AVOID DISAPPOINTMENT
GET LATEST LINE EXTENSION
INFORMATION Today!

☆ Federal regulations now in effect, and subject to change, place
severe restrictions on the extension and enlargement of our lines.
Line extensions require materials that are badly needed for war ...
and war needs must come first.

To avoid possible disappointment and inconvenience, check with
our office at once as to how these restrictions will affect you if you
are planning—

1. To move into premises which do not have adequate
gas service available, or
2. To occupy newly constructed premises, or
3. To request additional service at your present loca-
tion (for a range, water heater, etc.)

Under these regulations we are permitted to do very little (in many
cases, nothing) toward extending or enlarging our lines or service.
Service cannot be extended to any building unless it was ready to
receive service before July 1, 1942, or, in the case of new construction,
unless the main foundation was completed prior to July 1, 1942.

Even though the building can qualify under these War Production
Board rulings, it must be within 250 feet of an existing line, for an
extension may not go beyond that limit.

We will exert every effort to serve you so long as it can be done
within the wartime restrictions. However, the most we are able to do
under present conditions may not be enough to meet your needs.

So check with us immediately if you are planning to take any of
the three steps listed above. It may save you a lot of time and trouble.
