...Help Speed War Calls!

THIS picture is to remind you that you can improve your own telephone service and lend a hand in speeding important war messages if you avoid those "peak" periods—10 A. M. to 12, and 2 to 4 P. M.—when telephone lines are likely to be overloaded with calls.

Michigan Bell now is handling an average of more than 5,000,000 calls

daily—many thousands more than ever before. War calls must go through, even though it is becoming increasingly difficult to meet service needs as readily as in the past. By doing your telephoning at off-peak hours, and keeping your calls as short as possible, you will be helping to speed the messages that are vital to victory.
