## Letters To The Editor

January 28, 1943

To the Editor:  
Farmington has had several bad fires during recent weeks, and there has been a considerable property and personal loss.

The Farmington Fire Department was called, and there is no doubt but what the volunteer firemen who answered did all they could, but what we are wondering is where are the firemen?

A Township resident just the other day said that if a fire occurred in his home, he doesn't feel that he would even call the fire department, but would do whatever he could do himself—it would be just as effective.

What has happened to our firemen? Sure, they were volunteers, but they were paid to answer calls, weren't they? Aren't we, as taxpayers, entitled to fire protection?

As near as we can figure it, Norm Barrons seems to be the fire department, with an occasional secretary or third member on the truck, and is asking too much of our Commission to take steps to get some firemen who will answer the call when an alarm is sent in?

—A Taxpayer.

To the Editor:  
It seems there is talk about a new style for lightening the visibility of women and girls who walk along dimly lighted streets,

so they won't be hit by cars. What about the defense workers who walk all over the place in the morning? The new idea is for girls to wear white anklets, as white is more visible at night. Of course, at this time of year, long stockings are in order, and show up even better, unless leggings are worn over them. School children are said to be greatly taken up with the craze for white stockings, in the East where the idea started. The idea is fine, but wouldn't it be a good idea for all who venture forth at night, to wear a visible color? Black, brown, and most all other colors are best by day, and folks wear them, but give no thought to the night.

The writer of the article I refer to must have experienced some of the near-hits that take place between pedestrians and cars in the dark hours, but he made no provision for men in the new safety drive. Maybe we are supposed to carry white canes.

—A Defense Worker.

## 4 TIMES AROUND THE WORLD TO READ YOUR METER!

To read the meters of all our customers just once, meter readers travel by automobile over 100,000 miles through the cities, villages and farms of 58 Michigan counties.

You can see what savings of gasoline, tires and automobiles are made by reading the meters only once every two months instead of every month.

These savings mean something to Uncle Sam. And they mean something to you as a customer. For by prolonging the life of Company automobiles we keep in position to maintain essential service to your home and the place where you work.

Your bill for the month when your meter is not read represents a payment on account and keeps the account from piling up on you.
