Eiffel Third Highest
The Eiffel was built to a height of 961 feet and until the erection of the Chrysler building, 1,046 feet, and the Empire State building, 1,250 feet, both in New York, was the highest structure in the world. For decades New York's Woolworth building, 750 feet, the Washington Monument, 555 feet, Cologne cathedral, 515 feet, the Great Pyramid, 450 feet, and St. Paul's in London, 365 feet.

Gas Taxes Mounted
Statisticians attempting to determine probable effects of restricted motor vehicle use on highway finances have figured out that gasoline tax collections in 1941 (an all-high year) had increased more than 85 per cent on a national average over 1932. During this 10-year period many states saw increases of more than 100 per cent in their gasoline tax yields.

Remodeling Garments Challenges Homemaker

Every used garment is an individual problem when being remodeled. For this reason it is a challenge to the imagination and much more interesting than making a dress from several yards of new material.

"When you are ready to select your pattern, give it the thought it deserves," advises Edna R. Gray, University of Illinois college of agriculture. "In achieving style in dress, fitting is as important as design, and fitting begins in the pattern. Notice the shape of the pieces with which you will have to work. Jot down some of the measurements, if necessary. Allow plenty of time at the pattern counter. Read the information on the envelopes of the patterns in which you are interested. Examine the small cutting diagrams for each pattern to be found in the counter pattern books. Such study will usually tell you whether or not you can manage to cut that particular pattern from the material with which you are to work."

"If you think you may have a piece, look for a pattern which has small pieces and many seams. If you cannot find all the items you want in one pattern, look for two. For example, perhaps a coat of one and a skirt of another will suit your needs. Before buying two patterns, however, consider whether or not you might be able to alter the design of one pattern to make it like the other one. It is usually very easy to alter skirt designs. Do not expect to be able to follow any pattern in every detail. The principal structural lines, of course, should be followed or, at most, changed only slightly."

Expert Gives Seven Tips For Extending Suit's Life

To make our suits wear longer, keep ourselves better-groomed, and to lend Uncle Sam more money for munitions, seven tips for pressing wool as an aid to clothing conservation have been outlined by Helen S. Butler, home economics extension representative.

Press on the wrong side; use two pressing cloths—one of wool, the other of muslin or heavy cotton. Put the wool cloth on the garment, over this lay the damp cotton cloth. Pass the iron lightly over the wet cloth, following the grain of the material, but do not iron heavily. Pressing is not ironing. Lift the cloths while the steam is still rising. Pat the garment into shape with the hands.
Hold the iron over thick places, such as pockets, so the moisture penetrates the fabric. Stop pressing before all the moisture has left the fabric. Pressing until perfectly dry may make the material shiny. Let the garment dry thoroughly before hanging in the closet or wearing.

India Rich Is Iron Ore
India's reserves of high grade iron ore are estimated at three billion tons, with the iron content of the ore averaging 64 per cent. Coal, coking coal and manganese are available in abundance.
