

THE BLUE AND WHITE

OVERTIME BRINGS DEFEAT TO FARMINGTON

Overconfidence brought Farmington its first defeat of the season on the home floor. The final score was 34-32. At the end of four quarters of play the score was all knotted at 22-22. A three-minute overtime was played, and Burns, of Milford, took the ball on a beautiful breakaway for the deciding basket.

A capacity crowd saw a Milford team, seeking revenge for earlier defeat, catch Farmington off its feet and prove a strong opponent throughout the remainder of the game. Beautiful shooting brought Milford from behind on the occasional and took her on to victory.

Two minutes after the opening whistle the score was tied at four all. Milford held a 16-11 lead at the first quarter. At half time Milford still led 20-17. In the second quarter F.H.S. soon knotted the score at 25-25, but Milford's lead was more basket, to lead 27-25. The fourth quarter brought the crowd to its feet in many plays. Hutton's boys added 7 points and led 32-21 with 20 seconds to play. A foul at this point enabled Milford to tie it up at 32-32.

At the overtime period Milford's shooting netted one basket, while Farmington's frantic endeavor to catch up fell short.

A snafu-up in the lineup has been predicted by Coach Hutton for this week's game with Keego Harbor.

F.H.S. DOWNS MILFORD FOR SECOND TIME

Well, Farmington did it again. They beat Milford for the second time by a 28 to 11 score. Most of the scoring was done in the first half, as Farmington rolled up 21 points to Milford's 7. Farmington's Coach scored in the first quarter outpunched the Milford center and took the ball to Dunckel, who took it down the floor and scored. In the last half the game slowed down as Farmington scored only 10 points, while holding Milford to 4. The final score, F.H.S. 28, M.H.S. 11.

The last time the two teams met, they both played a good game, but Farmington came out on the losing end of a 20-17 score.

The bright spot of Friday night's game was Tyler's defensive game. He recovered almost all the rebounds on shots made by either team. This gave the ball to Farmington much of the time and helped them win.

Next week Farmington plays Keego Harbor at Farmington.

Joe McCreless.

Second Team

This fast moving second team made it seven victories to 2 defeats by downing Milford 28-11. Farmington also won the first meeting 20-17.

Holding a 21-7 lead at half time Coach Chapman saved his key men for this week's game. Even at this, Milford could only net four points in the entire second half. Farmington made 7, making the final score 28-11.

Only two teams, so far this year, have netted over twenty points on this team. They are Milford with 26, and Redford Union with 2. In nine games the second team has run up a total of 237 points to 143 for its opponents. There are still three games remaining for the home floor.

Girls Attend Radio Broadcast

Four of the Glee Club girls went to the Masonic Temple Sunday evening, February 14, to hear broadcast of the Detroit Victorians. The girls were Nancy Lee Moore, Lois Libbert, Ruby Moody and Joyce Habermehl.

Student Council Notes

At the last meeting of the Student Council Mr. Ayres discussed with the members the coming basketball tournament. The tournament will include B, C and D class schools and will be held on March 12, 13, 14 and 15.

A service flag will soon be put up in honor of those in the service who attended Farmington. Students will be asked to contribute names.

—Shirley Kekkonen

'TIS SAID . . .

Isn't life dull around here lately? I just can't seem to get my mind burning at all. So if this column does seem boring, blame it on a spring fever.

Dave, how is your hand getting along? It does seem pretty convenient, doesn't it? Think of the gym work you've had to get out of. You could have the right to beat off your enemies over the head, couldn't you? My-my why do I give him such ideas?

What's this I hear about Mr. Hutton's pushing girls? Really, gym, isn't? Should I say more?

We hear the Homecoming girls have been trying to make bread. It must have been all right, for it disappeared last night. They're these girls will make some day. I'm awfully of course!

The Freshies had a party. From what I have heard it seems to have been pretty swell. The kids certainly had fun. They really had a nice crowd despite the terrible cold. Saturday night. And Wolfe McLean, what is this out big ears' caught drifting around? Actually I would never have thought it of you. Really, how these freshmen behave!

We haven't heard even a little murmur of response to our contest. Should I get down on my knees to you with tears in my eyes? Well, I won't. But come on and help out, won't you please?

Coach! The war is certainly creeping into Farmington High School but fast. Life is just one big round of study for the girls, with the boys leaving classes for the pre-induction class. Why, what are the girls going to do when the classes without the boys there to distract them?

'Tis said Sergeant Major Leonard of the Canadian army literally swept F.H.S. students off their feet in an assembly program Monday night. He impressed upon his audience the necessity of more serious thinking.

—Ina Surchein.

Keego-Farmington Game To Be A Thriller

If the war has worked you too hard and you feel in the need of relaxation, drop around to the F. H. S. gym this Friday night and see Keego Harbor tangle with the hometown boys. A red hot battle is in prospect as the two teams are in a dead heat in any contest. Last year two close games were played by these two teams, each winning one. Keego won the first 30 to 25. The second one was even more thrilling as Farmington was awarded a 25-23 decision after regulation time was played. The victory clinched the championship for Coach Hutton's five.

The second team also expects a battle as Keego's team is rated high in the league. The fellows will be trying to make a clean record. This will be the fifth straight victory on the home floor. If they defeat the Keego clan.

—D.S.

Very Cold Room

To test the effect of frost on different road soils, the University of Michigan has a cold room in its state highway laboratory where temperatures as low as 40 degrees below zero are produced.

"INTERIOR DECORATING"

The following suggestions for refurbishing a two-room apartment are from Mr. George Cunniff, Ward's Interior Decorator, feels are appropriate for Miss Layman, because she has the type of coloring which harmonizes nicely with greens, browns and beiges. Begun with the livingroom, which has a south-western exposure:

Carpeting—Tone on tone design of green.

Furniture—Extreme modern design, with preferably a plaid or stripe upholstery of brown and beige.

Walls—Turquoise green.

Ceiling—Natural.

Draperies—Deeper green than walls, with festoon and cascade at each side.

Carbines—Because there will be a shortage of curtains, the use of Venetian blinds will be more in keeping with present day tastes.

Other small items which are selected by Miss Layman herself are: end-tables, pictures, narrow table, to suit her own personal tastes.

The bedroom, which has an eastern exposure and one side window, will have:

Carpeting—Definitely beige.

Bed—Hollywoood style—(Blood) Turfed head-board of cedar—satins with a burnout effect. Top of headboard matching color of headboard, with valance of green-striped satin.

Hassock—Full-width at foot of bed, covered in some fabric as bed.

Dressing Table—Skirt should be used in same manner and placed in front of window.

Draperies—Also should carry out stripe motif, so the colors will blend together.

A few words in conclusion are: the question as to keep away from this blue, war atmosphere.

—Gwynne Gillis, Retailing Class 1st Hour. Miss Layman.

Students Commended On War Saving Program

Word was received last week from Frank N. Levy, chairman of Michigan's War Savings Committee, that Farmington's "Schools at War Scrapbook" would be sent, among others, to Dr. Eugene B. Eliot for State exhibit in Lansing. He expressed appreciation for the school's prompt cooperation in the promotion and purchase of War Savings Stamps and Bonds in our school.

The winning school will be presented with the Liberty Bell, which they in turn will present to the State of Michigan.

'TIL YOU COME HOME AGAIN

The winter's gone, the spring's here, the sun will shine again.

The snows will melt, the trees will bud, the flowers will bloom again.

The brooks will flood, and there'll be mud, the birds will sing again. But till you come, not all the while, 'til you come home again.

The seasons go, the farmers sow—they'll reap and thresh again. The flowers grow there row on row, the children skip again. The birds will sing their melody, and clouds will soar again; My heart'll ache, I fear 'till break, 'til you come home again.

Music sounds on football grounds, the boys will play again. Schoolgirls laugh, the boys do too, and they'll be gay again; The days go by and I will cry, and then I'll pray again.

—D.S.

"God keep him safe, and give me faith," 'til you come home again.

—Joyce Lussenden.

Far Night Vision

A night fighter needs 1,000 units of vitamin A per day to aid night vision.

SULLIVAN TO THE RESCUE!

In answer to a recent 903 call sent out by Miss Pampon for practical experiences to help production boys, Charlie Sullivan came up with "these simple things that help to go a long way."

"On the tips to the fellows go. Uncle Sam's family, there is nothing they can do any better than to be on the ball the first two weeks. If for the first two weeks they do everything they're told and do it just a little faster and better than the rest of the fellows, they're all set. They also might get a special book just before they go in and study up on the IQ test they are to take. If they get a good grade on that test, they are sure to get first chance at the breaks. If they picked following to go to radio school on what they previously knew about the science of battling the breeze, I'd still be carrying water for the elephants. I did O.K. on my IQ, and that's how and why I got first chances. The main thing is to get on the ball before the other guy, and they'll get the breaks. Another thing is to not let a bunch of older fellows keep them from answering questions. When a question is asked, don't feel self-conscious, get up and give the answer. The fellows that show an interest are the ones to advance first. These are just a few simple things that help to go a long way."

Thanks, Chuck.

Around The Grades

The first graders enjoyed refreshments of pink decorated cupcakes, caramels, gum drop animals, and animal cookies at a Valentine party Friday.

The second graders considered their Valentine box the prettiest of the school. It was made by Mr. Moats and was shaped like a treasure chest with a real lock and key. For the party there was a 100 per cent attendance. Philip's readers have started a new book. Two figures numbers are being studied in arithmetic. They are making a booklet of famous people born in February.

"The fourth grade is making an airport for Social Science; so far they have the hangar, the beacon lights, the ground laid out and two airplanes. They are having grand results. The pupils in the front rows had to treat the back rows with candy for the Valentine party because they lost in a spelling race."

—N.L.M.

"The fourth graders wrote their own story."

Lawrence Scott had his cartoon published in last Saturday's Young Writers' Club. It was called "Valentine for Japan."

The elementary grades seem to be having a great deal of fun sliding on the ice, while the older people fret and strut on it. Some fun!

All the grades had their annual Valentine parties Friday. Every one had a good time along with the exchanging of valentines and having refreshments.

Too Late

Uncle Sam says we don't learn how to make the most of life until most of it is gone.

Americanism Contest Closes On April 1

Anyone interested may compete in the National Americanism Contest which closes April 1. The subject is "Making America Strong" and there must be 500 words—no more—in length. Unit (or school) awards are two prizes of \$250 each in Defense stamps, one to be given for the best essay written by a Junior high pupil, the other for the best one written by a Senior high student.

The district (or department) winners will receive "The World Book Encyclopedia," composed of eighteen volumes and guide and given by the Quarrle Corporation. Second award is \$15 in cash, third award \$10.

The national prize is \$100.

... one of the thousands of jobs Electricity is doing to win the war

The electric induction furnace is an important tool in helping to speed up war production. . . . and it is most unusual in its manner of operation. You can place your bare hand inside the furnace and not feel a bit of heat. But place a steel bar in the same spot, and in one or two minutes it becomes WHITE-HOT.

Induction heating has several clear-cut advantages. For example, it is useful in hardening the surface of a steel piece without affecting the toughness of the steel below the surface. Armor-piercing shells are point-hardened by this process. Engines and parts for airplanes, tanks, submarines, armored cars, etc. are made with the help of induction heating. A crankshaft whose surface has been hardened in this way will last five to ten times longer before needing attention than it would without such treatment.

Gun barrels of a certain caliber are now centrifugally cast from alloy-steel melted in an induction furnace. Stainless steels and "fussy" alloys are commonly melted in these furnaces, as are most of the high-speed and tool steels used for cutting. And bronze castings for naval torpedoes also come from the induction furnace.

Induction heating and melting represents only ONE of thousands of jobs that electricity is doing today in arsenals and war plants. Electric power is a weapon of war.

THE DETROIT EDISON COMPANY
