miss any more meetings. Thanks to Comrade White for taking your place on October 2.

Miss Isabel Steele will be the speaker when the High School League of the Farmington Methodist Church holds its regular weekly meeting Sunday at 6 p. m. in the church.

American Legion Notes

The Groves-Walker Post is making a good showing in the bowling league of the 17th District. They are in third place at the present time. Alred Rocco is Captain of the team. Other members are Leon L. Church, Carl Goers, Alfred Smith, Joseph DeVriendt, W. B. Gamble, Fordon Miles and Frank W. Lewis. The eight members of the team take turns in making up the team of five. This team bowls every Wednesday night at the Birmingham Recreation at seven o'clock.

The Groves-Walker Auxiliary will hold their first card party on Saturday evening, October 25. These card parties will be held in the Legion Home on Grand River Avenue in Farmington.

One more installation of officers and every post in the District will then have their 1942 officers. The last installation will be in Berkley on Friday, October 17, and every one is welcome to attend. A good time is assured, for His Honor the Mayor is a good Legionnaire, and will see to it that all guests are royally entertained.

Shift Grazing Service

WASHINGTON—Transfer to the West of the entire grazing service headquarters staff, involving 67 government workers, to obtain space for defense activities in the crowded national capital, was announced recently by Secretary Ickes.

This was the first move of an entire bureau, made in response to the administrator's request to find government space here for defense activities.

The space vacated by the grazing service will be occupied immediately by the new office of the petroleum coordinator for national defense.

While a few of the grazing service's functions would be divided among various field offices, location of the new headquarters would not be announced until leases now being negotiated were effectuated, Mr. Ickes said.

Richard H. Rutledge, director of the service, recommended the transfer after Mr. Ickes laid before the staff the need for additional space in the capital.

The service has 2,074 field employees besides the headquarters workers. The service was created by congress in 1934 to restore the depleted range in 10 public land states.

While a few of the grazing service's functions would be divided among various field offices, location of the new headquarters would not be announced until leases now being negotiated were effectuated, Mr. Ickes said.

Richard H. Rutledge, director of the service, recommended the transfer after Mr. Ickes laid before the staff the need for additional space in the capital.

The service has 2,074 field employees besides the headquarters workers. The service was created by congress in 1934 to restore the depleted range in 10 public land states.
