# THE BLUE AND WHITE

### F.H.S. WINS MUDDY CONTEST FROM BRIGHTON

Three errors and only four hits enabled Farmington to take a five inning contest, last Friday, from Brighton, 4. The game was halted at the end of the fifth inding.

Dick Patiline handed out 3 passes and struck tout 3 men in the game. Pearsall of Brighton, walk, led 7 and fanne 5.

Longest hit of the gatine was a four bagger of the bat of Seats, third basemen of Brighton.

The poor condition of the 'leid made playing very difficult. Brighton's team muffed 3 chances, while Fisher and Aschen Brenner made two had mistakes for F.H.S.

## in the total average cost of WAR PRODUCTION

IF YOU TORE off one small corner of a dollar bill, that would give you some idea of the cost of the electricity used in manufacturing war products. Only 1½ per cent of the total cost of war production, on the average, goes for electricity: p8½ per cent goes for materials, lahor, plant

Yet electricity plays a most important part in turning out ret electricity plays a most important pair in terming tanks and planes and guns and ships, and the thousand-and-one other weapons of war. Without electric power, scarcely a wheel would turn in any factory or arsenal or scarcely a wheel would turn in any factory or arsenal or shippard in America. Not a piece of armament would be produced, not a bullet east, not a shell turned.

Electricity makes possible the machine tools used to build Electricity makes possible the meanine tools used to build other machine. It powers the huge rollers in steel mills. It runs high-speed precision lathes, and giant presses, and drills, and milling and grinding machines, and motors for countless factory jobs. It melts alloy steels in the electric furnace-steels used for armor plate and tanks and guns. With induction heating, it point-hardens armor piercing shells, and makes tough, wear-resistant parts for motors and airplane engines.

Electric power is doing a vital war job at low cost. And it is helping make possible new production records in thousands of plants all over the country—to shorten the war and speed victory. The Detroit Edison Company.
