## EDITORIALS

### It's Up To All Of Us

Another tin can collection day for this community is approaching—Monday, March 29, is the day. It is a day we all should remember, and on which we all should make our contribution of salvaged tin cans.

Now that rationing is in effect, housewives are not going to have as many tin cans as formerly. That is why it is doubly important that everyone save all of the tin cans they have. It is going to take them all to keep up Farmington's share of the quota.

The salvage committee has a pretty important part to play in our contribution to the war effort, you know, but without the help of each and every person living in Farmington, the committee can do nothing. After all it is said and done, when it comes right down to rock-bottom facts, it's up to you and you alone.

Let's all put our shoulder to the wheel, and give the salvage committee all the cooperation possible. Let's see to it that our salvage program is "a good job well done."

### Industry At The Front

No one needs a doctor to tell him about the fighting equipment which our own industries have produced and which are now in action on the far-flung battlefields of the world. It includes everything from small arms to large-caliber cannon, from rubber lifeboats to flying fortresses, from radios to battleships, and from jeeps to tanks.

But industry is also equipping our armies with medical supplies, complete hospital field stations, and all the modern equipment necessary to protect the health and save the lives of our men wounded on the fighting fronts.

American soldiers today carry a sulfa drug with them, for instance. Should a man be wounded, he first has his own sulfa powder to use. This cuts down the chances of infection and greatly speeds recovery.

Then, when he is reached by stretcher bearers, he may receive emergency treatment, such as wound cleansing and pain reliever.

Back at the first-aid and clearing station he may be treated for shock, including the transfusion of blood plasma, another modern development that is saving many lives today.

Perhaps the most remarkable development of front-line medical service is the portable hospital. Located where it can usually be reached within five hours after an injury, it can be transported and set up again in a place of greater safety or usefulness in a matter of only a few hours.

Here are teams of surgeons, nurses, anesthetists, and orderlies. The equipment includes many recent advances in medical knowledge, such as the newly devised electric detector of metallic foreign bodies which makes it easier for the patient and more certain for the doctor in removing shell fragments.

Here also, of course, are the sulfa drugs, blood plasma, and anesthetics, including a new anesthesia, given intravenously, which makes a patient fall into a deep sleep before he can count ten. All these are manufactured in quantities and packaged especially for field use.

The experience now being gained by Army doctors at the front with new techniques and new equipment is going to make itself felt in better service to the injured and sick in peacetime.

In its part in the healing and mending of our wounded fighting men, and in the knowledge of post-war benefits that will ensue, American industry takes a real and just pride. It is such contributions to humanity that we Americans hope for a higher standard of living and a better world for all after the war is won.

## Churches

**FIRST METHODIST**  
 Rev. Howard C. Busching, Pastor  
 Church School, 9:30.  
 Morning Worship, 10:30.  
 Methodist Youth Fellowship, 7:30.  
 6th grade through High school age, meeting in two groups, Sundays, at 6:00 p. m.  
 Choir Rehearsal, Thursday at 7:30, at the church.

 Service at 11:00 a. m., Farmington Rd. Watch for information under "News of West Point Park" each week.  
**CHRISTIAN SCIENCE SOCIETY**  
 New High School Auditorium, Farmington  
 "Reality" will be the subject of the Lesson-Sermon in all Christian Science Churches throughout the world on Sunday, March 28.  
 The Golden Text (1 Corinthians 2:9), "Eye hath not seen, nor heard, neither have entered into the heart of man, the things which God hath prepared for them that love him."  
 Among the Bible citations in this passage (John 1:1, 3): "In the beginning was the Word, and the Word was with God, and the Word was God. All things were made by him; and without him was not anything made that was made."  
 Correlative passages to be read from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, include the following (p. 331): "The Scriptures imply that God is All-in-all. From this it follows that nothing possesses reality nor existence except the divine Mind and His ideas. . . . Everything in God's universe expresses Him."

## SYMBOL OF UNITY

By Gene Alteman

"You must grow your own." Who said it? Was it President Roosevelt, Secretary Wallace or Congressman Whoozit? Guess again. The words appeared this spring in a newspaper article authorized and paid for by the British government through its Ministry of Agriculture. The message was addressed to the women of England, and the copy reasoned that mothers, assisted by older children, must grow the vegetables that are vital to your children's health—especially in winter.

Otherwise, the British message added, "If you don't, they (the children) may go short." Plain, simple language—right to the point, no hotting around the bush. In other words, if your kids are hungry next winter for lack of health important vitamin vegetables, don't blame the Prime Minister, or the House of Commons, or the farmer. Just blame your self!

(Continued on Page Seven)

In an effort to see that every ounce of aluminum is put to the best use in winning the war, the War Production Board last week specified a group of end-products in which CMP allotments of the vital metal may be used. Unauthorized use may have been permitted inadvertently by WPB's allowing deliveries for April before obtaining end-use information and authorizing mills and foundries to fill 30 percent of the second quarter allotment of manufacturers of Class B products. On March 31, aluminum may be used for the listed purposes without further authorization.

Users of controlled materials will not have to place several different certifications on a single order. As previously announced, a single standard form of certification which may be used to validate any delivery order under CMP was issued last week. Certain sizes of wire and cable and a few other items were excluded from limitation in CMP Regulation No. 4 on deliveries of copper products from warehouses,

## Looking Back Through The Enterprise Files

**TWENTY FIVE YEARS AGO (March 29, 1918)**  
 Entry Equipment, Skilled Men  
 After three years of warfare the total number of airplanes able to take the air at any one time on either side of the western front has not been over 2,500. Each plane in the air requires a force of 46 men, two replacement planes on the ground, and one training plane for every pilot who eventually reaches the front, with an extra engine for each plane.

**Town Hall Crowded**  
 The mass meeting at the Town Hall Wednesday evening in the interest of the coming registration of women, which takes place on April 27th, under the auspices of the local unit of the Women's National Defense, called out one of the largest crowds, mostly women, although there was a goodly number of men among the audience, ever gathered in the hall, it being crowded even to the outside doors.

**Surveyors at Work**  
 Surveyors have been working on the grade along Grand River the past ten days, preparatory to paving that thoroughfare from Clarenceville west through this village to Hatten's corners.

**TEN YEARS AGO (March 30, 1933)**  
 Change in Bus Operators Occurs Saturday  
 A change will occur in the operation of the Farmington-Redford local bus line Saturday, April 1. On that day Arnold Stolz of Clarenceville will take over the line under lease from the Eastern Michigan System and will operate it under a new schedule and a lower fare. A 15-cent fare with three live-zone zones will be in effect, and a much expanded schedule. These will be tried out and changes made if necessary.

**First Dividend Will Be Paid Friday**  
 Announcement is made of the payment of a five per cent dividend by the Receiver of Peoples State Bank of Farmington. This dividend, the first to be paid, will be made available Friday morning.

**Interest is Keen in Election**  
 With spirited battles, a record set in new registrations and all other indications pointing to the largest vote in its history, Farmington City looks forward to Monday when the biennial election will determine contests for places in the city government. Arthur Lamb, incumbent, is opposed for the office of mayor by Howard M. Warner.

**FIVE YEARS AGO (March 24, 1938)**  
 Students Pleased With New Lights  
 Typing students in the high school say they are pleased with the new indirect lights in the typing room, and find that typing is much easier since the lights were installed. The lights probably will remain in the room about 30 days as an experiment to determine the best method of lighting. The installation was the first step toward improving the lighting system of the school.

**New Building Ordinance Almost Ready**  
 Only the electrical section of the new building ordinance remains to be drafted by the citizens' committee now working on the ordinance and a zoning code for the City of Farmington. The committee, headed by Bayard Tupper, has been at work several weeks and expects to have the building ordinance ready to submit April 5 to a joint meeting of the Farmington commission and the Milford commission.

**Ball Field and Park Uncovered For Spring**  
 The high school athletic field on Silvaswase and the City Park on Grand River and Oakland soon will be ready for spring activities after being seeded down and raked over.

but the 2,000 pound quarterly limitation was maintained.  
 Chemicals valued at \$93,000,000 were distributed for this month by the WPB Chemicals Division. Forty-two percent went directly into military production. Bismuth ion because of increasing demand for their use in medicines and for controlling blue mold in growing tobacco. After April 1, use of the chemicals will be permitted only on application.  
**New Price Orders**  
 A manufacturer who is the sole producer of an essential article, whose costs exceed present price ceilings, and whose company is operating at a loss was granted a method of price relief by the Office of Price Administration.  
 Continuing to raise the ceilings on bituminous coal prices by districts to allow for the added costs of the new 6-day work week, OPA increased maximum prices for District No. 5 (Michigan) by 40 cents a ton for all sizes, and those for District No. 15 (Kansas, Texas, Missouri, and parts of Oklahoma) by 15 cents a ton. Bituminous coal distributors handling lake or tide-water shipments must charge service fees based on those they charged in October 1941, the base period.
