No Tin Mined in U. S.

There is no tin of any commercial importance mined in the United States. Since the beginning of statistical compilation in 1902, the tin production has amounted to only about 300 tons, all of which has come from cassiterite in South Dakota.

Suitable Track Suits

Better fitting and more colorful track suits for women athletes are being urged in Great Britain.

When You Have Guests

There are more than 40,000 different ways of seating eight persons at a table set for eight.

WOUNDED WAR BIRD RETURNS HOME

SOMEWHERE IN THE PACIFIC—Official U. S. Navy photograph—hit by Jap bullets, this SBD-3, a Douglas Dive Bomber, is pictured after it returned to its carrier. The skill of American workmanship has shown up time and time again when planes like the one pictured have returned from battle held together by mere threads. Note that although his plane is a mass of bullet holes the pilot sits in the cockpit unharmed and undaunted.

What You Buy With WAR BONDS

Hiller found out that his high powered mechanized and motorized army bogged down in the snow and mud of the Russian Winter. Although our Army is largely established the cavalry horse is still a highly essential factor in this mounted division and in the Field Artillery. The Army also maintained remount farms where many cavalry horses are bred and maintained.

These select horses cost from \$100 to \$165 and our crack cavalrymen are expert riders and carry on the traditions which have followed the cavalry from the earliest days of the Army. Purchase of War Savings Bonds will insure good mounts for the Cavalry. You and your neighbors buying War Bonds and Stamps regularly every pay day can help buy these horses for the U. S. Cavalry. Invest at least 10 percent of your income in War Bonds.

Little Funny Step

The term gargoyle is derived from a French word meaning throat, and is applied to the spouts placed on the roof gutters of Gothic buildings for the purpose of carrying rain water from the walls. Gargoyles came into use about the end of the Twelfth century and from the Thirteenth to the sixteenth century they were given fancifully, terminating in grotesque shapes of animals or human heads.

Same Everything.

Hawaii and Puerto Rico are both at approximately the same latitude, have the same climate and grow the same crops, with sugar cane the chief crop of each.

STEALS LIGHT—

keep your lamps and fixtures clean!

If someone were robbing your coalpile or raiding your cupboard or stealing valuables, you'd take prompt measures to stop the thief. But there's a culprit who may be stealing electricity right in your own home—and perhaps you aren't even aware of it! Dust on your lamps and fixtures can prevent you from getting all the light you pay for. It can cut down the amount of light in your rooms, 10, 20, 30 per cent—equivalent to wasting that much electricity. And it's easy to overlook because the bulbs are usually hidden under lamp shades or in semi-enclosed lighting fixtures.

Lamp bulbs and reflector bowls should be cleaned frequently with a damp cloth, lamp shades dusted inside and out. Dark-colored shades soak up light and should be replaced with light shades or shades with white linings. This may give you as much as 50 per cent more light. Use the RIGHT SIZE BULBS in your lamps and fixtures—not too large, not too small. Too large a lamp may cause glare, too small a lamp gives inadequate light. Move your lamps closer to the point of use, so that they shed their light more directly on your work. And finally, use adapter shades and linings to modernize your present equipment. They will help you get more light for the same amount of electricity, they cost little, and they are easily installed. They bring good lighting results while conserving materials—important in today's war economy. The Detroit Edison Company.
