lot less butter and coffee and meat and fruit than we wanted. But coffee rationing has begun. You're lucky if you can get more than a quarter pound of butter, and canned goods rationing has been an nounced. So it seems that we, the privileged people of the earth, are going to have to pull in our belts and really do without!

But think what a difference! We're not going to stint ourselves on butter and meat because we're pro ducing less of these supplies. We're actually pro-ducing much more of most of them. And we're not being cut down in order to build the materials needed for war because war production was increasing any how. But today America is fighting with both guns and butter.

One reason for our early successes in North Africa was because the people of those countries wanted food and machinery which they knew we could send them. Our allies can continue to fight so successfully only as long as we can supply them with food they can't provide for themselves, and, as our own armed forces increase, more food is needed for them also.

So the job of the manufacturers of this country is going to increase as victory draws nearer. They must continue to pour out the weapons of war, and at the same time increase the supplies of food that must go overseas. It's a colossal undertaking. But with the farmers, the food industry, and our transportation system working together at peak efficiency it can be done. We can produce more food than we've ever produced before and at the same time increase our production of guns.

Only a nation with energy, vision, and industrial "know how" could put over such an undertaking.

Military Secrets

Due to the fact that plans are being made for a new building. Sunday services are held in P. T. A, building, back of Pierson school Seven Mile, near Farmington Rd. Watch for information under "News of West Point Park" each week Military secrets, particularly in vital Michigan war production areas, will be in danger unless the public understands this one fact: That every American, regardless of who he or she is, has an important part in guarding wartime knowledge.

The fact that you learned something or heard it casually or read it in a letter that bears no official seal of secrecy doesn't mean that it isn't important, according to the Office of War Information. Make yourself a self-appointed security officer. Don't give the enemy the benefit of the doubt.

Eye Strain in Hostery Mill Faber Birrep, industrial color con-rulant, tells of a well-lighted hostery mill which still had many complaints of beadsche and eye-strain from wörkers who had to loop threads over a sarties of fine needles. It was noted that the needles simply "stood out", in space; equipping the machines with side and back panels of light garwible corrected the conmachines with side and back panels of light gray-blue corrected the con-

Insects Have Color Preference The preference of Japanese bociles for beclie traps pained yel-low instead of the greed formerly used has been estimated to result in the capture of 50 per cent more boctles. Files don't like blue, which is a good reason for painting kitch-ens and other rooms in dy infested houses in the sauge color. Ants are believed to prefer red, which may be a tip for any inventor.

SUNDAY 10 a.m., Bible School, all ages. 11:15 a.m., Morning Worship. A teries of messages on the present world conditions as seen in how Cod is working out his plan in this

TWENTY FIVE VEARS AGO (Friday, January 18, 1918) Worst Biltzard in Years The worst storm in years struck this section last Friday night, the incrury dropping to 10 below zero, accompanied by a fitcree gale and snow, tying up all traffic and business. The storm showed no balan-ment until late. Sudday afternoon and caused mutch suffering and in-convenience. Pred Briggs, on the Nichols farm started for town with the milk Saturday morping and became snowbound a short distance north of tows, and which reached by relief parties was nearly exhausted and would midoubledly frozen to death had not Mr. Nichols sent a relief party to his assistance.

party to his sesistance. School in Water Works Hall At a john meeting of the village Council and the School Board last Thursday evening it was defided to fuir over the second story of the water works hullding for temporary school quarters, and work was commenced mediately on the remodeling of the hall. Hours Limited Word came Thursday noon ordering in business places and storss in the village to houd their places open only inte hours a day, in cou-formity with fuel conservation rules. Prevident Francis notified each business place in town that the order must be adhered to.

TEN YEARS AGO (Thuraday, January 12, 1933) Defer Declsion on Police Plan Discussion of the proposed cobperative police plan in the Farming-ton area will optimule into next week, it is expected that Sheritt Roy Reynolds will attend a meeting or the Township Board next Thee-day to uiscusk the plan has hed did before the City commission last week. Minister Plant to Leave Church A change is to take place in the administration of Salem Evanget. cal thurch masmuch, as the resignation of Rev. H. Neidenhoefer was accepted at a meeting of the entire congregation of the church atter morning services last Sunday.

FIVE YEARS AGO (Thursday, January 13, 1938) New School Bang Leader Named Citizens of parmington and especially those interested in musi., will be graved to hear of the interniet of Rahph Lanta, High School Music Director for the jast two years. Mr. Hanta will join the Detroit School system, Mr., Banta's position will be tilled by Mr. Alvin Banta's Dottion will be tilled by Mr. Alvin

City Acts to Recover lilegal Taxes

City Acts to Recover Hight Taxes Immediate steps with be taken to recover Lovert Laxes apparently Illegally pair by the taxpayers of the City of Parmington from 1956 to 1931, inclusive, as a result of a resolution passed at a meeting of the Lity consultsion Monday evening. Despite the recent beauses sump, taxes bok in the Township and the City, are being paid at a inster rate than last year according to lite reports of the tresturers. Township taxes are more than 30 per vent paid, also in the Lity more than 15 per cent of the total levy has been collected.

VICTORY

Land crew childs, who have been cretified as job instructors in some cretified as job instructors in some cretified as job instructors in some source in the second second second million men and women are at work. In about 1,900 of these plants labor-management commi-ters are actively engaged in Arth-ering the training and upgrading of war plants is now given free to workers. In addition to the expansive pro-gram of training within industry, preeuployment training joutsides of war plants is now given free to 160,000 persons throughout the country. But to reach our 19-3 production goal of more than 330 billions for war, we'll med from 1520,000 to 500,000 more prespective war workers taking outside pre-liminary training. These herecom-imated at up 0.2500,000 needed to raise our pay roll of war employees them 1.760,000 to about 2,000,000 by the end of next year. These fauses, morever, take no account of several million war workers who will be gradually withdrawn from industry under the 'manning tables' plant to enter the armed services.

Job Control

ervices. Job Control It is evident, by fairly simpla calculation, that we are jentering a phase of the war program on the bome front which will require the most caroful large-scale and de-tialled planning if we are to avoid a "manpower famine." A condition of a killed-labors scarcity that would keep our production almost sta-tionary while our military setab. Itshments expended in every d-icetion would produce a situation similar to the woeful maneurers in the fail of 1940, when our fields-need in yeapons, tunks, and planes. It is plain, therefore, that (Continued on Page Seven)
