"IT ISN'T OFTEN I HAND THE LITTLE LADY A COMPLIMENT!"

"I DON'T LIKE to spoil her. But this time I had to break down. It all started a couple of months before the war. We were looking over the new refrigerators.

"Bill," she said, "why don't we get the one that's sure to last—the one with no moving parts—the Servel? It's silent and—"

"Well, you know how women are. That's exactly what we bought, a Servel. And, friend, are we glad!

"No moving parts in its freezing system to wear. Low operating cost. Quietest can be. We know it will see us through.

"Why am I crowing like this? No, not just to show off. It's because refrigerators are sure to come back some day. And I just wanted to tell you how downright pleased we've been with our Servel—and why I handed the little lady a compliment."

Since the roots of crops on well-drained land go deep into the soil, the plants on such land can withstand drouth better than can plants on poorly drained land.

What You Buy With WAR BONDS

Mosquito Bar

Among the casualties returning to the United States from the Solomons are men who have lost their hearing, not from injury, not from shock, but from attack by insects upon men who have been without mosquito bar protection.

We'll never know how many lives this mosquito bar has saved and you probably never will know just how much good your purchases of War Bonds have done, but you should know that regular and increasing purchases are necessary.

OAKLAND is a Fighting County

...and Greyhound is part of its fighting power

This county is America in cross-section—fighting mad and fighting hard, doing its level best to back up our troops across the seas with the home-front cooperation they must have.

All of us are putting the drive that counts behind the particular jobs that are ours to do—whether it's sending our men to the colors—building their guns and ships and planes—raising their food—buying bonds—or moving manpower.

Men and women of this community, loyal Greyhound employees, are busy keeping buses rolling to help keep our war effort in high gear. They're driving the buses—keeping them mechanically fit—conserving vital materials—giving wartime travel information—handling baggage.

As our share in this county's joint war program, Greyhound is taking our local boys to induction centers—and bringing them back home from training camps on well-earned leaves. We are transporting our neighbors to their vital jobs in war plants and on farms. We are keeping essential travel on the move—linking up this county with the other busy communities of this state, where so much of the Nation's war activity is centered.

We're in this fight to win — we didn't start it but we're going to finish it!
